Love Other Near Death Experiences:

Love and Other Near-Death Experiences Mil Millington, 2006-02-14 Hello My name is Robert and I haven't been dead for sixty three days now If he hadn't bought those crummy towels Rob would be six feet under But his poor shopping sense accidentally set off a convoluted chain of events that meant he lived when all those others died in the pub explosion Okay maybe it wasn't the ugly towels that saved his life Perhaps it was some other random action some other small movement that was the utterly trivial yet vitally important factor And that's the real problem Now with his wedding fast approaching Rob suddenly finds himself paralyzed with indecision about Every Little Thing He just can't be sure which seemingly innocuous choice will mean the difference between life and death Should he wash the fork or the knife first Should he step out of the shower with his left leg or his right leg Red sweater or blue One thing is certain His fiancée Jo is at her wits end To save his relationship and his sanity Rob embarks on a quest to find out why he's still breathing When he meets up with others who have had similar lifesaving near misses he figures the answer must be close But fate may just catch them yet for Rob's search to understand why he's still alive might well turn out to be the very thing that kills them all Filled with the barbed and sparkling dialogue that made *Things My Girlfriend and I Have Argued About* a cult hit Mil Millington's *Love and Other Near Death Experiences* is a hilarious existential romantic comedy about second guesses and second chances

Nothing More Important Than Others Kevin R Williams, 2019-06-07 Nothing is more important than other people Near death experiences affirm this fact Why Because God is manifest within other people and how we treat other people is how we treat God Loving other people unconditionally is the goal for every human being because God is love and love is God How we treat other people will determine exactly which afterlife realm we will inhabit after death Those people who love others the most will inhabit the highest heaven In other words the afterlife is about deeds not creeds and loving others unconditionally is where God is manifest the most Giving and receiving love is what produces heaven it's the only thing we can take with us after death Loving others is heaven And love is joy The more love we have for other people the more joy we have in our lives And there are a multitude of heavens of varying degree of love and joy so that no one goes where they are unwelcome or do not fit in Birds of a feather flock together This book reveals the importance of loving others Three exceptional near death experiences are provided to make this point The author's research conclusions includes topics such as the Earth as the School of Hard Knocks the problem of war and evil the death process the soul as an orb the homecoming experienced by NDErs the intense emotions experienced in NDEs forgotten knowledge people receive during their NDE and a description of some of the afterlife realms This book also includes articles from the author's website showing how love is supreme when it comes to NDEs

Near-Death Experiences John Martin Fischer,Benjamin Mitchell-Yellin,2016-05-02 Near death experiences offer a glimpse not only into the nature of death but also into the meaning of life They are not only useful tools to aid in the human quest to understand death but are also deeply meaningful transformative experiences for the people who have them In a unique contribution to the growing and popular literature on the subject philosophers John Martin Fischer and Benjamin Mitchell Yellin examine prominent near death experiences such as those of Pam Reynolds Eben Alexander and Colton Burpo They combine their investigations with critiques of the narratives analysis by those who take them to show that our minds are immaterial and heaven is for real In contrast the authors provide a blueprint for a science based explanation Focusing on the question of whether near death experiences provide evidence that consciousness is separable from our brains and bodies Fischer and Mitchell Yellin give a naturalistic account of the profound meaning and transformative effects that these experiences engender in many This book takes the reality of near death experiences seriously But it also shows that understanding them through the tools of science is completely compatible with acknowledging their profound meaning

