Rita Levi Montalcini:

Rita Levi-Montalcini Susan Tyler Hitchcock,2009 Examines the life of Rita Levi Montalcini a woman scientist who won the Nobel Prize for her research in neurology **Rita Levi-Montalcini** Barbera Foundation,Francesca Valente,2021

Rita Levi-Montalcini Lisa Yount,2009 As a woman growing up in early 20th century Italy Rita Levi Montalcini was expected to marry not pursue an education Against the objections of her father she attended Turin School of Medicine graduating with honors as an M D But her hopes of an academic position vanished with the fascist Italian government s persecution of the Jews in the late 1930s and early 1940s At the risk of her own life Levi Montalcini continued studying how the body s nervous system develops and discovered the nerve growth factor a protein that controls the growth of neurons and is required for their survival Building upon her findings she and a host of other researchers unearthed a whole class of compounds that are intimately involved in every stage of a cell s or an organism s life from conception to death Today scientists are still exploring the implications of her work from cancer treatments to Alzheimer s disease management to research on birth defects and more As Rita Levi Montalcini shows this woman s incredible persistence and faith in herself allowed her to persevere through tough opposition and earn a Nobel Prize in Physiology or Medicine in 1986 **Rita Levi-Montalcini: Pioneer and Ambassador of Science** Francesca Valente, My experience in childhood and adolescence of the subordinate role played by the female in a society run entirely by men had convinced me that I was not cut out to be a wife Rita Levi Montalcini Self assured from an early age Rita knew that she was cut out for a number of other roles and the difference she could make in the lives of others Prevailing over her father s traditional values Rita attended medical school and continued to study the development of the nervous system after graduating But as a Jew in fascist Italy her work came to a halt with discriminatory race laws and again later when she was forced into hiding from the Nazis In a makeshift lab built from black market items Rita continued her research in a small space she shared with her family Rita s courage to accept a fellowship in the United States when she didn t speak the language was repaid when her six month stay stretched into thirty three years When at seventy seven years old she and Stanley Cohen won the Nobel Prize for their discovery of nerve growth factor now used in search of cures for Alzheimer s and Parkinson s diseases Rita felt like her life was just beginning Over the next two decades she spoke around the globe as an ambassador for science and humanitarianism and accomplished more than most do during an entire lifetime *Rita Levi-Montalcini: Nobel Prize Winner* Susan Tyler Hitchcock,2005 **Rita Levi-Montalcini** Alex K Rich,2006 **Rita Levi-Montalcini--Autobiography** , The Nobel Foundation presents autobiographical information on American neurobiologist Rita Levi Montalcini 1909 Levi Montalcini received the 1986 Nobel prize for physiology or medicine along with Stanley Cohen for their discoveries of growth factors The foundation highlights her career her education and her work **Rita Levi-Montalcini** Lisa Yount,2021 As a woman growing up in early 20th century Italy Rita Levi Montalcini was expected to marry not pursue an education **In Praise of Imperfection** Rita

Bioprinting Kenneth Douglas, 2021-04-30 Of the 121 000 people on donor lists in the U S over 100 000 need kidney transplants and thousands die each year while waiting Bioprinting aspires to build healthy kidney tissue from a patient's own cells and transplant this to boost failing kidneys without fear of rejection As the 21st century dawned a handful of inspired scientists tried to use 3D printing to create living human tissue Their vision was to restore the health of people with intractable injuries such as worn out cartilage severed nerves ailing kidneys failing hearts the gamut of human frailties Their modest success energized others to join the quest Now after two decades of ingenious effort and hard work they have carved out a vibrant new discipline bioprinting In *Bioprinting To Make Ourselves Anew* physicist Kenneth Douglas casts an eye over the achievements and future of bioprinting He explains the science with rigor but with a minimum of technical baggage This is the first book on the subject written expressly for the lay audience accessible and even entertaining Douglas interviewed two dozen bioprinting researchers from around the world and he enriches the narrative by sharing stories from the scientists behind the science These contemporary vignettes are complemented by historical accounts of the women and men whose prescient contributions were foundational to the development of bioprinting The book describes the challenges and accomplishments in the bioprinting of blood vessels cartilage skin bone skeletal muscle neuromuscular junctions liver heart lung kidney and so called organs on a chip as well as the challenges of providing a blood supply and nerves to bioprinted tissues This is a compelling tale of a work in progress to imitate nature and help heal people with debilitating afflictions *Women in Neuroscience* Marie-Ève Tremblay, Corette J.
