others may fade away Accordingly the study of seaweeds biodiversity in the Egyptian marine waters is of great concern globally and constitutes an important element of global change research The present book entitled Biodiversity of Seaweeds in the Egyptian Marine Waters summarizes our current understanding of the biodiversity of seaweeds in the Egyptian marine waters It is a timely publication based wholly on primary data which were collected through extensive field studies conducted over the years covering the marine Egyptian waters and culminate the efforts of the Egyptian phycologists The book contains high quality images of some species in their existing habitats This book gains critical importance from the fact that the Egyptian marine environment is witnessing rapid development which will no doubt have a bearing on the coastal environment and the baseline data on seaweed biodiversity would be useful to understand changes that may arise from physical changes in the environment as also pollution load and climate change
