American Culture Association 2008 Science fiction film offers its viewers many pleasures not least of which is the possibility
of imagining other worlds in which very different forms of society exist Not surprisingly however these alternative worlds
often become spaces in which filmmakers and film audiences can explore issues of concern in our own society Through an
analysis of over thirty canonic science fiction SF films including Logan s Run Star Wars Blade Runner Back to the Future
Gattaca and Minority Report Black Space offers a thorough going investigation of how SF film since the 1950s has dealt with
the issue of race and specifically with the representation of blackness Setting his study against the backdrop of America s
ongoing racial struggles and complex socioeconomic histories Adilifu Nama pursues a number of themes in Black Space They
include the structured absence token presence of blacks in SF film racial contamination and racial paranoia the traumatized
black body as the ultimate signifier of difference alienness and otherness the use of class and economic issues to subsume
race as an issue the racially subversive pleasures and allegories encoded in some mainstream SF films and the ways in which
independent and extra filmic productions are subverting the SF genre of Hollywood filmmaking The first book length study of
African American representation in science fiction film Black Space demonstrates that SF cinema has become an important
field of racial analysis a site where definitions of race can be contested and post civil rights race relations re imagined
