Northern Identities:

Northern Identities Neville Kirk, 2017-03-02 Recent years have witnessed an explosion of academic and popular interest in the issue of social identity Yet the subject areas of regional and sub regional identities and historical engagements between the regional the local and the national remain very neglected Seeking to make a contribution towards redressing these areas of neglect and to further advancing our knowledge and understanding of the general issue of social identity this volume of essays offers the reader an exploration of some of the rich and varied historical interpretations of the North and Northernness The focus rests mainly but not exclusively upon the North of England Taken as a whole the essays highlight the contingent fluid and ambiguous nature of Northernness its complex and shifting interplay with feelings of localism and nationalism and the profound if varying influences of class race gender sport tourism music and political and economic structures and concerns upon northern identities This book will hold a general appeal to readers interested in the issue of social identity especially in its regional and local manifestations and engagements It will find a wide readership across the humanities and social sciences It should be compulsory reading for those in New Labour addressing the issue of the North South divide Regional Identities in North-East England, 1300-2000 Adrian Gareth Green, A. J. Pollard, 2007 Is North East England really a coherent and self conscious region The essays collected here address this topical issue from the middle ages to the present day **Thinking Northern** Christoph Ehland, 2007 Thinking Northern offers new approaches to the processes of identity formation which are taking place in the diverse fields of cultural economic and social activity in contemporary Britain The essays collected in this volume discuss the changing physiognomy of Northern England and provide a mosaic of recent thought and new critical thinking about the textures of regional identity in Britain Looking at the historical origin of Northern identities and at current attitudes to them the book explores the way received mental images about the North are re deployed and re contained in the ever changing socio cultural set up of society in Northern England The contributors address representation of Northernness in such diverse fields as the music scene multicultural spaces the heritage industries new architecture the arts literature and film **Changing European Identities** Glynis Marie Breakwell, Evanthia Lyons, 1996 The political structure of Europe has changed and continues to do so The changing allegiances of the populations of Europe pose problems and challenges for social psychological theory Changing European Identities explores these issues using social identity theory and alternative models such as alienation theory and representational identity theory It provides a highly topical and relevant context for exploring the validity and limits of current theories Providing a valuable new perspective on people's reactions to change in Europe it will be useful for advanced scholars in psychology and other social and political sciences **Imperial Japan and National Identities in Asia, 1895-1945** Li Narangoa, R. B. Cribb, 2003 The volume includes chapters on the Japanese imperial campaign in India Tibet Siberia Mongolia Korea Manchukuo China Taiwan Vietnam Thailand the Philippines and Indonesia Northernness,

Northern Culture and Northern Narratives Gabby Riches, Karl Spracklen, Spencer Swain, 2018-10-18 Northernness Northern culture and Northern narratives are a common aspect of popular culture and the North of England like other Northernnesses in Europe is a collection of narratives myths stereotypes and symbols In politics and everyday culture Northern culture is paradoxically a site of resistance against an inauthentic South a source of working class identity and a source of elite marginalisation This book provides a key to theorising about Northernness and a platform to scholars working away at exposing the North in different aspects of culture The aims of this book are twofold to re theorise the North and Northern culture and to highlight the ways in which constructions of Northernness and Northern culture are constituted alongside other gender racial and regional identities The contributions presented here theorise Northernness in relation to space leisure gender race class social realism and everyday embodied practices A main thematic thread that weaves the whole book together is the notion that Northernness and the North is both an imagined discursive construct and an embodied subjectivity thus creating a paradox between the reality of North and its representation This book was originally published as a special issue of the Journal for Cultural Research

