## **North Korean Paradoxes Circumstances Costs And Consequences Of Korean Unification:**

North Korean Paradoxes Charles Jr. Wolf, Kamiljon T. Akramov, 2005-05-20 Analyzes economic political and security issues associated with Korean unification Considers how the North Korean system might unravel leading to possible unification and what the capital costs of unification would be under differing circumstances and assumptions Compares points of relevance and nonrelevance between the German experience with unification in the 1990s and what might occur in Korea

North Korean Paradoxes. Circumstances, Costs, and Consequences of Korean Unification, 2005 This monograph focusing on North Korea analyzes some of the economic political and security issues associated with Korean unification The analysis considers the numerous puzzles and paradoxes that obscure the North Korean system especially that system's structure and functioning as a rent seeking economy We also consider how the system might unravel leading to the possibility of reunification and what the attendant capital costs of reunification would be under differing circumstances and assumptions Our estimates of these costs are then compared with those by other institutions and analysts Consideration is given to points of relevance and nonrelevance between the German experience with unification in the 1990s and that which might impend in Korea Finally the monograph concludes by briefly assessing the problems that a reunified Korea would confront relating to possession of weapons of mass destruction its relations with neighboring countries especially China and its alliance with the United States

Korean Unification Jacques L. Fuqua, 2011-10 One day one nation on the Korean Peninsula

Transitional Justice in Unified Korea Ruti G. Teitel, Baek Buhm-Suk, 2016-04-30 How will a unified Korea respond to the Kim regime's crimes against humanity Will North and South Korea be able to reconcile their differences after being divided for so long Will China the US Japan Russia and U N drive the process This book examines the challenges associated with Korean unification and human rights accountability

**The Collapse of North Korea** Tara O, 2016-07-25 This book highlights the increasing risk of North Korea's collapse and considers the necessary actions that would enable the neighboring powers to prepare for such an event North Korea's deteriorating economic conditions its reliance on external assistance and the degree of information penetration all provide hints of its collapse Whether the chance is high or low the collapse of North Korea and subsequent Korean unification would drastically alter the geostrategic landscape and profoundly affect the national interests of the regional powers South Korea China the United States Japan and Russia The most desirable scenario for a post unification Korean Peninsula is a successfully developed and integrated non nuclear Korea acting as a responsible regional and world stakeholder This work considers the major challenges expected after a North Korean collapse including the control of nuclear weapons disorder in the immediate aftermath of collapse and economic and social integration The author then outlines how regional powers need to prepare to handle these challenges in order to minimize suffering and to set the foundation for long term development and regional stability

Unveiling the North Korean Economy Byung-Yeon Kim, 2017-05-27 North Korea is one of the most closed and secretive societies in the world Despite a high level of interest

from the outside world we have very little detailed information about how the country functions economically In this valuable book for both the academic and policy making circles Byung Yeon Kim offers the most comprehensive and systematic analysis of the present day North Korean economy in the context of economic systems and transition economics It addresses what is really happening in the North Korean economy why it has previously failed and how the country can make the transition to a market economy It takes advantage not only of carefully reconstructed macro data but also rich new data at the micro level such as quantitative surveys of North Korean refugees settled in South Korea and the surveys of Chinese companies that interact heavily with North Korea

*Towards a Northeast Asian Security Community* Bernhard Seliger, Werner Pascha, 2011-06-25 The Northeast Asian security environment is closely linked to Korea's growth perspectives for the future The spectacular rise of the South Korean economy in the past half century also known as Miracle on the Han River has been duly highlighted as one of the most successful cases of economic development worldwide However among the factors curbing South Korea's growth perspectives has been from the very beginning of its rise the coexistence of the difficult neighbour to the North Democratic People's Republic of Korea While in the cold war this coexistence has been taken as inevitable after the end of the cold war there were hopes to overcome this obstacle to further growth either through collapse or enhanced cooperation with the North neither of which became reality North Korea's unprecedented aggressiveness and development of long range ballistic missiles and nuclear devices made this threat truly an international question with multilateral talks coming into existence as ad hoc measures to cope with the nuclear crisis It was then that the idea of a Northeast Asian Security Community was born The contributions in this book discuss how a peaceful solution of the security problems could not only enhance stability of Korea's economy and reduce the defense burden considerably the so called peace dividend but would facilitate regional investments safer and regional solutions for common economic problems When discussing the possibilities of a security framework or in an institutionalized form security community in Northeast Asia the authors in this volume are realistic as to not fall into the trap of wishful thinking which so often has characterized approaches to North Korea resulting in disappointment The past two years again saw the rising of tensions in Northeast Asia and the masterful way in which even an impoverished and isolated country can play its cards While it seems a new ice age between the two Koreas is possible nevertheless and maybe even more than ever the search for a stable security framework for Northeast Asia as a precondition for peaceful economic cooperation and development will go on The chapters in this volume contribute to the ongoing debate to secure peace and development in Northeast Asia making this book of interest to both academics and policy makers alike

