Northern Farm A Glorious Year On A Small Maine Farm:

The Northern Farm Henry Beston, 1994-06-15 In the tradition of his well loved *The Outermost House* Henry Beston's *Northern Farm* captures the elusive magic of a year on a Kennebec farm in truly beautiful prose Kirkus Reviews Among the blue white shadows and graceful curves of freshly fallen snow the first rains of spring and the quiet green of an early summer morning Beston brings the reader into an inescapable alliance with the natural world He translates the philosophy of the Maine farmer into terms as applicable in Manhattan as on the Kennebec One of the great classics of American nature writing *Northern Farm* is inspiring reading and ranks as one of Beston's most memorable and lyrical works *Northern Farm* Henry Beston, 1994

Northern Farm Henry Beston, 1948 The record of a year on the author's Maine farm from one winter through the following fall *Northern Farm* Henry Beston, 2013-05-17 In the tradition of his well loved *The Outermost House* Henry Beston's *Northern Farm* captures the elusive magic of a year on a Kennebec farm in truly beautiful prose Kirkus Reviews Among the blue white shadows and graceful curves of freshly fallen snow the first rains of spring and the quiet green of an early summer morning Beston brings the reader into an inescapable alliance with the natural world He translates the philosophy of the Maine farmer into terms as applicable in Manhattan as on the Kennebec One of the great classics of American nature writing *Northern Farm* is inspiring reading and ranks as one of Beston's most memorable and lyrical works HENRY BESTON 1888-1968 was the author of many books including *The Outermost House* *White Pine and Blue Water* and *The St Lawrence* *Northern Farm* Beston, 1996-12-01 Among the blue white shadows and graceful curves of freshly fallen snow the first rains of spring and the quiet of an early summer morning Beston brings the reader into an inescapable alliance with the natural world He translates the philosophy of the Maine farmer into terms as applicable in Manhattan as on the Kennebec *Northern Farm* is among the great classics of American nature writing *The Truth of Ecology* Dana Phillips, 2003 A wide ranging appraisal of environmental thought It explores such topics as the history of ecology radical science studies and ecology the need for greater theoretical sophistication in ecocriticism the dubious legacy of Thoreau and the contradictions of contemporary nature writing *Sensory Worlds in Early America* Peter Charles Hoffer, 2003-10-10 Presents a sensory history of early North America this text offers an understanding of the role that sight sound smell taste and touch played in shaping the lives of Europeans Indians and Africans in the New World It explores the impact of sensuous experiences on human thought and action *Natural States* Richard W. Judd, 2010-09-30 Richard Judd and Christopher Beach define the environmental imagination as the attempt to secure a sense of freedom permanence and authenticity through communion with nature The desire for this connection is based on ideals about nature wilderness and the livable landscape that are personal variable and often contradictory Judd and Beach are interested in the public expression of these ideals in post World War II environmental politics Arguing that the best way to study the relationship between popular values and politics is through local and regional records they focus on Maine and Oregon states both rich in

natural beauty and environmentalist traditions but distinct in their postwar economic growth Natural States reconstructs the environmental imagination from public commentary legislative records and other documents Judd and Beach trace important divisions within the environmental movement noting that they were balanced by a consistent civic minded vision of environmental goods shared by all They demonstrate how tensions from competing ideals sustained the movement contributed to its successes but also limited its achievements In the process they offer insight into the character of the broader environmental movement as it emerged from the interplay of local state and national politics The study ends in the 1970s when spectacular legislative achievements at the national level were masking a decline in mainstream civic engagement in state politics The authors note the rise of the private ecotopia and the increasing complexity in the way Americans viewed their connections with the natural world Yet today despite wide variations in beliefs and lifestyles a majority of Americans still consider themselves to be environmentalists In Natural States environmental politics emerges less as a conflict between people who do and do not value nature and more as a debate about the way people define and then chose to live with nature In their attempt to place the passion for nature within a changing political and cultural context Judd and Beach shed light on the ways that ideals unify and divide the environmental movement and act as the source of its enduring popularity

Rachel Carson Karen F. Stein, 2013-02-11 Karen F Stein University of Rhode Island Kingston USA Rachel Carson is the twentieth century s most significant environmentalist Her books about the sea blend science and poetry as they invite readers to share her celebration of the ocean s wonders Silent Spring her graphic and compelling expos of the damage caused by the widespread aerial spraying of persistent organic pesticides such as DDT opened our eyes to the interconnectedness of all living beings and the ecological systems we inhabit Carson s work challenges our belief that science and technology can control the natural world asks us to recognize our place in the world around us and inspires us to treat the earth respectfully She calls us to rekindle our sense of wonder at nature s power and beauty and to tread lightly on the earth so that it will continue to sustain us and our descendants This book guides readers on a journey through Carson s life and work considers Carson s legacies and points to some of the continuing challenges to sustainability It provides a listing of resources for reading learning or teaching about the environment about nature writing and about Carson and the crucial issues she addressed

Sum of the Parts Kent C Ryden, 2011-04-01 Proponents of the new regional history understand that regional identities are constructed and contested multifarious and not monolithic that they involve questions of dominance and power and that their nature is inherently political In this lively new book writing in the spirit of these understandings Kent Ryden engagingly examines works of American regional writing to show us how literary partisans of place create and recreate attack and defend argue over and dramatize the meaning and identity of their regions in the pages of their books Cleverly drawing upon mathematical models that complement his ideas and focusing on both classic and contemporary literary regionalists Ryden demonstrates that regionalism in the cultural sense retains a great deal of power as

a framework for literary interpretation For New England he examines such writers as Robert Frost and Hayden Carruth Mary E Wilkins Freeman and Edith Wharton and Carolyn Chute and Russell Banks to demonstrate that today s regionalists inspire closer more democratic readings of life and landscape For the West and South he describes Wallace Stegner s and William Faulkner s use of region to respectively exclude and evade or confront and indict For the Midwest he focuses on C J Hribal William Least Heat Moon Paul Gruchow and others to demonstrate that midwesterners continually construct the past anew from the materials at hand filling the seemingly empty midlands with history and significance Ryden reveals that there are many Wests many New Englands many Souths and many Midwesterns all raising similar issues about the cultural politics of region and place Writing with appealing freshness and a sense of adventure he shows us that place and the stories that emerge from and define place can be a source of subversive energy that blunts the homogenizing force of region inscribing marginal places and people back onto the imaginative surface of the landscape when we read it on a place by place landscape by landscape book by book basis
