Making Sense of Sports Ernest Cashmore, 1996 *Making Sense of Diversity in Organizing Sport* Annelies Knoppers, Anton Anthonissen, 2006 This superb volume aims to incorporate cutting edge research designed to transcend the barriers between business and sport. It explores the ways in which diversity can be suppressed by dominant forces. It focuses on the organizational consequences of making sense and assigning meanings to diversity in sporting organizations, paying particular attention to the different approaches used in Europe and America. It concludes with a discussion on their various successes and the ways in which these approaches can be combined to produce a coherent strategy for dealing with diversity in sporting organizations.

Towards a Social Science of Drugs in Sport Jason Mazanov, 2013-09-13 The debate around the role of drugs in sport is vibrant. There is a wealth of evidence from the hard end of science telling us how drugs work, how drug testing works and how many athletes have fallen foul of the system. The evidence from social science is still building momentum. For example, what makes an athlete use a performance enhancing substance? To win simply fails to explain the drug use behaviour we see among athletes. This book provides a foundation for anyone trying to understand the drugs in sport problem beyond the hard science by looking at the people factor from different perspectives. After building a case for the social science of drugs in sport, it is examined from the ethical, sociological, economic, legal and psychological points of view. The book concludes with a definitive statement about what researchers, policy makers, sports administrators, athletes and fans can do to achieve a social science of drugs in sport that puts people firmly in the centre of the debate. This volume was published as a special issue of *Sport in Society*.

The Balkan Games and Balkan Politics in the Interwar Years 1929 - 1939 Penelope Kissoudi, 2013-10-18 The Balkan Games resulted on the one hand from the growth of modern European sport and the unsatisfactory performances of

the Balkan athletes at national and international level and on the other hand from a desire to bring the Balkan peoples together in peace and concord The Games were initiated in Athens in 1929 and increasingly became an integral part of the political cultural and social life of the area The common global reality is that when an athletic event is staged attempted friendship seldom receives priority In the 1930s however the Balkan Games provided a rare example of an international athletic event bringing antagonistic states together in friendship This consideration of the significance of the Balkan Games as an instrument of political optimism provides clear evidence of the occasional positive influence of sport in politics The work is a case study of interest to political and social scientists and to historians of Europe and sport This book was previously published as a special issue of the International Journal of the History of Sport *Sport and the Environment* Brian Wilson,Brad Millington,2020-07-30 This volume examines sport s relationship with the environment in the context of the ongoing climate crisis Contributors examine how sport is implicated in environmentally damaging activities how decisions are made about how to respond to environmental issues who benefits most and least from these decisions
