North Korea and Security Cooperation in Northeast Asia Professor Tae-Hwan Kwak, Professor Seung-Ho Joo, 2014-03-28 This book explores the domestic factors of the two Koreas and the four major powers that influence their security policies towards North Korea and Northeast Asia This well thought out and consistently analysed volume has huge potential to frame the conversation on Northeast Asian relations in the coming years

Korea Robert Dujarric, Kim Changsu, Elizabeth A. Stanley, Hudson Institute, 1998 Korea has long been at the center of East Asian politics and the strength of the South Korean economy ensures that it will only become more important in the coming years With North Korea's

attempts to develop nuclear weapons and its ominous behavior toward its neighbor to the south the divided country is a serious security concern Yet there is a strong desire in both countries for a unified Korea This book takes a clear eyed look at the implications of Korean reunification for Northeast Asia and U S security policy in the region The authors note that Korean reunification or some sort of Korean peace treaty is likely to occur in the coming decade possibly very soon This significant change in Korean relations will create a radically new situation in the region Korean unification will open up the issues of a continued U S military presence in Korea and possibly in Japan as well and of relations between Korea and its Asian neighbors particularly China and Japan and Russia Korean unification they argue will pose severe challenges for Japan and China in particular The contributors argue that a continued American military deployment in Korea and in Japan will be necessary after unification to maintain peace and stability in Northeast Asia They provide a detailed analysis of the political economic social and cultural implications of Korean unification and offer insights into how U S policy can help ensure continued peace in the region

North Korea and Northeast Asian Regional Security Simon Xu-Hui Shen,2016-04-14

With its unstable and intermittent nuclear weapon project and the recent leadership succession issue Democratic People s Republic of Korea DPRK has been a source of insecurity for the past decade in this region in addition to the delicate international relations among the powerful China United States Japan and Russia The essence of DPRK issue lies in the instability and uncertainty of nuclear development that even the slightest miscalculation by any one power could disturb the sensitive balance of relationships creating a butterfly effect with a catastrophic result Drawing on various perspectives on the interaction over DPRK and other regional powers this volume seeks to explore the role of DPRK in Northeast Asia and its implication to regional security as a whole The volume does not confirm a particular position over DPRK s nuclear showdown rather it invites scholars to provide assessments from the viewpoints of neighbouring powers in order to present a more complete understanding of the leading issue in Northeast Asia The volume will serve as an invaluable resource for policymakers students and scholars of North Korean politics and international relations This book was published as a special issue of the Journal of Comparative Asian Development

Kim,2007-01-24 Examining the prospects for building a regional community in Northeast Asia this book considers the foreign policies of the individual states as well as the impact of domestic politics on the regionalist agenda It outlines the emerging Northeast Asian community and the domestic requisites for its evolution and realization and puts it in context by comparing the emerging community with Southeast Asia The book investigates the attitudes of the key powers including China Japan South Korea North Korea Russia and the US towards the ideal of greater regional cooperation with particular emphasis on the implications of domestic factors in each country for regional dynamics It explores the North Korean nuclear crisis the continuing tensions over the Taiwan Straits the impact of Sino Japanese rivalry the shift in stance of South Korea towards

North Korea since 2001 and its implications for its relationship with the US and Putin's attempts to strengthen Russian influence in the region. It concludes by identifying the foremost dangers that risk obstructing greater regional cooperation, particularly the China-Japan rivalry, nationalist sentiments, territorial disputes, and energy competition. North Korea and Northeast Asian Regional Security Simon Xu-Hui Shen, 2016-04-14. With its unstable and intermittent nuclear weapon project and the recent leadership succession issue, the Democratic People's Republic of Korea (DPRK) has been a source of insecurity for the past decade in this region, in addition to the delicate international relations among the powerful China, United States, Japan, and Russia. The essence of the DPRK issue lies in the instability and uncertainty of nuclear development that even the slightest miscalculation by any one power could disturb the sensitive balance of relationships, creating a butterfly effect with a catastrophic result. Drawing on various perspectives on the interaction over DPRK and other regional powers, this volume seeks to explore the role of DPRK in Northeast Asia and its implication to regional security as a whole. The volume does not confirm a particular position over DPRK's nuclear showdown; rather, it invites scholars to provide assessments from the viewpoints of neighbouring powers in order to present a more complete understanding of the leading issue in Northeast Asia. The volume will serve as an invaluable resource for policymakers, students, and scholars of North Korean politics and international relations. This book was published as a special issue of the *Journal of Comparative Asian Development*.

