Marcus,2000-04-15 Para Sites the penultimate volume in the Late Editions series explores how social actors located within centers of power and privilege develop and express a critical consciousness of their own situations Departing from the usual focus of ethnography and cultural analysis on the socially marginalized these pieces probe subjects who are undeniably complicit with powerful institutional engines of contemporary change In each case the possibility of alternative thinking or

practices is in complex relation to the subject's source of empowerment. These cases challenge the condition of cynicism that has been the favored mode of characterizing the mind set of intellectuals and professionals comfortable in their lives of middle class consumption and work. In their effort to establish para sites of critical awareness parallel to the levels of political and economic power at which they function, these subjects suggest that those who lead ordinary lives of modest power and privilege might not be parasites in relation to the systems they serve but may be creating unique and independent critical perspectives.

**The Lost Art of Happiness** Arthur Dobrin, Arthur Dobrin, D.S.W., Professor Emeritus of University Studies, Hofstra University, 2011-10-31 The key to the good life is compassion. **Kinship Medicine** Wendy Johnson, MD, MPH, 2025-07-15 For fans of *Braiding Sweetgrass*, *The Future We Choose*, and *The Blue Zones*, a book about the effect our relationship to nature has on our well being and health. Our modern way of living is incompatible with our survival. Most of us intuitively know this truth but almost everything in our society encourages us to ignore it. Dr. Wendy Johnson confronts this undeniable fact and breaks down how we think and act every day in ways that undermine our individual and collective well being. The antidotes to many of the causal factors of poor health—loneliness, industrial diets, systemic inequality, fear of death, profit-based healthcare—are relational with each other and with the living earth. Through evidence from public health, sociology, anthropology, human ecology, and her experience as a family physician, Dr. Wendy Johnson will show you how we must incorporate an ecosystem perspective into modern medicine. What you ingest and where you live can reinforce or upset your body's delicate balance. Eliminating one organism in an ecosystem can affect all the others. Histories of trauma can be passed down for generations. Rekindling our relationships to non-human life is essential to our well being. Being closer to death can release some of its power over us. Actions of communities will be stronger and more lasting than any individual efforts. You will leave with a clear vision of what a new society might look like, methods to accomplish this transformation, and concrete examples of where it is being done successfully.
