Losing Friends:

Buddy System Geoffrey Greif,2009 Much has been made of the complex social arrangements that girls and women navigate but little scholarly or popular attention has focused on what friendship means to men Drawing on in depth interviews with nearly 400 men therapist and researcher Geoffrey L Greif takes readers on a guided tour of male friendships explaining what makes them work why they are vital to the health of individuals and communities and how to build the kinds of friendships that can lead to longer and happier lives Another 120 conversations with women help map the differences in what men and women seek from friendships and what if anything men can learn from women s relationships The guiding feature of the book is Greif s typology of male friendships he dispels the myth that men don t have friends showing that men have must trust just and rust friends A must friend is the best friend a man absolutely must call with earthshaking news A trust friend is liked and trusted but not necessarily held as close as a must friend Just friends are casual acquaintances while rust friends have a long history together and can drift in and out of each other s lives essentially picking up where they last left off Understanding the role each of these types of friends play across men s lives reveals fascinating developmental patterns such as how men cope with stress and conflict and how they make and maintain friendships and how their friends keep them active and happy Through the lively words of men themselves and detailed profiles of men from their twenties to their nineties readers may be surprised to find what friendships offer men as well as their families and communities and are sure to learn what makes their own relationships tick Online Harassment Jennifer Golbeck,2018-07-20 Online Harassment is one of the most serious problems in social media To address it requires understanding the forms harassment takes how it impacts the targets who harasses and how technology that stands between users and social media can stop harassers and protect users The field of Human Computer Interaction provides a unique set of tools to address this challenge This book brings together experts in theory socio technical systems network analysis text analysis and machine learning to present a broad set of analyses and applications that improve our understanding of the harassment problem and how to address it This book tackles the problem of harassment by addressing it in three major domains First chapters explore how harassment manifests including extensive analysis of the Gamer Gate incident stylistic features of different types of harassment how gender differences affect misogynistic harassment Then we look at the results of harassment including how it drives people offline and the impacts it has on targets Finally we address techniques for mitigating harassment both through automated detection and filtering and interface options that users control Together many branches of HCI come together to provide a comprehensive look at the phenomenon of online harassment and to advance the field toward effective human oriented solutions *DBT?
