The Cambridge Economic History of Modern Britain Roderick Floud, Jane Humphries, Paul Johnson, 2014-10-09 A new edition of the leading textbook on the economic history of Britain since industrialization Combining the expertise of more than thirty leading historians and economists Volume 1 tracks Britain's economic history in the period ranging from 1700 to 1870 from industrialisation to global trade and empire Each chapter provides a clear guide to the major controversies in the field and students are shown how to connect historical evidence with economic theory and apply quantitative methods New approaches are proposed to classic issues such as the causes and consequences of industrialisation the role of institutions and the state and the transition from an organic to an inorganic economy as well as introducing new issues such as globalisation convergence and divergence the role of science technology and invention and the growth of consumerism Throughout the volume British experience is set within an international context and its performance benchmarked against its global competitors

The Cambridge Social History of Britain, 1750-1950 F. M. L. Thompson, 1990 Whilst in certain quarters it may be fashionable to suppose that there is no such thing as society historians have had no difficulty in finding their subject The difficulty rather is that the advance has occurred through such an outpouring of research and writing that it is hard for anyone but the specialist to keep up with the literature or grasp the overall picture In these three volumes as is the tradition in Cambridge Histories a team of specialists has assembled the jigsaw of recent monographic research and presented an interpretation of the development of modern British society since 1750 from three complementary perspectives those of regional communities of the working and living environment and of social institutions Each volume is self contained and each contribution thematically defined

contains its own chronology of the period under review Taken as a whole they offer an authoritative and comprehensive view of the manner and method of the shaping of society in the two centuries of unprecedented demographic and economic change

Atlas of British Social and Economic History Since c.1700 Mr Rex Pope,2002-03-11 All students of history use maps This atlas is designed specifically to enhance the understanding of British history since 1700 as well as emphasizing social as well as economic change The contributors are all subject specialists who have taught in higher education institutions and a large proportion of both maps and text is based on their own original research The combination of maps and text is intended to illustrate not only historical developments such as the spread of agriculture or the growth of an integrated transport system but also regional contrasts at points in time The end product offers support for those historians who question the usefulness of thinking in terms of national economic histories

New Perspectives on Welsh Industrial History Louise Miskell,2019-12-15 This volume tells a story of Welsh industrial history different from the one traditionally dominated by the coal and iron communities of Victorian and Edwardian Wales Extending the chronological scope from the early eighteenth to the late twentieth century and encompassing a wider range of industries the contributors combine studies of the internal organisation of workplace and production with outward facing perspectives of Welsh industry in the context of the global economy The volume offers important new insights into the companies the employers the markets and the money behind some of the key sectors of the Welsh economy from coal to copper and from steel to manufacturing and challenges us to reconsider what we think of as constituting industry in Wales

East Meets West - Banking, Commerce and Investment in the Ottoman Empire Monica Pohle Fraser,2016-12-05 Bringing together cultural economic and social historians from across Europe and beyond this volume offers a consideration from a number of perspectives of the principal forces that further integrated the Ottoman Empire and Western Europe during the first century of industrialisation The essays not only review and analyse the commercial financial and monetary factors negative as well as positive that bore upon the region's initial stages of modern transformation but also provide a ready introduction to major aspects of the economy and society of the Ottoman Empire in the nineteenth century Beginning with two chapters providing the context to the development of Ottoman relations with Western Europe up to the second half of the nineteenth century the collection then moves on to explore more specific questions of trade links the impact of improved transportation and communications the development and changing nature of Ottoman finance and banking as well as European investment in Turkey The outcome is a broad ranging consideration of how all these issues played a fundamental role in the final decades of the Ottoman Empire and the emergence of Turkey as a modern state with links to both east and west The essays in this collection derive from the EABFH colloquium held in the Imperial Mint Istanbul in October 1999

Second Stages in Researching Welsh Ancestry John Rowlands,Sheila Rowlands,1999 Anyone who has had any success in researching their Welsh ancestry will know that a grasp of specialized Welsh genealogical methods and sources is only one of several factors that contributed to that success

They will know for example how important it is in Welsh research to have some understanding of the social cultural religious and economic background of the communities in which those ancestors lived This book attempts to broaden that understanding especially for the period prior to 1800 when most researchers begin to experience difficulties In addition it aims to make readers more aware of some little known sources and the special uses that may be applied to the information found in these sources