**Modernizing the North Korean System** Charles Wolf (Jr.), Norman D. Levin, 2008 Six institutions in five countries that have key interests in North Korea's future undertook a collaborative effort to determine ways in which the North Korean system could move toward modernization The effort produced illustrative plans a consensus plan and a tool kit for constructing alternative plans for stimulating the modernization of the North Korean system

**Possibility of a North Korean Collapse** Bruce W. Bennett, 2013-09-19 A North Korean government collapse would have serious consequences including a humanitarian disaster and civil war The Republic of Korea and the United States can help mitigate the consequences seeking unification by being prepared to deliver humanitarian aid in the North stop conflict demilitarize the North Korean military over time secure and eliminate North Korean weapons of mass destruction and manage Chinese intervention

The Asia-Pacific Century Adam Lowther, 2013 When Secretary of State Hillary Clinton published America's Pacific Century in Foreign Policy magazine in November 2011 the administration was clearly indicating to domestic and international audiences that the United States is beginning a pivot toward the Asia Pacific Clinton's article served as a spark for renewed interest in the nation's Asia

Korea Victor Cha, Ramon Pacheco Pardo, 2023-06-27 A major new history of North and South Korea from the late nineteenth century to the present day Cha and Pacheco Pardo have years of expertise in Korean international relations A crisp and balanced account Christopher Harding The Telegraph Korea has a long riveting history it is also a divided nation South Korea is a vibrant democracy the tenth largest economy and is home to a world renowned culture North Korea is ruled by the most authoritarian regime in the world a poor country in a rich region and is best known for the cult of personality surrounding the ruling Kim family But both Koreas share a unique common history Victor Cha and Ramon Pacheco Pardo draw on decades of research to explore the history of modern Korea from the late nineteenth century Japanese occupation and Cold War division to the present day A small country caught amongst the world's largest powers including China Japan Russia and the United States Korea's fate has been closely connected to its geography and the strength of its leadership and society This comprehensive history sheds light on the evolving identities of the two Koreas explaining the sharp differences between North and South and prospects for unification

*North Korean Reform* Robert L. Carlin, Joel Wit, 2013-03-07 In the past foreign policy and security concerns have trumped any efforts to reform the North Korean economy Today the linkage between security and economic policies is being reconsidered as part of a larger debate in the North Korean leadership that has already transformed the country in fundamental ways Despite renewed tensions with the United States North Korea has begun to implement important economic reforms Moreover underneath the cover of the ever present military first slogan in the controlled media a debate is taking place between reformers and conservatives over whether Pyongyang's bloated military industrial complex should be scaled back to help ensure the success of economic reform Not only do these developments reflect strong political forces in the North Korean leadership that support reform but they could also have profound implications for the future of Pyongyang's national security policy North Korea may decide that it will need a more favourable external security environment in order to secure greater access to international economic and financial assistance for its reform measures and ultimately downsizing its military Pyongyang could launch a new policy of engagement that would include greater flexibility in the Beijing Six Party Talks A second scenario is continued internal struggle over reform that could lead to an inability to act decisively on key security and

foreign policy issues including at the nuclear talks Finally progress in reform may paradoxically strengthen conservatives leading to hopes in Pyongyang that it can improve the economy while simultaneously maintaining a large powerful military Whether Washington can do anything at this point to influence directly the emerging debate in Pyongyang is unclear but a renewed policy of engagement on its part could enhance the chances of success for North Korean advocates of reform