Historical Perspectives on Social Identities Alyson Brown, 2009-01-14 This collection of work on the theme of identities was the result of a conference held in the spring of 2005 at Edge Hill under the auspices of The Centre for Liverpool and Merseyside Studies Whilst a significant proportion of the research focused on Liverpool and the North West the theme of identities was sufficiently broad to entice scholars from diverse and varied fields This collection therefore reflects the range of work presented and discussed at the conference and the multi layered and multi faceted nature of identity Contributors to this edited collection examined the concept of identity in Britain through a range of historical perspectives concerning themselves primarily with the later modern period They reflect the extent to which nineteenth and twentieth century British social cultural and political change has given rise to pluralist fragmented and fractured identities and highlight the extent to which class gender religious and institutional frameworks have shifted continually This publication will therefore be of interest to those working in diverse fields but who share an interest in the importance of identity as a decisive cultural social economic and political determinant Questions of identity have centred a good deal of debate in the social sciences especially since the reception of Foucault's work in the English speaking world in the last couple of decades This has often taken a theoretical form Attempts to link theory with analytical practice have been strongest in the field that might be characterised as the politics of identity At any rate this has provided an important instance of theoretical and practical conflict Here the focus of the debate has been around questions of gender nation language economy security and race It has tried to clarify crucial divisions in the analysis of identity as between explanatory and constitutive models and between positivist and post positivist procedures For the most part these intense and extensive concerns have passed by largely unnoticed among historians practising in Britain in the well found but conventional idioms of political and social history What this conference volume seeks to do is to help redress the deficit to

domesticate some of the theoretical and polemical exchanges around identity into a world of practical yet conceptually aware historical work This is a difficult but surely worthwhile task to broach various imaginaries of identity issues of identitarian politics and questions of identity formation on a series of relatively familiar historical contexts Of course no selection of subjects for practical research in this way can be exhaustive The group of essays offered here is sufficiently wide and occasionally gratifyingly unexpected at least to begin the job to stimulate others and most importantly to interject theoretical concern into historical fields sometimes lacking it Ten essays are included together with the editor's introduction The pieces are bound together by a common strategy not a shared empirical territory They range from studies of gendered identity formation to regional identities formed around seaside resorts to empirical questions of class and capitalism and their identitarian politics to historical analysis of mourning and on to language nationality deafness motherhood and their inflection in identity in past time This well edited combination of shared conceptual purpose and variety of empirical form seems to me to work well The book will be widely used in a variety of historical fields not least in those which have been the most resistant to recent theoretical innovations in the social sciences Keith Nield Editor SOCIAL HISTORY This is a fascinating and wide ranging collection of essays linked by the over riding theme of identity While primarily historical in their focus the essays will be of interest to more than just historians They raise a variety of interesting conceptual and theoretical issues from for instance the significance of the staymaker in the formation of eighteenth century female identity to the relationship between regional identity and late nineteenth and early twentieth century Lancashire seaside resorts Sam Davies Professor of History School of Social Science Liverpool John Moores University Industrial memory in North East England Victoria Claire Allen, 2025-09-30 Industrial memory in North East England examines how the region's industrial myth and memory have been articulated in the renegotiation of northernness The book offers a critical contextualisation of the concept of northernness and the English North and introduces the concept of the PopCultural Portfolio a mixed methods approach to conjunctural analysis in cultural and memory studies The book provides six richly illustrated case studies to demonstrate the practical application of cultural studies expansive and inclusive understanding of texts bringing together materials from North East football folk indie and exhibition culture to establish how the North East's industrial past continues to be remembered and functionalised as industrial memory In turn the conjunctural analysis demonstrates how industrial memory is articulated and mythologised as north easternness in contemporary popular culture **European Union and the Making of a Wider Northern Europe** Pami Aalto, 2006-09-27 This book is the first comprehensive study of how and why the European Union has enlarged to become northern Europe's leading power Pami Aalto presents a new approach to the under theorized field of EU foreign policy studies showing how since 1990 the EU has enlarged to include Finland Sweden Estonia Latvia Lithuania and Poland and also incorporated the former East Germany He also examines how this northern expansion has led the EU to reflect on relations with Russia and its north western regions This unique study

includes a fresh approach to the under theorized field of EU foreign policy key empirical material including hundreds of documents interviews and field experiments in depth case studies of relations between the EU Nordic states Baltic states and Russia with its north western regions This is essential reading for all students of European politics Russian studies and international relations

The Changing Face of European Identity Richard Robyn,2004-11-10 Drawing upon systematic research using Q Methodology in seven countries this volume presents results of the most extensive effort yet at cross cultural subjective assessment of national and supranational identity

