Risky Business Private Management Of Public Schools:

Handbook of Research in Education Finance and Policy Helen F. Ladd, Edward B. Fiske, 2012-08-21 Sponsored by the Association for Education Finance and Policy AEFPP this groundbreaking new handbook assembles in one place the existing research based knowledge in education finance and policy thereby helping to define this evolving field of research and practice. It provides a readily available resource for anyone seriously involved in education finance and policy in the United States and around the world. The Handbook traces the evolution of the field from its initial focus on school inputs and the revenue sources used to finance these inputs to a focus on educational outcomes and the larger policies used to achieve them. It shows how the current decision making context in school finance inevitably interacts with those of governance accountability equity privatization and other areas of education policy. Because a full understanding of the important contemporary issues requires input from a variety of perspectives the Handbook draws on contributors from a variety of disciplines. While many of the chapters cover complex state of the art empirical research the authors explain key concepts in language that non specialists can understand.

School Choice Policies and Outcomes Walter Feinberg, Christopher Lubienski, 2008-10-16 Perhaps no school reform has generated as much interest and controversy in recent years as the proposal to have parents select their children's schools. Opponents of school choice fear that rolling back the government's role will lead to profit driven financial scandals sectarianism and increased class and racial isolation. School choice advocates believe that state provision oversight and regulation stifle entrepreneurial creativity. The contributors to this volume not only provide a clear assessment of the logic and evidence supporting the different sides of the debate but also unmask the assumptions about the relationship between markets government and educational achievement. Their message is that neither markets nor government alone will guarantee freedom equality achievement or community. If choice is to improve education and advance equality then

educational policy cannot be placed on automatic and left to the free market Rather choice policy must be deliberately directed toward meeting these goals and this book shows how that could be accomplished *Mastering the Risky Business of Public-Private Partnerships in Infrastructure* Manal Fouad,2021-05-10 Investment in infrastructure can be a driving force of the economic recovery in the aftermath of the COVID 19 pandemic in the context of shrinking fiscal space Public private partnerships PPP bring a promise of efficiency when carefully designed and managed to avoid creating unnecessary fiscal risks But fiscal illusions prevent an understanding the sources of fiscal risks which arise in all infrastructure projects and that in PPPs present specific characteristics that need to be addressed PPP contracts are also affected by implicit fiscal risks when they are poorly designed particularly when a government signs a PPP contract for a project with no financial sustainability This paper reviews the advantages and inconveniences of PPPs discusses the fiscal illusions affecting them identifies a diversity of fiscal risks and presents the essentials of PPP fiscal risk management *Key Legal Issues for Schools* Charles J. Russo,2013-01-04 School business officials SBOs must in many respects serve as all things to all people in their workplaces Put another way SBOs must be knowledgeable about a wide range of legal issues ranging from contracts to setting policy to state bidding laws let alone constitutional matters involving the rights of students and teachers Aware of the fact that issues involving the law are at the heart of many of a SBO s duties the chapters in this edited book have been written by a diverse array of individuals with experience as educational leaders in schools and or who possess significant expertise in the School Law In light of the need to keep SBOs up to date on many issues in the ever changing world of Education Law this volume is divided into two parts The first section deals with issues that primarily impact on the management of schools while the second deals with the rights of students and teachers More specifically each of the chapters is designed to examine a specific area about which SBOs need information While no single book can ever hope to cover all of the myriad of legal topics that SBOs and other educational leaders must master in their professional lives this book will serve as an up to date and ready source of information to help keep them abreast of the many changes in the ever evolving area of School Law *No Child Left Behind and other Federal Programs for Urban School Districts* Frank Brown,Richard C. Hunter,2006-07-04 The No Child Left Behind NCLB Act is designed to close the achievement gap between disadvantaged and disadvantaged children through its Title I program This book explores models to achieve equity in Title I schools and defines what is required of states in Title I schools It examines how each state implements NCLB accountability standards **A Free Market Approach to Federal Contracting** United States. Congress. Senate. Committee on Governmental Affairs. Subcommittee on Oversight of Government Management, Restructuring, and the District of Columbia,1998 *Education Finance in the New Millenium* Stephen Chaikind,William J. Fowler,2013-09-05 The 2001 Yearbook of the AEFA reaffirms the connections between the field of education finance and the wider education community Among the topics it examines are curricula reform outcome assessment accountability community control and privatization

