

Why adolescents take risks

- Developing one's own moral code and establishing an identity, separate from parents is a major task of adolescence
 - Early adolescence (ages 11-14) – first stages of separation from parents, desire to look and act like peers, difficulty with impulse control
 - Middle adolescence (ages 15-17) – further distancing from parents and allying with peers, feelings of omnipotence and immortality can lead to dangerous behaviors
 - Late adolescence (ages 18-21) - fully identify one's own moral code, more confident and better able to delay gratification, can be protective factors

Risks and Problem Behaviors in Adolescence Richard M. Lerner, Christine M. Ohannessian, 2014-02-04 The articles in this volume illustrate how development is propelled by the bidirectional relations that occur between the person and all levels of the context The authors argue that adolescent life is embedded in a complicated developmental system involving multiple features of the individual e g biology emotions personality and cognition and the multiple levels of his or her social ecology e g peers family school the workplace and the public policy and legal systems that structure and impact behavioural opportunities for and the actions of adolescents These articles have important implications for the design of interventions aimed at adolescent problem behaviours *Reducing Adolescent Risk* Daniel Romer, 2003-04 Current policies treat adolescent risk behaviours as separate problems requiring separate solutions ignoring the overlap of many risk behaviours This text seeks to move beyond the fractured approach of preventing one kind of behaviour at a time and suggests more comprehensive prevention strategies

Handbook of Adolescent Health Risk Behavior Ralph J. DiClemente, William B. Hansen, Lynn E. Ponton, 2013-11-21 Adolescence is a developmental period of accelerating physical psychological social cultural and cognitive development often characterized by confronting and surmounting a myriad of challenges and establishing a sense of self identity and autonomy It is also unfortunately a period fraught with many threats to the health and well being of adolescents and with substantial consequent impairment and disability Many of the adverse health consequences experienced by adolescents are to a large extent the result of their risk behaviors Many adolescents today and perhaps an increasing number in the future are at risk for death disease and other adverse health outcomes that are not primarily biomedical in origin In general there has been a marked change in the causes of morbidity and mortality among adolescents Previously infectious diseases accounted for a disproportionate share of adolescent morbidity and mortality At present however the overwhelming toll of adolescent morbidity and mortality is the result of lifestyle practices *Handbook of Psychology, Developmental Psychology* Irving B.