Sport, Media and Regional Identity Simon Roberts,2015-11-25 The increasing potency of identity politics across Europe often sees sport acting as a vehicle for the promotion and celebration of regional and sub national identities However while the relationship between sport the media and national identity has featured in numerous academic and political debates in recent years the links between sports media and regional identity have received little attention This seems a curious oversight because the links between sport and region frequently become a celebration of the local and the distinctive emblematic of community and continuity This volume will explore that sense of the counter hegemonic where sport is celebrated by a media often keen to promote notions of difference which might verge on rebellion in some contexts conceived as resisting global homogeneity or national hegemony At other times they may merely reflect a commercial nose for the local audience s tastes but there is always the sense of preserving something important a celebration of the diversity that makes us human This book considers the centrality and cultural significance of particular sports or clubs to regional and sub national identities across Europe and beyond adopting a comparative approach to the mediatized nature of such portrayals

Contested identities Carmen M.

Mangion,2019-01-04 English Roman Catholic women s congregations are an enigma of nineteenth century social history Over ten thousand nuns and sisters establishing and managing significant Catholic educational health care and social welfare institutions in England and Wales have virtually disappeared from history Despite their exclusion from historical texts these women featured prominently in the public and private sphere Intertwining the complexities of class with the notion of ethnicity *Contested identities* examines the relationship between English and Irish born sisters This study is relevant not only to understanding women religious and Catholicism in nineteenth century England and Wales but also to our understanding of the role of women in the public and private sphere dealing with issues still resonant today Contributing to the larger story of the agency of nineteenth century women and the broader transformation of English society this book will appeal to scholars and students of social cultural gender and religious history

Northern Landscapes Tom E. Faulkner,Helen Berry,Jeremy Gregory,2010 How distinctive is the landscape of the North East of England How far does its distinctive nature contribute to region s identity These are key questions addressed by this book drawing on hitherto little known detail and many new research findings

Looking North Dave Russell,2004-10 Investigating areas as diverse as travel literature fiction dialect the stage radio television feature film music and sport this book assesses the portrayal of the North of England within the

national culture and how this has impacted upon attitudes to the region and its place within notions of Englishness The relationship between these cultural forms and the construction of regional identity has received only limited consideration and this fascinating work provides not only much new information but also a map for future writers The North although seen ultimately as other and the subject of much critical comment is also shown here as capable of stimulating the creative imagination and invigorating English culture in sometimes surprising ways *Identity, Migration and Belonging* Aaron Kent, 2015-10-05 The exploring and defining of identities and societal cultures is a tenuous task at best With that in mind this book explores the development of the Jewish community of Leeds England and investigates the sense of community developed by its members The Jewish community of Leeds offers itself as a valuable tool in assessing identity change both real and perceived Their varied experiences are not the sole focus of the book as it also explores their retention of common Judaism and what became of a rich culture when confronted by alien ideas and attitudes The period spanning the 1880s through to World War I was an era that brought thousands of Jews to Leeds where most settled in the area known as the Leylands In exploring their experiences in education work uniformed movements worship and during the war this book reveals a side of Jewishness in Leeds not fully understood It develops and extends existing histories of the Leeds Jewish community Hosting the nation's third largest Jewish population the city stands out in many ways particularly with regards to the paucity of published research on this community The existing literature reflects divisions Ernest Krausz Anne Kershen Joseph Buckman Laura Vaughn Rosalind O'Brien and Ernest Sterne have all approached various different elements of Leeds Jewry There is a lack of a focused yet broad picture of this key era in which the community fully blossomed Most of the limited work on Leeds highlights and focuses on specific areas such as tailoring disharmony or how the community contrasted to Manchester What is needed is an effort to bring these issues and others together to better discern Britishness and Jewishness as seen by the people of Leeds both Jew and Gentile In discerning the unique nature of Leeds Jewry this book provides a greater understanding of the relationships between majority and minority communities and the impact of external and internal pressures on their interpretation of culture belonging and acceptance **Sport and English National**