2001 Governing by Contract Phillip J. Cooper, Phillip Cooper, 2002-07-01 Is the public getting a good deal when the government contracts out the delivery of goods and services Phillip Cooper attempts to get at the heart of this question by exploring what happens when public sector organizations at the federal state and local levels form working relationships with other agencies communities non profit organizations and private firms through contracts Rather than focus on the ongoing debate over privatization the book emphasizes the tools managers need to form operate terminate or transform these contracts amidst a complex web of intergovernmental relations Cooper frames the issues of public contract management by showing how managers are caught in between governance by authority and government by contract By looking at cases ranging from the management of Baltimore schools to the contracting of senior citizen programs in Kansas he offers practical information to students and practitioners and a theoretical context for their work At every turn the author avoids bogging readers down in technical jargon Instead the book sheds light on a crucial part of any public manager s job with lively case material and no nonsense guidance for making the most of taxpayer dollars *The Color of School Reform* Jeffrey R. Henig, Richard C. Hula, Marion Orr, Desiree S. Pedescleaux, 2001-01-22 Why is it so difficult to design and implement fundamental educational reform in large city schools in spite of broad popular support for change How does the politics of race complicate the challenge of building and sustaining coalitions for improving urban schools These questions have provoked a great deal of theorizing but this is the first book to explore the issues on the basis of extensive solid evidence Here a group of political scientists examines education reform in Atlanta Baltimore Detroit and Washington D C where local governmental authority has passed from white to black leaders The authors show that black administrative control of big city school systems has not translated into broad improvements in the quality of public education within black led cities Race can be crucial however in fostering the broad civic involvement perhaps most needed for school reform In each city examined reform efforts often arise but collapse partly because leaders are unable to craft effective political coalitions that would commit community resources to a concrete policy agenda What undermines the leadership according to the authors is the complex role of race in each city First public authority does not guarantee access to private resources usually still controlled by white economic elites Second local authorities must interact with external actors at the state and national levels who remain predominantly white Finally issues of race divide the African American community itself and often place limits on what leaders can and cannot do Filled with insightful explanations together with recommendations for policy change this book is an important component of the debate now being waged among researchers education activists and the community as a whole *Black Social Capital* Marion Orr, 1999 Deindustrialization white flight and inner city poverty have spelled trouble for Baltimore schools Marion Orr now examines why school reform has been difficult to achieve there revealing the struggles of civic leaders and the limitations placed on Baltimore s African American community as each has tried to rescue a failing school system Examining the interplay between government and society Orr presents the first systematic analysis of social

capital both within the African American community black social capital and outside it where social capital crosses racial lines Orr shows that while black social capital may have created solidarity against white domination in Baltimore it hampered African American leaders capacity to enlist the cooperation from white corporate elites and suburban residents needed for school reform Orr examines social capital at the neighborhood level in elite level interactions and in intergovernmental relations to argue that black social capital doesn't necessarily translate into the kind of intergroup coalition needed to bring about school reform He also includes an extensive historical survey of the black community showing how distrust engendered by past black experiences has hampered the formation of significant intergroup social capital The book features case studies of school reform activity including the first analysis of the politics surrounding Baltimore's decision to hire a private for profit firm to operate nine of its public schools These cases illuminate the paradoxical aspects of black social capital in citywide school reform while offering critical perspectives on current debates about privatization site based management and other reform alternatives Orr's book challenges those who argue that social capital alone can solve fundamentally political problems by purely social means and questions the efficacy of either privatization or black community power to reform urban schools Black Social Capital offers a cogent conceptual synthesis of social capital theory and urban regime theory that demonstrates the importance of government politics and leadership in converting social capital into a resource that can be mobilized for effective social change