Testimonies about near death experiences What does the Bible say Can these experiences be deceptive and consequential What heaven and hell are like **Near Death Experiences** Oliver Faith, AI, 2025-02-14 Near Death Experiences explores the profound phenomenon of NDEs examining accounts of individuals who have clinically died and returned to life It probes fundamental questions about consciousness spirituality and the nature of reality particularly focusing on out of body experiences life reviews and feelings of peace Historically dismissed NDEs are now recognized as complex experiences that challenge scientific materialism and offer comfort to those facing death or grief The book uniquely synthesizes scientific research religious interpretations and personal narratives to bridge the gap between science and spirituality making it valuable for those interested in religion spirituality and consciousness studies The book is structured to provide a comprehensive overview starting with the core elements of NDEs It then examines scientific research analyzing physiological and psychological aspects Next it explores religious interpretations across faiths like Christianity Islam Hinduism and Buddhism comparing beliefs about death and the afterlife Finally it analyzes cross cultural accounts identifying universal motifs and cultural variations This approach culminates in arguing that NDEs regardless of their origin can profoundly impact individuals fostering compassion and diminishing the fear of death *God So Loved the World* Robert Spitzer, 2016-03-10 In this volume the brilliant Fr Spitzer probes in detail the major question that if an intelligent Creator God manifest in logical proofs scientific evidence and near death experiences who is the source of our desire for the sacred and the transcendental desires for truth love goodness and beauty would want to reveal himself to us personally and ultimately He then shows this is reasonable not only in light of our interior experience of a transcendent Reality but also that a completely intelligent Reality is completely positive implying its possession of a completely positive virtue namely love defined as agape This leads to the question whether God might be unconditionally loving and if he is whether he would want to make a personal appearance to us in a perfect act of empathy face to face After examining the rational evidence for this he reviews all world religions to see if there is one that reveals such a God an unconditionally loving God who would want to be with us in perfect empathy This leads us to the extraordinary claim of Jesus Christ who taught that God is Abba the unconditionally loving Father Jesus claims go further saying that He is also unconditional love and that his mission is to give us that love through an act of complete self sacrifice He also claims to be the exclusive Son of the Father sent by God to save the world and the one who possesses divine power and authority The rest of the book does an in depth examination of the evidence for Jesus unconditional love of sinners his teachings his miracles and his rising from the dead As well as the evidence for Jesus gift of the Holy Spirit that enabled his disciples to perform miracles in his name and evidence for the

presence of the Holy Spirit today If this strong evidence convinces us to believe that Jesus is our ultimate meaning and destiny and desire His saving presence in our lives that evidence should galvanize the Holy Spirit within us to show that Jesus is Lord and Savior the way the truth and the life And our faith in him will transform everything we think about our nature dignity and destiny and how we live endure suffering contend with evil and treat our neighbor [Ethics and Animals](#)

The Science of Near-Death Experiences John C. Hagan,2017-01-30 What happens to consciousness during the act of dying The most compelling answers come from people who almost die and later recall events that occurred while lifesaving resuscitation emergency care or surgery was performed These events are now called near death experiences NDEs As medical and surgical skills improve innovative procedures can bring back patients who have traveled farther on the path to death than at any other time in history Physicians and healthcare professionals must learn how to appropriately treat patients who report an NDE It is estimated that more than 10 million people in the United States have experienced an NDE Hagan and the contributors to this volume engage in evidence based research on near death experiences and include physicians who themselves have undergone a near death experience This book establishes a new paradigm for NDEs

Out-of-Body and Near-Death Experiences Michael N. Marsh,2010-01-21 Personalised accounts of out of body OBE and near death NDE experiences are frequently interpreted as offering evidence for immortality and an afterlife Since most OBE NDE follow severe curtailments of cerebral circulation with loss of consciousness the agonal brain supposedly permits mind soul or consciousness to escape neural control and provide glimpses of the afterlife Michael Marsh critically analyses the work of five key writers who support this so called dying brain hypothesis He firmly disagrees with such otherworldly mystical or psychical interpretations ably demonstrating how they are explicable in terms of brain neurophysiology and its neuropathological disturbances The original basis and thrust of Marsh s claim sees the recorded phenomenology as reflections of brains rapidly reawakening to full conscious awareness consistent with other reported phenomenologies attending recovery from antecedent states of unconsciousness the re awakening brain hypothesis From this basis Marsh also

offers a re classification of NDE into early and late phase sequences thereby dismantling the untenable concepts of core and depth experiences Marsh further provides a detailed examination of the spiritual and quasi religious overtones accorded OBE NDE highlighting their inconsistencies when compared with classical accounts of divine disclosure and the eschatological precepts of resurrection belief as professed credally In assessing the implications of anthropological philosophical and theological concepts of personhood and soul as arguments for personal survival after death Marsh celebrates the role of conventional faith in appropriating the expectant biblical promises of a New Creation