Identity in a 'Disunited Kingdom' Tom Gibbons, Dominic Malcolm, 2017-02-17 Given sport's centrality in English society what role does it play in symbolising contemporary English national identity This comprehensive study explores the complex set of relationships between sport and what it means to be English in the twenty first century The bond between sport and nationalism has long been recognised but with increasingly vociferous separatist nationalisms threatening the dismantling of the United Kingdom a closer analysis is timely Part one addresses key debates regarding English national identity within the specific sporting contexts of association football cricket tennis cycling and rugby Part two discusses the complex relationship between religion sport and English national identity as well as the attitudes and experiences of traditionally marginalized groups including women minority ethnic groups and disabled people Part three considers the perspectives of the other UK

nations on the link between sport and English national identity Sport and English National Identity in a Disunited Kingdom is fascinating reading for all those with an interest in the sociology politics and history of sport and the study of nations nationalism and national identity *The Cambridge Urban History of Britain* Peter Clark,David Michael Palliser,Martin J. Daunton,2000-07-20 This volume examines when why and how Britain became the first modern urban nation **Family Identity And The State In The Bamako Kafu** B. Marie Perinbam,2018-02-23 This groundbreaking book explores the history and the cultural context of family claims to power in the Bamako kafu or state located in contemporary Mali in West Africa primarily during the eighteenth and nineteenth centuries Perinbam argues that the absence of precise information on the Bamako kafu s political status during this period empowered families to manipulate the myths rituals and ancestral legends as well as belief systems so that their claims to state power appeared incontrovertible The French on reaching the region accepted these representations of power Although the author s historical data focus mainly on the eighteenth and nineteenth centuries mythical recountings beyond this historical grid ranging across approximately one thousand years and including large scale migrations throughout the West African Sahel provide insights into the processes by which many of these ethnic identities were subject to reconfiguration and reinvention Within this historical mythical matrix Perinbam offers new insights into the reconstruction of Mande identities their cultures material and otherwise political systems and various social fields as well as their past Instead of rigid ethnic identities sometimes identified in the historical and anthropological literature as Mandingo Malinke or Bambara the author argues that variable ethnographic identities were more often than not mediated in accordance with a number of mythic and historical contingencies most notably the respective states into which the families were drawn as well as state formation maintenance and renewal not to mention meaning sensitive to political generational and gender challenges With the arrival of the French in the late nineteenth century and the Mande incorporation into the French colonial state familial identities once more readjusted The careful research and original scholarship of Family Identity and the State in the Bamako Kafu make it a significant contribution to the histories of West Africa the African Diaspora and the United States *Royal Journeys in Early Modern Europe* Anthony Musson,J. P. D. Cooper,2022-11-22 Authored by a unique combination of university academics and heritage professionals this book offers new perspectives on journeys made by Henry VIII and other monarchs their political and social impact and the logistics required in undertaking such trips It explores the performance of kingship and queenship by itinerant monarchs investigating how by a variety of means they engaged and interacted with their subjects and the practical and symbolic functions associated with these activities Moving beyond the purely English experience it provides a European dimension by comparing progresses in England and France Royal marriage and the royal progress share common features which are considered through an analysis of the trans European journeys made by future spouses notably Anne of Cleves Also the book reveals the significance of the art and architecture of houses and palaces and how the celebrated meeting of English and

French kings at the Field of Cloth of Gold in 1520 was part of a wider diplomatic performance full of symbolism including the exchange of gifts and socialising between the two royal courts Drawing on contemporary art material culture and surviving buildings the book will be of interest to all who enjoy the intrigue and splendour of sixteenth century courts *North-East England, 1569-1625* Diana Newton, 2006 This study of England's north eastern parts examines counties Durham and Northumberland as well as Newcastle upon Tyne with its central theme the extent to which the county gentry and urban elites possessed a sense of regional identity It concentrates on these elites social political religious and cultural connections which extended beyond the purely administrative jurisdictions of the county or town By concentrating on a series of seismic changes in the area the demise of its great regional magnates the rapid upsurge of the coal industry and the union of the crowns it offers a distinctive chronological coverage from the latter half of the sixteenth century through to the early seventeenth century Old stereotypes of the north eastern landed elites as isolated and backward are overturned while their response to state formation reveals their political sophistication Traditional views of the religious conservatism of the north eastern parts are reassessed to demonstrate its multi faceted complexion And contrasting cultural patterns are analysed through ballad literature the cult of St Cuthbert and increasing exposure to metropolitan civility to reveal a series of sub regions within the north eastern reaches of the kingdom Dr DIANA NEWTON is Lecturer in History at the University of Teesside