The Mid-Victorian Generation, 1846-1886 K. Theodore Hoppen, 1998 This the third volume to appear in the New Oxford History of England covers the period from the repeal of the Corn Laws to the dramatic failure of Gladstone's first Home Rule Bill In his magisterial study of the mid Victorian generation Theodore Hoppen identifies three defining themes The first he calls established industrialism the growing acceptance that factory life and manufacturing had come to stay It was during these four decades that the balance of employment shifted irrevocably For the first time in history more people were employed in industry than worked on the land The second concerns the multiple national identities of the constituent parts of the United Kingdom Dr Hoppen's study of the histories of Ireland Scotland Wales and the Empire reveals the existence of a variety of particular and overlapping national traditions flourishing alongside the increasingly influential structure of the unitary state The third defining theme is that of interlocking spheres which the author uses to illuminate the formation of public culture in the period This he argues was generated not by a series of influences operating independently from each other but by a variety of intermeshed political economic scientific literary and artistic developments This original and authoritative book will define these pivotal forty years in British history for the next generation

War and Progress Peter Dewey, 2014-09-11 This is an account of how the daily lives of ordinary peoples were changed profoundly and permanently by these three momentous decades 1914-1945 Often depicted in negative terms Peter Dewey finds a much more positive pattern in the wealth of evidence he lays before us His is a story of economic achievement and the emergence of a new sense of social community in the nation rather than a saga of disenchantment and decline

Elizabeth Hall, 2000 This study starts with the economic history of the Upper Swansea Valley including an account of the provision of the canal tramroads and railways which made possible the extensive exploitation of the mineral resources of the

Hywel E. Roberts, 1991 In a series of 14 chapters this book brings together contemporary research findings on the involvement of word internal structure for the purpose of word reading especially morphological structure Contributors include many leading experts in this research domain People, Places and Passions Russell Davies, 2015-06-15 It takes a different view of the history of Wales examining a panorama of different emotions and experiences laughter happiness fear anger adventure lust loneliness anxiety to give an entertaining and exciting new history to Wales a wide range of sources are used to present the ambitions and anxieties which drove and destroyed Welsh people The book's literary style and the fact that it follows earlier successful studies by the author should ensure an audience Triumph of the South Peter Scott, 2007 This book provides a scholarly but accessible account of British regional development during the twentieth century focusing on the emergence and development of the North South divide Beginning with regional imbalance in the Victorian and Edwardian economies the book goes on to discuss the effects on the First World War and its aftermath which created a discernible split between the depressed North and West and the relatively prosperous South Attention is also paid to the impact of government policy on regional development during the interwar years and beyond and factors affecting industrial location in this period **The Pity of War** Niall Ferguson, 2008-08-05 From a bestselling historian a daringly revisionist history of World War I The Pity of War makes a simple and provocative argument the human atrocity known as the Great War was entirely England's fault According to Niall Ferguson England entered into war based on naive assumptions of German aims thereby transforming a Continental conflict into a world war which it then badly mishandled necessitating American involvement The war was not inevitable Ferguson argues but rather was the result of the mistaken decisions of individuals who would later claim to have been in the grip of huge impersonal forces That the war was wicked horrific and inhuman is memorialized in part by the poetry of men like Wilfred Owen and Siegfried Sassoon but also by cold statistics Indeed more British soldiers were killed in the first day of the Battle of the Somme than Americans in the Vietnam War And yet as Ferguson writes while the war itself was a disastrous

folly the great majority of men who fought it did so with little reluctance and with some enthusiasm For anyone wanting to understand why wars are fought why men are willing to fight them and why the world is as it is today there is no sharper or more stimulating guide than Niall Ferguson s *The Pity of War* British Economic and Social History R. C.

Richardson, William Henry Chaloner, 1996 A History of GKN Edgar Jones, 1990-11-19 This history of GKN formerly Guest Keen Nettlefolds shows the dramatic changes which occurred to the group in the 25 years following the end of the first world war It describes the merger with the steelmakers John Lysaght the development by acquisition of its fastener interests and the extension of the business into Australia and India With the rise of H Seymour Berry Lord Buckland and Sir David Llewellyn to the highest ranks of its management a new strategy for growth was implemented the takeover of major collieries in South Wales and associated sales and marketing companies Undertaken in the harsh competitive twenties the plan foundered on the slump The thirties saw GKN divest itself of its coal and heavy steel interests to bring the focus back to light engineering in the Midlands A return to sound profits was interrupted by the Second World War which caused disruption as the group was called upon to manufacture munitions and machinery demanded by the armed forces Using internal company records this business history reveals strategic policy decisions demonstrates the sources of income and assesses the strengths of the management and contribution of the workforce