*Orderly Korea Unification* Howard Jisoo Ryu, 2007-07-12 The proposed governmental structure of the unified state is historically viable immediately applicable and financially attractive This new scenario for Korean unification has three basic elements among others First the entire systems of the current democracy in South Korea will be applied across the entire Korean peninsula Secondly the structure will guarantee future securities of North Korean leaders and their descendants Thirdly it will obtain the Stability of the East Asian region through the United Nations After the unification all citizens of the new state will enjoy the freedom and liberty currently enjoyed by the citizens of South Korea The division of the Korean peninsula was an unfortunate product of the Cold War created by two superpowers Particularly after the collapse of the Soviet Blocs in the 1990s North Korea became isolated and unable to make any advance in its economic front The result is that the survival of its regime as a state is currently at risk Moreover South Korea possesses more than 30 times the economic strength in terms of GDP and twice the population of North Korea It has a vast technological lead and has stolen away the North's allies as well as the friendship of most other states The economic miracle of the South was achievable under the protection of the US defense system whereas the dismal economy of the North is a result of the continual presence of the US forces in the South and the collapse of the Soviet Blocs In light of these economic developments now is the time for the government of South Korea to make a bold move towards an orderly Korean unification with the guarantee of stability in East Asia through the United Nations It is regrettable to say that the Government of North Korea must give up the idea of unifying the Korean peninsula on its own terms and accept the proposed unification mode in exchange for the future securities of the North Korean leaders and their descendants Then most important is the end of the human rights abuses by the North Korean regime Also equally importantly this new unification scenario turns out to save more than 100 Billion in unification capital cost in comparison with other known unification scenarios Today the two Koreas have become at best a peripheral security interest to America while economic relations have been warming up for mutual prosperity among the powerful neighboring countries China Japan Russia and the US Their governments should unselfishly support this new unification endeavor of the Koreans along with the guarantee of stability in East Asia through the United Nations The proposed governmental structure of the new unified state is historically viable immediately applicable and financially attractive Thus the Korea unification outlined in this proposal will provide peace prosperity and no further nuclear threat by the North Korean regime to all nations in the world

**The Asia-Pacific Century** Adam B. Lowther, 2013-08-28 When Secretary of State Hillary Clinton published America's Pacific Century in Foreign Policy magazine in November 2011 the

administration was clearly indicating to domestic and international audiences that the United States is beginning a pivot toward the Asia Pacific Clinton's article served as a spark for renewed interest in the nation's Asia. *Prospects from Korean Reunification* David Coghlan, 2008 Regional and Urban Policy and Planning on the Korean Peninsula Harry Ward Richardson, Chang-Hee Christine Bae, 2011-01-01 The potential for reunification of the two Koreas whether in the short or long term argues for a comprehensive look at policy and planning issues that encompass the peninsula as a whole This book deals with spatial policy issues in both South and North Korea in a broad and non political way Part one deals with South Korea examining cultural changes the capital city of Seoul Greenbelt policy the balanced national regional development strategy and the new mega regional approach Part two delves into aspects of development in North Korea such as the limitations of national statistics the marketization of the economy integration with the rest of North East Asia and the need for a spatial infrastructure strategy Part three examines the case for reunification in the interests of both the South and North It argues that a transitional approach would be less costly and less risky than sudden reunification primarily via an early strategy of shifting more capital to the North and later by moderating migration flows to the South The book also examines whether the capital should remain in Seoul or be relocated elsewhere should reunification occur Professors students and public policy officials in the fields of Asian studies regional economics and planning urban studies and political science and any reader interested in the future of Korea will find this book very current and enlightening **Handbook of Defence Politics** Isaiah "Ike" Wilson III, James J.F. Forrest, 2011-03-28 Issues of defence politics and policy have long been at the forefront of political agendas and defining of international affairs However the dramatic changes to the global system that have taken place since the end of the Cold War and particularly since the terror attacks on the USA on 11 September 2001 have amplified the world's attention toward political and policy issues of national regional and global security The focus of this volume is on examining the fundamental causes of and defence policy responses to this new post 9 11 security environment Edited by Isaiah Ike Wilson III and James J F Forest of the US Military Academy West Point USA this volume is international in scope with pieces written by experts in the field offering a collection of up to date and balanced insights on key contemporary issues of concern to defence policymakers The book will be an invaluable reference tool for academics and students researchers in international relations policymakers media professionals and government officials One Korea Shepherd Iverson, 2013-09-17 Peaceful Korean reunification would end a growing nuclear threat ease regional and geopolitical tensions and bring about significant economic growth and cooperation in resource rich Northeast Asia The central assumption of this book is that peace and reunification can be achieved by changing the underlying incentive structure for all North Koreans and by offering its leaders a safe honorable and profitable way out of a deteriorating situation Economic stagnation and increased awareness of the better life beyond their borders has led to growing dissent inside North Korea while dynastic transition and the rise of a new generation of leaders may have opened a new opportunity for political

acquiescence The book outlines a Korean Peace Fund strategy that provides for global elites corporations and governments to raise 300 billion to give to North Korean power elites military officers and common people if they agree to reunify under South Korean political leadership Kim Jong un would likely be hailed worldwide for participating in a win win face saving resolution *Red Rogue* Bruce E. Bechtol, Jr., Bruce E. Bechtol, 2007 A unique analysis of the evolving North Korean threat and the challenges facing the South Korea U S alliance Global Business and the Terrorist Threat Harry Ward Richardson, Peter Gordon, James E.
