Northern Italy From The Alps To Rome The Blue Guides:

Europa! Europa? Sascha Bru, Jan Baetens, Benedikt Hjartarson, Peter Nicholls, Tania Ørum, Hubert Berg, 2009-10-29 The first volume of the new series European Avant Garde and Modernism Studies focuses on the relation between the avant garde modernism and Europe It combines interdisciplinary and intermedial research on experimental aesthetics and poetics The essays written by experts from more than fifteen countries seek to bring out the complexity of the European avant garde and modernism by relating it to Europe s intricate history multiculturalism and multilingualism They aim to inquire into the divergent cultural views on Europe taking shape in avant garde and modernist practices and to chart a composite image of the other Europe s that have emerged from the contemporary avant garde and experimental modernism How did the avant garde and modernism in and outside Europe give shape to local national and pan European forms of identity and community To what extent does the transnational exchange and cross fertilisation of aesthetic tendencies illustrate the well rehearsed claim that the avant gardes form a typically European phenomenon Dealing with canonised as well as lesser known exponents of modernism and the avant garde throughout Europe this book will appeal to all those interested in European cultural literary and art history

Family and Public Life in Brescia, 1580-1650 Joanne M. Ferraro, Joanne Marie Ferraro, 2003-01-23 This book focuses on the behavior of the ruling families of Brescia a rich and strategically vital city under Venetian rule during the late sixteenth and early seventeenth century The first part of the book conceptualizes the civic leadership of Brescia with a profile of its origins and a brief history of the process of aristocratization Further it examines the relationship between family structure and the local socio political structures Size wealth education and marriage ties were all pivotal factors which helped determine the family s position in public life Its strength rested ultimately on its continuity over time Women and women s property are given careful attention The second part places the Brescian elite within the Venetian state Besides controlling urban political institutions the Brescians held strong economic links with the surrounding countryside the basis of their power and they enjoyed ample authority in the rural communities subject to the city

Stanford White Wayne Craven, 2005-05-18 The designer of such landmarks as the Washington Square Arch the New York Herald and Tiffany Buildings and the homes of captains of American industry Stanford White is a legendary figure in the history of American architecture Yet while the exteriors and floor plans of his designs have been extensively studied and written about no book has fully examined the other aspect of his career which claimed at least half of his time and creativity Wayne Craven s work offers the first study of Stanford White as an interior decorator and a dealer in antiques and the fine arts Craven also offers a vivid portrait of the sweeping social and cultural changes taking place in the United States in the late nineteenth and early twentieth centuries He places White s work as an interior decorator within the context of the lives and society of the nouveaux riches who built unprecedented fortunes during the Industrial Revolution Rejecting the dominant middle class tastes and values of the United States the Whitneys Vanderbilts Astors Paynes Mackays and other wealthy New

York families saw themselves as the new aristocracy and desired the prestige and trappings accorded to Old World nobility. Stanford White fulfilled their hunger for aristocratic recognition by adorning their glamorous Fifth Avenue mansions and Long Island estates with the sculptures, stained glass windows, coats of arms and carved fireplaces of the European past. Interior decorators such as White did more than just buy single pieces for these families. They purchased entire rooms from palazzos, chateaux, villas, nunneries and country houses, had them dismantled and shipped both furnishings and architectural elements to their American clients. Through Stanford White's activities, Craven uncovers the mostly but not always legal business of dealing in antiquities as American money entered and changed the European art market. Based on the archives of the Avery Architectural Library of Columbia University and the New York Historical Society, this book recovers a neglected yet significant part of White's career which lasted from the 1870s to his murder in 1906. White not only set the bar for twentieth-century architecture but also defined the newly emerging profession of interior design. *The Statesman's Year-Book* Mortimer Epstein, 2016-12-23. Similar in spirit to Lewis Mumford's *The City in History* and Jane Jacobs' *The Death and Life of Great American Cities*, wonderful, funny, idiosyncratic. Frederick R. Steiner, author of *The Living Landscape*. *Big Plans: The Allure and Folly of Urban Design* springs from the idea that human aspirations for the city tend to overstate the role of rationality in public life. Inspired by the architectural and urban criticism of such writers as Lewis Mumford, Jane Jacobs and John Brinckerhoff Jackson, Kolson adopts a user's perspective on issues of urban design, an approach that highlights both the futility of social engineering and the resilience of the human spirit. A book that should be read by all those people and there seem to be more of them as week chases week who are thinking about the fate of lower Manhattan right now. Bloomberg News. Kenneth Kolson has lots of material. Some of what's been built in cities lately is astonishing and not in a good way. *The Boston Globe*. Kolson is a passionate critic of urban schemes with well-founded skepticism about the role rationality has played in designing them. *Journal of the Society of Architectural Historians*. impact on Modernism and ongoing acclaim for their beauty and intellectual acuity Two of his most influential books *The Quattro Cento* of 1932 and *Stones of Rimini* of 1934 are brought together for the first time in this new volume which includes all their original illustrations This new edition also provides a foreword by Stephen Bann and introductions by David Carrier and Stephen Kite that place Stokes's masterworks in the context of early twentieth century culture and discuss their structure and relevance to today's experience of art and architecture Written as parts of an incomplete trilogy *The Quattro Cento* and *Stones of Rimini* mark a crossroads in the transition from late Victorian to Modernist conceptions of art especially sculpture and architecture Stokes continued even extended John Ruskin's and Walter Pater's belief that art is essential to the individual's proper psychological development but wove their teaching into a new aesthetic shaped by his analysis with Melanie Klein and recent innovations in literature dance and the visual arts Few writers have been able to invoke the material presence of works of art in the way Stokes does in *The Quattro Cento* and *Stones of Rimini* They combine travel writing with acts of looking spun out so as to reinterpret the imposing legacy of the Italian Renaissance through an aesthetic of the direct carving of stone which has parallels in the sculpture of Henry Moore and Barbara Hepworth but was for Stokes the discovery of artists in fifteenth century Italy To his way of thinking there then arose a realization that the materials of art were the actual objects of inspiration the stocks for the deepest fantasies During the Renaissance Stokes maintained stone accordingly blossomed into sculpture and buildings
