New Mexico Magazine , 1999     109 East Palace Jennet Conant, 2007-11-01 From the bestselling author of *Tuxedo Park* the extraordinary story of the thousands of people who were sequestered in a military facility in the desert for twenty seven intense months under J Robert Oppenheimer where the world's best scientists raced to invent the atomic bomb and win

World War II In 1943 J Robert Oppenheimer the brilliant charismatic head of the Manhattan Project recruited scientists to live as virtual prisoners of the U S government at Los Alamos a barren mesa thirty five miles outside Santa Fe New Mexico Thousands of men women and children spent the war years sequestered in this top secret military facility They lied to friends and family about where they were going and what they were doing and then disappeared into the desert Through the eyes of a young Santa Fe widow who was one of Oppenheimer s first recruits we see how for all his flaws he developed into an inspiring leader and motivated all those involved in the Los Alamos project to make a supreme effort and achieve the unthinkable

Borderwaters Brian Russell Roberts,2021-04-05 Conventional narratives describe the United States as a continental country bordered by Canada and Mexico Yet since the late twentieth century the United States has claimed more water space than land space and more water space than perhaps any other country in the world This watery version of the United States borders some twenty one countries particularly in the archipelagoes of the Pacific and the Caribbean In Borderwaters Brian Russell Roberts dispels continental national mythologies to advance an alternative image of the United States as an archipelagic nation Drawing on literature visual art and other expressive forms that range from novels by Mark Twain and Zora Neale Hurston to Indigenous testimonies against nuclear testing and Miguel Covarrubias s visual representations of Indonesia and the Caribbean Roberts remaps both the fundamentals of US geography and the foundations of how we discuss US culture

America Second Isaac Stone Fish,2022-02-15 A timely provocative expos of American political and business leadership s deep ties to China a network of people who believe they are doing the right thing at a profound and often hidden cost to U S interests The past few years have seen relations between China and the United States shift from enthusiastic economic partners to wary frenemies to open rivals Americans have been slow to wake up to the challenges posed by the Chinese Communist Party Why did this happen And what can we do about it In America Second Isaac Stone Fish traces the evolution of the Party s influence in America He shows how America s leaders initially welcomed China s entry into the U S economy believing that trade and engagement would lead to a more democratic China And he explains how although this belief has proved misguided many of our businesspeople and politicians have become too dependent on China to challenge it America Second exposes a deep network of Beijing s influence in America built quietly over the years through prominent figures like former secretaries of state Henry Kissinger and Madeleine Albright Disney chairman Bob Iger and members of the Bush family And it shows how to fight that influence without being paranoid xenophobic or racist This is an authoritative and

important story of corruption and good intentions gone wrong with serious implications not only for the future of the United States but for the world at large      **Colorado Geographic Names** ,1981