Nuclear Proliferation in Northeast Asia A. O'Neil, 2007-10-01. To what extent does the failing strategy of nonproliferation pose serious challenges for Northeast Asia's security environment? Are there alternative strategies for managing nuclear weapons in the region? Should the presence of nuclear weapons in Northeast Asia necessarily be seen in exclusively negative terms, as many experts believe? *Collaborative Regional Development in Northeast Asia* Won Bae Kim, Yue-man Yeung, Sang-Chul Choe, 2011-07-18. Against the background of accelerating globalization and growing economic interdependence in Northeast Asia over the past two decades, including the recent global economic crisis, this book sets out to examine the status and prospect of cross-border cooperation. It has synthesized diverse strands of discussion and different country perspectives to highlight the challenges and opportunities of collaborative regional development in Northeast Asia. Distinct from previous studies, this book attempts to capture international, national, and local viewpoints in regional development. Practical experience across countries has been analyzed and consolidated to form the basis of a policy agenda for cross-border cooperation. Combining an intimate knowledge of the region and different disciplinary perspectives, this book offers a wealth of information, statistical and illustrative materials, and analyses across topics and countries of the region. Editors include Won Bae Kim, Research Advisor of the Gyeonggi Research Institute and former Senior Fellow at the Korean Research Institute for Human Settlements; Yue-man Yeung, Emeritus Professor of Geography and Honorary Fellow of The Chinese University of Hong Kong; and Sang-Chul Choe, former Chairman of the Presidential Committee on Regional Development in South Korea and Professor Emeritus of Seoul National University. **North Korea's Foreign Policy** Scott

A. Snyder, Kyung-Ae Park, 2022-10-25 Since Kim Jong un s assumption of power in December 2011 North Korea has undergone expanded nuclear development political isolation and economic stagnation Kim s early prioritization of the byungjin policy simultaneous economic and military or nuclear development highlighted his goal of transforming North Korea s domestic economic circumstances and strengthening its position in the world as a nuclear state The central dilemma shaping Kim Jong un s foreign policy throughout his first decade in power revolves around ensuring North Korea s prosperity and security while sustaining the political isolation and control necessary for regime survival In order to evaluate North Korea s foreign policy under Kim this volume will examine the impact of domestic factors that have influenced the formation and implementation of Kim s foreign policy Kim s distinctive use of summitry and effectiveness of such meetings as an instrument by which to attain foreign policy goals and the impact of international responses to North Korea s pursuit of nuclear capabilities on North Korea s foreign policy **A Sharper Choice on North Korea** Adam Mount, Mike Mullen, Senator Sam Nunn, 2016-09-16 A Council on Foreign Relations Task Force recommends revising U S policy toward North Korea to break the cycle of North Korean provocation and promote stability in Northeast Asia **The Korean Pivot and the Return of Great Power Politics in Northeast Asia** Sungtae Jacky Park, 2015-11-23 *The North Korean Nuclear Test and the Future of Northeast Asia* , 2006 **Security Cooperation in Northeast Asia** T.J. Pempel, Chung-Min Lee, 2012-06-14 Defining and conceptualizing Northeast Asia s security complex poses unique quandaries The security architecture in Northeast Asia to date has been predominately U S dominated bilateral alliances weak institutional structures and the current Six Party Talks dealing with the North Korean nuclear issue There has been a distinct lack of desire among regional countries as well as the U S to follow in the footsteps of Europe with its robust set of multilateral institutions However since the late 1990s there has been burgeoning interest among regional states towards forming new multilateral institutions as well as reforming and revitalizing existing mechanisms Much of this effort has been in the economic and political arenas with the creation of bodies such as the East Asian Summit but there have also been important initiatives in the security sphere This book offers detailed examinations about how this potentially tense region of the world is redefining certain longstanding national interests and shows how this shift is the result of changing power relations the desire to protect hard won economic gains as well as growing trust in new processes designed to foster regional cooperation over regional conflict Presenting new and timely research on topics that are vital to the security future of one of the world s most important geographical regions this book will be of great value to students and scholars of Asian politics regionalism international politics and security studies **The Making of Northeast Asia** Kent Calder, Min Ye, 2010-08-16 This book offers a detailed analysis of the domestic politics of regionalism in the three major nations of Northeast Asia China Japan and Korea as well as in the most important external actor the United States Visual Politics and North Korea David Shim, 2013-10-15 In the realm of international relations there are seemingly few states like North Korea Whether it is the

