*The Lost World of James Smithson* Heather Ewing,2010-12-15 In 1836 the United States government received a strange and unprecedented gift a bequest of 104 960 gold sovereigns then worth half a million dollars to establish a foundation in Washington for the increase and diffusion of knowledge among men The Smithsonian Institution as it would eventually be called grew into the largest museum and research complex in the world Yet it owes its existence to an Englishman who never set foot in the United States and who has remained a shadowy figure for more than a hundred and fifty years Smithson lived a restless life in the capitals of Europe during the turbulent years of the French Revolution and the Napoleonic Wars at one time he was trailed by the French secret police and later languished as a prisoner of war in Denmark for four long years Yet despite a certain a penchant for gambling and fine living he had by the time of his death in Paris in 1829 amassed a financial fortune and a wealth of scientific papers that he left to the new democracy America Spurned by his natural father and his country he would be acknowledged for his own achievements in the New World Drawing on unpublished diaries and letters from archives all over Europe and the United States Heather Ewing tells the full and compelling story for the first time revealing a life lived at the heart of the English Enlightenment and illuminating the mind that sparked the creation of America s greatest museum    *Northumberland Legal Journal* Charles K. analyses the Western colonial origins of the mining industry and its post colonial legacies in the Central African Copperbelt It provides insights into the operations of the global business of mining in particular how these processes took place why they were considered desirable by various interest groups and the impact that these processes continue to have on physical and human environments in parts of the world where they took place It also turns its gaze to the City of London looking at who the financiers were and the nature of the power which they wielded A long term perspective on mining finance reveals that thus far the colonial governments have been the main focus in the history of imperialism in Central Africa with little focus in many instances on the mining finance houses which have outlived them The book is a significant contribution to the economic financial and business history of mining and extractive industries Central Africa the City of London and early forms of financial capitalism     Transactions of the Natural History Society of Northumberland, Durham, and Newcastle-upon-Tyne