Where Charter School Policy Fails Amy Stuart Wells, 2002 In this provocative volume Amy Stuart Wells and her co authors provide evidence that the laissez faire policies of charter school reform often exacerbate existing inequalities in our schools Providing the most comprehensive critical review of charter schools to date this timely volume is based on the authors in depth study of 10 urban suburban and rural school districts and 17 diverse charter schools in California plus their analysis of other charter school studies from around the country Focusing on two central issues accountability and equity they explore how charter school policies affect the lives of children educators and parents in diverse social economic and political contexts The authors conclude that although the quality and experiences of charter schools is highly varied across different contexts the laws that allow these schools to exist fail to assure meaningful accountability Meanwhile these policies increase inequality and stratification by pushing the educational system toward privatization in terms of finance and admissions while failing to target much needed resources toward low income communities This dynamic book will help educators and policymakers develop a future policy agenda for charter school reform that will be more responsive to the needs of all children The authors for the first time make sense of the diverse and diffuse charter school movement They argue that the lack of support the absence of equity provisions in state laws and the burnout of many charter school personnel have led to the beginning of the end of this yet another school reform This book provides important lessons for all who care about public education Jean Anyon Graduate Center City University of New York

School Reform, Corporate Style Dorothy Shipps, 2006 Like other big city school systems Chicago's has been

repeatedly reformed over the last century Yet its schools have fallen far short of citizens expectations and left a gap between the performances of white and minority students Many blame the educational establishment for resisting change Other critics argue that reform occurs too often still others claim it comes not often enough Dorothy Shipps reappraises the tumultuous history of educational progress in Chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform Throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out Shipps chronicles how Chicago s corporate actors led abetted or restrained nearly every attempt to transform the city s school system then asks whether schools might be better reformed by others To show why city schools have failed urban children so badly she traces Chicago s reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system Her narrative encompasses the formative era of 1880 1930 when teachers unions moderated business plans previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform and the decentralization of the 1980s She also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates Business people may be too wedded to a stunted view of educators to forge a productive partnership for change Unionized teachers bridle at the second class status accorded them by managers If reform is to reach deeply into classrooms Shipps concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests This study clearly shows that in Chicago as elsewhere urban schooling is intertwined with politics and power By reviewing more than a century of corporate efforts to make education work Shipps makes a strong case that it s high time to look elsewhere perhaps to educators themselves for new leadership

How Does Teacher Pay Compare? Sylvia A. Allegretto, 2004 Reviews recent analyses of relative teacher compensation and provides a detailed analysis of trends in the relative weekly pay of elementary and secondary school teachers Shows that teacher compensation lags that of workers with similar education and experience as well as that of workers with comparable skill requirements like accountants reporters registered nurses computer programmers clergy personnel officers and vocational counselors and inspectors Finds that teachers weekly wages have grown far more slowly than those for these comparable occupations teacher wages have deteriorated about 14.8 percent since 1993 and by 12.0 percent since 1983 relative to comparable occupations

Resources in Education, 1997 Educational Leadership Bruce A. Jones, 2000-05-15 The contributors provided in this book shed light on and initiate debates about important policy issues associated with education reform and improvement The authors do this by linking conceptual frameworks to past research analyzing these challenges and speculating about the contours of future research and school practice Centering on policy research based examinations of

the future in public education in the United States this book examines policy issues as they relate to public education governance finance curriculum development and community relations At a conceptual level the volume explores along several dimensions whether or not public education should exist in its current form and what is the connection between future configurations of public education policy development and the global economy **Homeschooling in America**

Joseph Murphy,2014-02-04 This revealing and balanced portrait of homeschooling today provides a full history of the movement demographic insights and extensive research on how homeschooled children fare in the United States Delving into a movement that impacts more students nationwide than the entire charter school movement this book explores The history of homeschooling in America How this movement has grown in credibility and enrollment exponentially The current state of homeschooling including questions about who gets homeschooled why and what is the success academically and in life of students who are homeschooled The impact of homeschooling on the student and on American society In 2010 more than two million students were homeschooled In the most extensive survey and analysis of research on homeschooling spanning the birth of the movement in the 1970s to today Homeschooling in America shines a light on one of the most important yet least understood social movements of the last forty years and explores what it means for education today **Learning on the Job** Steven F.
