Long Run Economics:

Economic Development in the Long Run A.J. Youngson, 2013-11-05 This book enlarges our understanding of economic development by bringing together items or aspects of historical experience relevant to the present day problems of developing countries by looking at the problems over a longer period than is usual in development economics so that the influence of underlying forces may be made evident and by comparing the experiences of different countries in similar situations A variety of countries are dealt with and most of the significant problems in development economics are covered in one context or another The authors of this symposium each an internationally acknowledged authority offer expert assessments of development as it has actually taken place The chapter by Professor Rosovsky shows what is significant what is peculiar and what could be imitated in Japan Professor Black takes the little studied case of Ireland and Dr Macpherson gives an informed and balanced account of Indian development This unique book was first published in 1972 Advanced Placement Economics John S. Kahn,1988-06-22 As Chairman of the Civil Aeronautics Board in the late 1970s Alfred E Kahn presided over the deregulation of the airlines and his book published earlier in that decade presented the first comprehensive integration of the economic theory and institutional practice of economic regulation In his lengthy new introduction to this edition Kahn surveys and analyzes the deregulation revolution that has not only swept the airlines but has transformed American public utilities and private industries generally over the past seventeen years While attitudes toward regulation have changed several times in the intervening years and government regulation has waxed and waned the question of whether to regulate more or to regulate less is a topic of constant debate one that The Economics of Regulation addresses incisively It clearly remains the standard work in the field a starting point and reference tool for anyone working in regulation Kahn points out that while dramatic changes have come about in the structurally competitive industries the airlines trucking stock exchange brokerage services railroads buses cable television oil and natural gas the consensus about the desirability and necessity for regulated monopoly in public utilities has likewise been dissolving under the burdens of inflation fuel crises and the traumatic experience with nuclear plants Kahn reviews and assesses the changes in both areas he is particularly frank in his appraisal of the effect of deregulation on the airlines His conclusion today mirrors that of his original seminal work that different industries need different mixes of institutional arrangements that cannot be decided on the basis of ideology Economics for Today Allan Layton,Tim Robinson,Irvin Tucker,2018-09-01 Economics for Today 6e simplifies the array of confusing economic analyses and presents a