country's human rights situation its precarious everyday life or its so called foreign policy of coercion and nuclear brinkmanship no matter what this pariah nation says and does it affects the state and stability of regional and global politics But what do we know about North Korea and how do we come to know it This book argues that visual imagery plays a decisive role in this operation By discussing two exemplary areas everyday photography and satellite imagery the book takes into account the role of images in the way that particular issues related to North Korea are understood in contemporary geopolitics Images work They do something by evoking a particular perspective of what is shown in them allowing only specific ways of seeing and knowing In this sense images are deeply political Individual methodological usages in the book can provide a procedural basis from which to start or rethink further studies on visibility both in IR and beyond It also opens an innovative path for future studies on East Asia making the book attractive to a range of specialists and thus holding an appeal beyond the boundaries of a single discipline

Sino-Indian and Sino-South Korean Relations P. R. Chari, Vyjayanti Raghavan, 2015-08-12 This book addresses the compulsions that underlie the China's relations with India and South Korea both increasingly mutually dependent on China for markets trade investments technology tourism etc It inquires into two sets of regional relationships with China being the common linking factor While examining the generational change in the leadership of China India and South Korea this study will be a significant addition to the evolving sphere of comparative regional relations

Towards a Northeast Asian Security Community Bernhard Seliger, Werner Pascha, 2011-06-25 The Northeast Asian security environment is closely linked to Korea's growth perspectives for the future The spectacular rise of the South Korean economy in the past half century also known as Miracle on the Han River has been duly highlighted as one of the most successful cases of economic development worldwide However among the factors curbing South Korea's growth perspectives has been from the very beginning of its rise the coexistence of the difficult neighbour to the North Democratic People's Republic of Korea While in the cold war this coexistence has been taken as inevitable after the end of the cold war there were hopes to overcome this obstacle to further growth either through collapse or enhanced cooperation with the North neither of which became reality North Korea's unprecedented aggressiveness and development of long range ballistic missiles and nuclear devices made this threat truly an international question with multilateral talks coming into existence as ad hoc measures to cope with the nuclear crisis It was then that the idea of a Northeast Asian Security Community was born The contributions in this book discuss how a peaceful solution of the security problems could not only enhance stability of Korea's economy and reduce the defense burden considerably the so called peace dividend but would facilitate regional investments safer and regional solutions for common economic problems When discussing the possibilities of a security framework or in an institutionalized form security community in Northeast Asia the authors in this volume are realistic as to not fall into the trap of wishful thinking which so often has characterized approaches to North Korea resulting in disappointment The past two years again saw the rising of tensions in Northeast Asia and the masterful way in which even an

impoverished and isolated country can play its cards While it seems a new ice age between the two Koreas is possible nevertheless and maybe even more than ever the search for a stable security framework for Northeast Asia as a precondition for peaceful economic cooperation and development will go on The chapters in this volume contribute to the ongoing debate to secure peace and development in Northeast Asia making this book of interest to both academics and policy makers alike

Dismantling North Korea's Nuclear Weapons Programs David J. Bishop, 2005 This study examines the choices available to the United States for dismantling North Korea's nuclear weapons programs The options range from doing nothing to executing policies of engagement containment or preemption Each option has advantages and disadvantages and there are numerous factors influencing the problem The major factors include U S national interests the role of China the ROK U S alliance the difficult nature of North Korea and the U S war on terror Engagement is less risky in the short term because it reduces the risks of miscalculation and escalation by preventing the conditions that support North Korea seeing war as a rational act However it is risky in the long term because it allows North Korean nuclear weapons development to proceed unchecked This could lead to proliferation to terrorists and rogue states Containment's main advantage is that it takes a direct path to solving the problem Its major disadvantage is that it could cause North Korea a failing state to view war as a rational act Containment also is not supported by friends and allies in the region Preemption is the most direct method to ensure elimination of North Korea's nuclear weapons However the risks associated with this option could lead to catastrophic loss of life and devastation and ultimately to loss of U S influence in the region The optimal course of action is not one policy in particular but a combination of engagement and containment Furthermore preemptive action will invite foreign policy disaster for the U S and should only be used as a last resort Specific policy recommendations to improve implementation of a hybrid policy of engagement and containment include strengthening the ROK U S alliance supplementing multilateral talks with bilateral talks offering a formal security guarantee to North Korea broadening the Proliferation Security Initiative to include China and improving national intelligence capabilities If preemption must be used national leaders must know what conditions would trigger the decision and they must prepare in advance the necessary protocol for warning and informing friends allies and other concerned parties
