Century Sanja Rodeš, 2024-06-28 This book examines architecture image and media relationships as productive for architecture and architectural discourses By arguing that the relationships between architecture and media cannot be dismissed via linear criticism of architecture and media or image these relations are instead seen as a part of a sphere a mediasphere of complex relationships In lieu of anything like a consensus on the contemporary condition of architecture referring to the late twentieth and the twenty first centuries the starting point of this book is that the relationships between architecture media and images continue to multiply owing to continuous technological advancements Contemporary architecture considered in this book is related to the selected circumstances of high visibility where architectural images are propelled into visibility and conflated with non architectural images This takes architecture outside of architectural only discourse and into the public realm By granting higher visibility to both the architectural images and architecture in the public realm architecture can also be influenced by the various perceptions of the general public and can enter public consciousness via non architectural media With increased visibility architecture s far reaching presence calls for more structured analysis of its nature and potential As the analysed architecture in this book is associated with the discourses outside of architecture some of which relate to terrorism natural disaster and branding and consumption the limits of contemporary architectural discipline are questioned and extended This book is written for academics and students in architectural history theory and criticism particularly those interested in visual and media studies *A History of Western Architecture* David Watkin, 2005 The history of Western architecture from the earliest times in Mesopotamia and Egypt to the dramatic impact of CAD on architectural practice at the beginning of the 21st century *Structure in Architecture* Rowland J. Mainstone, 2024-10-28 All buildings must stand An adequate structure was as necessary for the simplest primitive hut as it is for the tallest or widest spanning modern building However this requirement became more difficult to satisfy as designers became more adventurous and the experience already gained became less directly applicable The present papers look at the consequent evolution of design methods and the types of understanding that have been essential guides A particular focus is the question of how earlier innovations made without the benefits of modern theory were possible Other papers look in detail at the most outstanding of these achievements such as the church of Hagia Sophia in Istanbul and the dome of Florence Cathedral Louvre Abu Dhabi Olivier Boissière, Jean Nouvel, 2019 Louvre Abu Dhabi is a comprehensive exploration of Jean Nouvel s latest masterpiece from the first sketches and through each phase of its conception and construction From the majestic novel dome to the exhibition halls this edition walks the reader through this architectural jewel *Architecture, Print Culture and the Public Sphere in Eighteenth-Century France* Richard Wittman, 2007 This book focuses on the complex ways in which architectural practice theory patronage and experience became modern with the rise of a mass public and a reconfigured public sphere between the end of the seventeenth century and the French Revolution Presenting a fresh theoretical orientation and a large body of new primary research this book offers a new cultural history of virtually all the

major monuments of eighteenth century Parisian architecture with detailed analyses of the public debates that erupted around such Parisian monuments as the east facade of the Louvre the Place Louis XV the Place de la Concorde and the church of Sainte Genevieve the Pantheon Depicting the passage of architecture into a mediatized public culture as a turning point and interrogating it as a symptom of the distinctly modern configuration of individual society and space that emerged during this period this study will interest readers well beyond the discipline of architectural history
