Risk Based Corrective Action And Brownfields Restorations:

Risk-based Corrective Action and Brownfields Restorations Craig H. Benson, 1998 Describes tools and methods of an approach to remediating contaminated sites that balances health and environmental risk with costs in order to reduce the amount being spent to clean up after companies that have taken the money and left the pollution The 20 papers also explore the underlying principles of the approach look at past performance and emerging trends and present many case histories Annotation copyrighted by Book News Inc Portland OR

Brownfields, Risk-Based Corrective Action, and Local Communities Peter B. Meyer, 2011-04 Addresses the problems facing communities that suffer both environmental risks from past contamination and depressed economic activity In such settings redevelopment of contaminated sites and the associated economic development may require compromised standards for environmental mitigation But partial cleanups can be shown to face inevitable failure at some future date Thus in such an approach communities face risks that they should be capable of accepting or rejecting The study considers these risks and assesses 4 alternative land use control strategies for assuring community participation in making decisions about both the cleanup process today and the response to risks of failure in the future Illus This is a print on demand report

Risk Methodologies for Technological Legacies Dennis Bley, Vitaly A. Eremenko, 2012-12-06 The Cold War Era left the major participants the United States and the former Soviet Union FSU with large legacies in terms of both contamination and potential accidents Facility contamination and environmental degradation as well as the accident vulnerable facilities and equipment are a result of weapons development testing and production Although the countries face similar issues from similar activities important differences in waste management practices make the potential environmental and health risks of more immediate concern in the FSU and Eastern Europe In the West most nuclear and chemical waste is stored in known contained locations while in the East much of the equivalent material is unconfined contaminating the environment In the past decade the U S started to address and remediate these Cold War legacies Costs have been very high and the projected cost estimates for total cleanup are still increasing Currently in Russia the resources for starting such major activities continue to be unavailable

Field Survey of HUD Site Contamination Policy: A Reprint From 'Cityscape Eugene Goldfarb, 2011-05 From 2000 through late 2009 the Federal Housing Admin FHA recommended a dig to clean approach for contaminated sites rather than the risk based corrective action RBCA approach favored by the EPA and state Voluntary Cleanup Programs Most offices followed FHA s dig to clean guidance and did not approve projects on brownfield sites Some however tried to promote redevelopment of housing on brownfield sites by following RBCA This study based on a 2007 survey of HUD field office practice discusses the issues encountered when field offices tried to resolve on a case by case project level basis the conflict between site contamination and brownfield redevelopment This is a print on demand edition of an important publication

Brownfields IV E. Beriatos, C. A. Brebbia, 2008-04-18 Rehabilitation of brownfields particularly those which are contaminated can be an expensive undertaking and requires not only technical solutions but the involvement of financial regulatory and community stakeholders Fundamental to this process is the analysis of the risks involved and the development of the appropriate strategies Those need to be weighted against the economic and social benefits of brownfield development to assess the general viability of the redevelopment In most cases the demand for development land drives the process forward while sometimes the rehabilitation is grounded on the wish to restore the landscape and the ecology of a region This volume contains the proceedings of the Fourth International Conference on Prevention Assessment Rehabilitation and Development of Brownfield Sites that was held in Cephalonia Greece in May 2008 Brownfield development is in most cases essential to attract new business to the locality and for the creation of healthy communities Therefore there is a great need for deeper research and study of all aspects of the problem technical institutional financial social and an exchange of ideas know how and experience among experts and scientists The proceedings have been arranged into the following sections Rehabilitation of Brownfields Development Issues Remediation Studies and Technologies Case Studies Risk Assessment and Management Community and Public Involvement
