*Loss, Survive, Thrive* Meryl Hershey Beck, 2019-11-22 No one is prepared for the loss of a child No one It feels completely

unnatural for children to predecease their parents Although it is not widely known each year there are over 135 000 under 40 year old deaths in the U S alone And according to one study 19% of parents outlive their children often carrying the weight of horrendous grief to their own graves Isolated and alone is how parents often describe the grief process Well meaning friends and family members usually rush to their side in the beginning Once the floral arrangements have wilted and the dinners from caring friends diminish there isn't really much that can be said to bring comfort to a suffering parent especially if those friends haven't experienced it themselves Unfortunately when these caring friends do bring up the loss quite often they say the wrong things Loss Survive Thrive offers a lifeline of hope Each chapter is an inspirational story written by a parent who also experienced the agony of losing a child reclaimed his/her vitality and is now living a fulfilling life Every story is authentic and heartfelt designed to uplift and inspire The collective authors reach out through the pages to virtually hold hands with those who are suffering We the contributors have all been there We know their pain and we know about survival And now through our stories we offer comfort and support in helping them get through the toughest time of their lives Bereaved parents share an unspeakable bond And Loss Survive Thrive imparts insight from what's likely the only voices that grieving parents can hear others who have walked in their shoes This book is a giant step toward healing the grieving heart

Twomey,2017-12-11      *Animal Ethics in Context* Clare Palmer,2010 It is widely agreed that because animals feel pain we should not make them suffer gratuitously Some ethical theories go even further because of the capacities that they possess animals have the right not to be harmed or killed These views concern what not to do to animals but we also face questions about when we should and should not assist animals that are hungry or distressed Should we feed a starving stray kitten And if so does this commit us if we are to be consistent to feeding wild animals during a hard winter In this controversial book Clare Palmer advances a theory that claims with respect to assisting animals that what is owed to one is not necessarily owed to all even if animals share similar psychological capacities Context history and relation can be critical ethical factors If animals live independently in the wild their fate is not any of our moral business Yet if humans create dependent animals or destroy their habitats we may have a responsibility to assist them Such arguments are familiar in human cases we think that parents have special obligations to their children for example or that some groups owe reparations to others Palmer develops such relational concerns in the context of wild animals domesticated animals and urban scavengers arguing that different contexts can create different moral relationships      **Discovering A.
