Cognitive Development in Adulthood Mark L. Howe, Charles J. Brainerd, 2012-12-06 For some time now the study of cognitive development has been far and away the most active discipline within developmental psychology Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive 50% seems like a conservative estimate Hence a series of scholarly books devoted to work in cognitive development is especially appropriate at this time The Springer Series in Cognitive Development contains two basic types of books namely edited collections of original chapters by several authors and original volumes written by one author or a small group of authors The flagship for the Springer Series is a serial publication of the advances type carrying the subtitle Progress in Cognitive Development Research Each volume in the Progress sequence is strongly thematic in that it is limited to some well defined domain of cognitive developmental research e g logical and mathematical development development of learning All Progress volumes will be edited collections Editors of such collections upon consultation with the Series Editor may elect to have their books published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors are being published as separate volumes within the series A fairly broad definition of cognitive development is being used in the selection of books for this series

Cognitive Development and Individual Variability Anik De Ribaupierre, Thierry Lecerf, 2019-07-01 The standard approach to cognitive development most frequently consists of cross sectional studies comparing different ages and groups while restricted to a single task The necessity to focus on the individual in an idiographic perspective rather than on the task or the variable has been repeatedly emphasized most recently in several very important papers by Nesselroade and Molenaar Variability has

also emerged as a crucial characteristic Moreover understanding the developmental construction of a given cognitive achievement is imperative to understanding cognitive functioning in adulthood The general objective of this book is to focus on the individual by studying intraindividual and interindividual variability in various cognitive tasks that is intraindividual variability across items of a given task inconsistency across various cognitive tasks dispersion and or across years intraindividual change and of course on interindividual differences in intraindividual variability This book presents empirical studies that have been conducted by research groups in Europe and in North America prominent in the field of variability and development or methodology The 26 authors co authors include senior authors such as Lautrey Schmiedek Dauvier van der Maas Ghisletta Stawski MacDonald and de Ribaupierre *Development through Adulthood* Oliver Robinson,2020-04-04 Now updated for its second edition this illuminating textbook explores the developmental stages and changes during adulthood that define some of the most pivotal years of our lives Relationships cognitive ageing parenthood personality shifts life crises fulfilment funerals friendships retirement and death all are presented in light of psychological theory and the latest research Taking a thematic approach the chapters cover interdependent areas of our cognitive psychological social cultural and moral lives that constitute this fascinating area in psychology Providing an empirical analysis Robinson considers models for understanding behaviour and development methods of collecting data and study design Academically rigorous and elegantly written *Development through Adulthood* is the perfect guide to classic and current research in the field It is essential reading for students studying adult or lifespan development gerontology and the psychology of ageing It will also appeal to those studying an applied social science and anyone interested in fully understanding adulthood and ageing New to this Edition Spotlights on landmark studies fully updated to cover the latest key research in each subject area Increased focus on gender issues Real world applications boxes updated with current and relevant examples of important intervention strategies **Human Development in Adulthood** Lewis R. Kaufman,Elizabeth O. Lichtenberger,2005-08-05 The classic text now updated with a new interpretive approach to the WAIS III *Assessing Adolescent and Adult Intelligence* the classic text from Alan Kaufman and Elizabeth Lichtenberger has consistently provided the most comprehensive source of information on cognitive assessment of adults and adolescents The newly updated Third Edition provides important enhancements and additions that highlight the latest research and interpretive methods for the WAIS III Augmenting the traditional sequential and simultaneous WAIS III

interpretive methods the authors present a new approach derived from Cattell Horn Carroll CHC theory This approach combines normative assessment performance relative to age peers with ipsative assessment performance relative to the person's own mean level Following Flanagan and Kaufman's work to develop a similar CHC approach for the WISC IV Kaufman and Lichtenberger have applied this system to the WAIS III profile of scores along with integrating recent WAIS III literature Four appendices present the new method in depth In addition to a detailed description the authors provide a blank interpretive worksheet to help examiners make the calculations and decisions needed for applying the additional steps of the new system and norms tables for the new WAIS III subtest combinations added in this approach Assessing Adolescent and Adult Intelligence remains the premier resource for the field covering not only the WAIS III but also the WJ III the KAIT and several brief measures of intelligence as well as laying out a relevant up to date discussion of the discipline The new theory based interpretive approach for the WAIS III makes this a vital resource for practicing psychologists as well as a comprehensive text for graduate students

Ageing and Mental Handicap James Hogg, Steve Moss, Diana Cooke, 2024-05-10 In the 1980s there was growing interest in the topic of ageing and learning disabilities for two principal reasons First the life expectancy of people with learning disabilities had risen significantly over the previous decades and many once infancy had been survived could expect a life span similar to that of non disabled people Secondly a growing commitment on the part of the government and service providers to make provision for people with disabilities in the community rather than in institutions had focused attention on this group Originally published in 1988 reissued here with a new foreword this book was one of the first on this subject It examines

epidemiology and mortality and medical and psychiatric issues compared with non disabled older people It considers how people with learning disabilities change in intellectual and adaptive function with age the nature of family relationships relevant therapeutic programmes and policy and the development of services The book represented a major review of a hitherto neglected topic and would interest gerontologists psychologists and professional health social and educational staff concerned with the welfare of older people with learning disabilities This book is a re issue originally published in 1988 The language used is a reflection of its era and no offence is meant by the Publishers to any reader by this re publication
