effective way to build international cooperation If each national population reflects on the values of their national identity trust and positive perception can increase between countries This idea is consistent with the theoretical foundation that those who have a clear secure and content sense of self in turn can be more open evenhanded and less defensive toward others In addition this reduced defensiveness also enhances guilt admission by past inflictors of conflict and colonialism Eunbin Chung borrows the social psychological theory of self affirmation and applies it to an international context to argue that affirmation of a national identity or reflecting on what it means to be part of one s country can increase trust guilt recognition and positive perception between countries
