**Working the Land** Nicola Verdon, 2017-09-22 This book offers a new history of the farmworker in England from 1850 to the present day It focuses on the paid worker considering how the experiences of farm work the work performed wages earned and conditions of hiring were shaped by gender age and region Combining data extracted from statistical sources with personal and autobiographical accounts it places the individual farmworker back into a broader collective history Beginning in the mid Victorian era when farmworkers were the most numerically significant occupational group in England it considers the impact of economic technological and social change on the scale and nature of farm work over the next hundred and fifty years whilst also highlighting the continuation of some practices including the use of casual and migrant workers to perform low paid seasonal work Written in a lively and accessible manner this book will appeal to those with an interest in rural history gender history and modern British history

**Ulster Farming Families** Jonathan Bell, 2005 Farming in the generation between 1930 and 1960 saw changes on a previously unknown scale On most holdings work continued to be carried out by all the family members Men women and children all had roles in the production of crops and livestock At busier times neighbours were called on for help and workers were also hired on some farms either full time or seasonally All of these relationships could lead to tensions and conflict but they also led to great intimacy and kindness with individuals showing commitment to the well being of their family their neighbours and even their employers and employees This book uses oral history to explore life on Ulster farms between 1930 and 1960 This valuable record of the farming community describes in fascinating detail the many changes in practically every aspect of working life and their associated patterns of social life all in the face of increasing government intervention globalisation of markets and the cataclysm of the Second World War These massive changes have often been seen as damaging social networks in rural areas but the collective memories of those involved bear witness to their marvellous capacity to adapt The oral testimonies on which the book is based show that for farming people change could and did create new relationships and wider opportunities on both a professional and personal level

**Rural-Urban Relationships in the Nineteenth Century** Mary Hammond, Barry Sloan, 2016-05-20 The essays in this collection seek to challenge accepted scholarship on the rural urban divide Using case studies from the UK Europe and America contributors examine complex rural urban relationships of conflict and cooperation The volume will be of interest to those researching society and politics criminology literature and demographics

Northern Landscapes Tom E. Faulkner, Helen Berry, Jeremy Gregory, 2010 How distinctive is the landscape of the North East of England How far does its distinctive nature contribute to region s identity These are key questions addressed by this book drawing on hitherto little known detail and many new research findings

**The Respectability of Late Victorian Workers** Charles Walter Masters, 2010-09-13 This study of the working classes of York in the late Victorian period places respectability at the heart of the interpretation of working class culture drawing

attention to its distinctive role within working class daily life while eschewing a class based analysis Through an investigation of workers actions choice making and personal testimony and using a wide range of textual and non textual sources a picture is produced of what it meant to be respectable in working class communities and respectability s role in personal and community identity formation Not only is the importance of gender based notions of the male breadwinner and female homemaker explored but fresh light is cast on how respectability was engaged with and negotiated in everyday contexts Respectability is shown to be a dynamic and culturally creative process with workers building their identities within the confines of structural constraints including street and neighbourhood based mores and institutions but with a measure of self generated cultural social and organisational space Far from respectability being a function of socio economic differentiation even the poorest are shown to have aspired to join self help organisations and become worthy citizens Crucially working class respectability is shown to have been moral and Christian in character underpinned by a form of diffusive Christianity that was robust and vital rather than some kind of legacy cultural and religious phenomenon Although different attributes of respectability could be prioritised within working class circles respectability is seen as a distinctive and essentially pan class culture centred on a set of universal values which distinguished and defined the respectable citizen and separated him from imagined or real rough Others This study will appeal to readers interested in social and cultural history gender studies and material culture York inhabitants are given their own voice through hitherto unpublished as well as published oral and written testimony Worker and family attitudes are analysed in the everyday contexts of work home neighbourhood and leisure and as part of the wide ranging discussion attention is paid to the cultural significance of what working people ate and wore and what goods they bought to furnish their often very modest homes The emphasis throughout is on a grass roots analysis showing clearly how and why respectability answered the needs and aspirations of most ordinary Victorian and Edwardian workers and their families The Disparity of Sacrifice Timothy Bowman, William Butler, Michael Wheatley, 2020 During the First World War approximately 200 000 Irish men and 5 000 Irish women many from Catholic and Nationalist communities served in the British armed forces This book provides a comprehensive analysis of Irish recruitment patterns These varied notably between North East Ulster and the rest of Ireland and between urban and rural areas **Earnings of Agricultural Labourers** Great Britain. Board of Trade, Wilson Fox, 1905 *Criminal Conversations* Judith Rowbotham, Kim Stevenson, 2005 The essays in this book set out to explore the ways in which Victorians used newspapers to identify the causes of bad behavior and its impacts and the ways in which they tried to distance criminals and those guilty of bad behavior from the ordinary members of society including identification of them as different according to race of sexual orientation It also explores how threats from within normal society were depicted and the panic that issues like baby farming caused Victorian alarm was about crimes and bad behavior which they saw as new or unique to their period but which were not new then and which in slightly different dress are still causing panic today What is striking about the essays in this

collection are the ways in which they echo contemporary concerns about crime and bad behavior including panics about new types of crime This has implications for modern understandings of how society needs to understand crime demonstrating that while there are changes over time there are also important continuities

*Vice and the Victorians* Mike Huggins, 2015-12-17 Vice and the Victorians explores the ways the Victorian world gave meanings to the word vice and the role this complex notion played in shaping society Mike Huggins provides a richer and more nuanced understanding of a term that despite its vital importance to the Victorians has thus far lacked a clear definition Each chapter explores a different facet of vice Firstly the book seeks to define exactly what vice meant to the Victorians exploring how the language of vice was used as a tool to beat down opposition and dissent It considers the cultural geography and spatial dimensions of vice in the public and private spheres before moving on to look at specific vices the unholy trinity of drink sex and gambling Finally it shifts from vice to virtue and the efforts of moral reformers and reassesses the relationship between vice and respectability in Victorian life In his lively and engaging discussion Mike Huggins draws on a range of theory and exploits a wide variety of texts and representations from the periodical press parliamentary reports and Acts novels obscene publications paintings and posters newspapers sermons pamphlets and investigative works This will be an illuminating text for undergraduates studying Victorian Britain as well as anyone wishing to gain a more nuanced understanding of Victorian society
