Lost At Sea Great Shipwrecks Of History:

Lost at Sea Ronald Pearsall, 1996 Over 120 illustrations From ancient times to the present day marine disasters have been a fact of everyday life Accidents at sea occur for many reasons collisions explosions poor navigation bad ship design violent storms and sometimes just plain bad luck The shipwrecks depicted in this book reveal through both image and text the dire consequences of these disasters as well as the formidable power of nature over men Journeying far and wide this volume illustrated with 124 full color illustrations covers the multitude of stories behind these catastrophes and examines naval design throughout the ages

Out of the Depths Alan G. Jamieson, 2024-08-12 A highly illustrated voyage through shipwrecks ancient and contemporary Out of the Depths explores all aspects of shipwrecks across four thousand years examining their historical context and significance showing how shipwrecks can be time capsules and shedding new light on long departed societies and civilizations Alan G Jamieson not only informs readers of the technological developments over the last sixty years that have made the true appreciation of shipwrecks possible but he also covers shipwrecks in culture and maritime archaeology their appeal to treasure hunters and their environmental impacts Although shipwrecks have become less common in recent decades their implications have become more wide ranging since the 1960s foundering supertankers have caused massive environmental disasters and in 2021 the blocking of the Suez Canal by the giant container ship Ever Given had a serious effect on global trade

Ancient Ocean Crossings Stephen C. Jett, 2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In Ancient Ocean Crossings Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth's two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas developed independently Drawing on abundant and concrete evidence to support his theory for significant pre Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography ethnobotany genetics medicine and the history of navigation and seafaring making an innovative and persuasive multidisciplinary case for a new understanding of human societies and their diffuse but interconnected development

A History of the World in Twelve Shipwrecks David Gibbins, 2024-04-02. From renowned underwater archaeologist David Gibbins comes an exciting and rich narrative of human history told through the archaeological discoveries of twelve shipwrecks across time. The Viking warship of King Cnut the Great; Henry VIII's Mary Rose; Captain John Franklin's doomed HMS Terror; the SS Gairsoppa destroyed by a Nazi U-boat in the Atlantic during World War II. Since we first set sail on the open sea, ships and their wrecks have been an inevitable part of human history. Archaeologists have made spectacular discoveries excavating these sunken ships, their protective underwater cocoons keeping evidence of past civilizations preserved. Now, for the first time, world-renowned maritime archaeologist David Gibbins ties together the stories of some of the most significant shipwrecks in time to form a single overarching narrative of world history. *A History of the World in Twelve Shipwrecks* is not just the story of those ships, the people who sailed on them, and the cargo and treasure they carried, but also the story of the spread of people, religion, and ideas around the world. It is a story of colonialism, migration, and the indomitable human spirit that continues today. From the glittering Bronze Age to the world of Caesar's Rome, through the era of the Vikings to the exploration of the Arctic, Gibbins uses shipwrecks to tell all. Drawing on decades of experience excavating shipwrecks around the world, Gibbins reveals the riches beneath the waves and shows us how the treasures found there can be a porthole to the past that tell a new story about the world and its underwater secrets.
