Fearless Vulgarly Ken Feil, 2022-11-29 The enduring queer feminist engagement with Valley of the Dolls author Jacqueline Susann's camp comedy legacy Catalyzed by her notoriously dirty fabulously successful bestseller Valley of the Dolls the Jackie Susann Sixties brimmed with camp comedy that now permeates contemporary celebrations of the author from Pee wee's Playhouse to RuPaul's Drag Race and Lee Daniels's Star First christened camp by Gloria Steinem in an excoriating review of Valley of the Dolls and compounded by the publishing juggernauts The Love Machine 1969 Once Is Not Enough 1973 and Dolores 1976 the comedy of Jackie Susann illuminated conflicting positions about gender sexuality and aesthetic value Through a writing formula that Ken Feil calls sleazy realism Susann veers from gossip to confession and devises comedies of bad manners spun from real celebrities whose occasionally queer and always outré antics clashed with their official personas the popular genres they were famous for and the narrow normative constructions of identity and reality shaped by the culture industry Susann's promotional appearances led to another comedy of bad manners this one populated with critics alternately horrified and delighted by an upstart woman vulgarian barging into the male literary firmament and which continues to inspire fascination for the author her novels and their legendarily bad film adaptations

NATURAL LANGUAGE PROCESSING WITH PYTHON Dr. Bharti Salunke, Sharad Salunke, Dr. Rajesh Doriya, 2024-11-06 Natural Language Processing NLP is a rapidly evolving field within artificial intelligence that focuses on the interaction between computers and human languages It is concerned with the ability of machines to read understand and generate

human language in a way that is both meaningful and contextually relevant The integration of NLP with Python has revolutionized this domain as Python's simplicity, versatility, and extensive libraries make it an ideal tool for developing NLP applications This abstract delves into the essential aspects of NLP using Python, exploring key concepts, tools, and techniques that enable machines to process and analyze large amounts of natural language data At its core, NLP involves several fundamental tasks, including tokenization, part of speech tagging, named entity recognition, syntactic parsing, and sentiment analysis Python, with its rich ecosystem of libraries such as NLTK, spaCy, and transformers, provides an accessible and robust framework for tackling these tasks Tokenization, for instance, breaks down text into smaller units such as words or sentences, which forms the foundation for many NLP applications Part of speech tagging assigns grammatical labels to words, while named entity recognition identifies specific entities like names, dates, or locations within the text Syntactic parsing helps in understanding the grammatical structure of sentences, and sentiment analysis enables machines to determine the emotional tone of a piece of text One of the significant advancements in NLP is the application of machine learning techniques to language processing Python's libraries such as scikit-learn, TensorFlow, and PyTorch offer powerful tools for training models that can predict and classify language data Deep learning models, particularly those based on neural networks, have led to major breakthroughs in tasks like machine translation, speech recognition, and question answering Pre-trained models like BERT and GPT, implemented through Python frameworks, have set new benchmarks in NLP, allowing developers to build more sophisticated and accurate systems with minimal training data

The Mirror and the Mind Katja Guenther, 2024-11-26 How the classic mirror test served as a portal for scientists to explore questions of self-awareness Since the late eighteenth century, scientists have placed subjects—humans, infants, animals, and robots—in front of mirrors in order to

look for signs of self recognition Mirrors served as the possible means for answering the question What makes us human In *The Mirror and the Mind* Katja Guenther traces the history of the mirror self recognition test exploring how researchers from a range of disciplines psychoanalysis psychiatry developmental and animal psychology cybernetics anthropology and neuroscience came to read the peculiar behaviors elicited by mirrors Investigating the ways mirrors could lead to both identification and misidentification Guenther looks at how such experiments ultimately failed to determine human specificity The mirror test was thrust into the limelight when Charles Darwin challenged the idea that language sets humans apart Thereafter the mirror previously a recurrent if marginal scientific tool became dominant in attempts to demarcate humans from other animals But because researchers could not rely on language to determine what their nonspeaking subjects were experiencing they had to come up with significant innovations including notation strategies testing protocols and the linking of scientific theories across disciplines From the robotic tortoises of Grey Walter and the mark test of Beulah Amsterdam and Gordon Gallup to anorexia research and mirror neurons the mirror test offers a window into the emergence of such fields as biology psychology psychiatry animal studies cognitive science and neuroscience *The Mirror and the Mind* offers an intriguing history of experiments in self awareness and the advancements of the human sciences across more than a century
