The Cultural Landscape & Heritage Paradox Tom Bloemers,Henk Kars,Arnold Van der Valk,2010 The basic problem is to what extent we can know past and mainly invisible landscapes and how we can use this still hidden knowledge for actual sustainable management of landscape s cultural and historical values It has also been acknowledged that heritage management is increasingly about the management of future change rather than simply protection This presents us with a paradox to preserve our historic environment we have to collaborate with those who wish to transform it and in order to apply our expert knowledge we have to make it suitable for policy and society The answer presented by the Protection and Development of the Dutch Archaeological Historical Landscape programme pdl bbo is an integrative landscape approach which applies inter and transdisciplinarity establishing links between archaeological historical heritage and planning and between research and policy
