Politics Across the Hudson Philip Mark Plotch, 2018-06-20 Winner of the 2015 American Planning Association New York Metro Chapter Journalism Award The State of New York is now building one of the world's longest widest and most expensive bridges the new Tappan Zee Bridge stretching more than three miles across the Hudson River approximately thirteen miles north of New York City In *Politics Across the Hudson* urban planner Philip Plotch offers a behind the scenes look at three decades of contentious planning and politics centered around this bridge recently renamed for Governor Mario M Cuomo the state's governor from 1983 to 1994 He reveals valuable lessons for those trying to tackle complex public policies while also confirming our worst fears about government dysfunction Drawing on his extensive experience planning megaprojects interviews with more than a hundred key figures including governors agency heads engineers civic advocates and business leaders and extraordinary access to internal government records Plotch tells a compelling story of high stakes battles between powerful players in the public private and civic sectors He reveals how state officials abandoned viable options squandered hundreds of millions of dollars forfeited more than three billion dollars in federal funds and missed out on important opportunities Faced with the public's unrealistic expectations no one could identify a practical solution to a vexing problem a dilemma that led three governors to study various alternatives rather than disappoint key constituencies This revised and updated edition includes a new epilogue and more photographs and continues where Robert Caro's *The Power Broker* left off and illuminates the power struggles involved in building New York's first major new bridge since the Robert Moses era Plotch describes how one governor Andrew Cuomo shrewdly overcame the seemingly insurmountable obstacles of onerous environmental regulations vehement community opposition insufficient funding interagency battles and overly optimistic expectations

Wines of Eastern North America Hudson Cattell, 2013-12-24 In 1975 there were 125 wineries in eastern North America By 2013 there were more than 2,400 How and

why the eastern United States and Canada became a major wine region of the world is the subject of this history Unlike winemakers in California with its Mediterranean climate the pioneers who founded the industry after Prohibition 1933 in the United States and 1927 in Ontario had to overcome natural obstacles such as subzero cold in winter and high humidity in the summer that favored diseases devastating to grapevines Enologists and viticulturists at Eastern research stations began to find grapevine varieties that could survive in the East and make world class wines These pioneers were followed by an increasing number of dedicated growers and winemakers who fought in each of their states to get laws dating back to Prohibition changed so that an industry could begin Hudson Cattell a leading authority on the wines of the East in this book presents a comprehensive history of the growth of the industry from Prohibition to today He draws on extensive archival research and his more than thirty five years as a wine journalist specializing in the grape and wine industry of the wines of eastern North America The second section of the book adds detail to the history in the form of multiple appendixes that can be referred to time and again Included here is information on the origin of grapes used for wine in the East the crosses used in developing the French hybrids and other varieties how the grapes were named and the types of wines made in the East and when Cattell also provides a state by state history of the earliest wineries that led the way

Knowing Sandy
Appleyard,2020-04-19 Doctors can t diagnose her son Until she finds one that follows his heart for the answer Born in a small town in Arkansas Stacey Bailey never dreams of falling in love with big New York newscaster Larry Keenan When their son Jet is born they learn quickly that he isn t a cookie cutter child Suddenly Larry begins working odd hours and there is palpable detachment in the marriage When Larry is killed covering a dangerous news story Stacey is left to raise Jet alone After visiting various doctors Stacey realizes that there is no clear answer as to why Jet has specific medical issues While he responds in a way that points to Autism his other responses are inconsistent with the predisposition Doctors are stumped yet Stacey is left dealing with a child who can t lead a normal life which means that she can t either Jack a colleague who once idolized Larry is hungry for a story and much more With a type A personality there are no lengths that Jack won t reach to garner more time in front of the camera By stalking Stacey Jack strives to probe into Jet s unnatural and in his mind newsworthy qualities It seems Jack is looking to be Larry s replacement by exploiting his only surviving son A family emergency forces Stacey to return to Arkansas There is a small comfort in leaving her troubles in the Big Apple until she realizes that one has followed her When Jet s problems worsen it leads to a tailspin of angst in the hospital Days later following tragedy in the town Dr Baker helps uncover the route of Jet s problems Unknown sources witness the discovery and suddenly the world becomes aware of the boy from Arkansas who has an ability that nobody else on Earth has A unique never done before story that will warm your heart and make you believe in miracles and magic With a cross between The Sixth Sense and A Beautiful Mind Knowing will have you laughing crying and rooting for the main characters This is the perfect complement to She Only Speaks to Butterflies but the books in this series can be enjoyed in any order Pick up your copy

Modelling Machine Emotions for Realizing Intelligence Toyooki Nishida, Colette Faucher, 2010-06-21 Emotion connects the thought to the body which is a magnificent biological vice for sensing and affecting the world The thought controls the body through emotions The body affects the thought through emotions Through this mechanism the thought allows the agent to behave intelligently in the complex world filled with a huge amount of dynamic information The emotion maps a flux of information into a space which the agent is familiar with enabling her him to associate ongoing events with past experiences which help to reduce complexity by providing with a nominal solution Recent findings in brain science suggest that mirror neurons map visual signals into motor signals for the body This mechanism might permit one to experience the emotion of the other agent just by feeling the motor signals caused by mirror neurons as a result of visual stimuli caused by the other agent's emotional behaviors In particular it might play a significant role in invoking empathy in a social situation It may not be hard to think about what might happen to emotionless machines The emotionless machines may not be able to accumulate experiences to avoid serious failures They may not be able to communicate with the humans in an empathetic way
