**Norwegian Wood** Jerri Holan,1990 Traditional wooden architecture of Norway from the Middle Ages to the eighteenth century Churches and farm buildings Portugal SB07 Luis Bragança,2007 The construction industry is a vibrant and active industry The building sector is responsible for creating modifying and improving the living environment of humanity On the other hand construction and buildings have considerable environmental impacts consuming a significant proportion of limited resources of the planet including energy raw material water and land Therefore the sustainability of the built environment the construction industry and the related activities is a pressing issue facing all stakeholders in order to promote Sustainable Development The new millennium is challenging practitioners and researchers with the sustainability of the built environment and the construction industry Hence the main purpose of this publication is to discuss these challenges and present solutions that actively facilitate and promote the adoption of policies methods and tools to accelerate the movement towards a global sustainable built environment The issues presented include Building sustainability assessment tools Indoor environment quality and benchmarks Sustainable resources and materials use Use of non conventional materials Use of industrial waste Eco materials and technologies Sustainable management of existing building stock Innovative sustainable construction systems and Design Traditional Buildings Allen Noble,2009-09-18 Based on a lifelong professional and personal interest Traditional Buildings presents a unique survey of vernacular architecture across the globe The reader is taken on a fascinating tour of traditional building around the world which includes the loess cave homes of central China the stilt houses on the shores of Dahomey the housebarns of Europe and North America the wind towers of Iran the Bohio houses of the Arawak Indians of the Caribbean and much more Professor s Noble s extensive travels have allowed him to examine many of the building at close quarters and the richly illustrated text includes photographs from his personal collection With its comprehensive and detailed bibliography the work will be welcomed by experts and non specialists alike Dictionary of Architecture and Building Construction Nikolas Davies,Erkki Jokiniemi,2008 With more than 20 000 words and terms individually defined the Dictionary offers huge coverage for anyone studying or working in architecture construction or any of the built environment fields The innovative and detailed cross referencing system allows readers to track down elusive definitions from general subject headings Starting from only the vaguest idea of the word required a reader can quickly track down precisely the term they are looking for The book is illustrated with stunning drawings that provide a visual as well as a textual definition of both key concepts and subtle differences in meaning Davies and Jokiniemi s work sets a new standard for reference books for all those interested in the buildings that surround us To browse the book and to see how this title is an invaluable resource for both students and professionals alike visit [www.architectsdictionary.com](http://www.architectsdictionary.com) **Timber Structures and Engineering** De Proft, K.,Brebba, C. A.,Connor, J.,2018-02-06 This book contains papers presented at the 1st International Conference on Timber Structures which was held in collaboration

with the Technical Centre of Wood Industry in Belgium It explores the latest developments in wood products and their application as structural components The focus of the included works is to draw attention to new research and real applications from both researchers and practitioners and to present new and innovative ideas in this significant field Rapid advances have recently been made in the development and processing of innovative ecologically friendly wood products A variation of new structural shapes can now be fabricated and used to construct buildings and bridges which have minimal impact on the environment Wood is particularly appealing since it is renewable and has no carbon footprint when it is harvested in a sustainable way Timber structures are ecologically sound and comparatively low cost The material lends itself to ground breaking designs and new types of composites offer reliable robust and safe materials The content of this book comprises a range of topics Material properties of wood Durability aspects service life modelling Fire safety of timber structures Protection against decay Non destructive inspection and monitoring Glued laminated structures Xlam and CLT Timber joints and connections Vernacular wood and heritage timber structures Timber housing and eco architecture Timber bridges Large span timber roof structures Shell structures in timber Mixed composite and hybrid structures Computational analysis and experimental methods Structural engineering and design Seismic behaviour of timber structures Protection of timber Repaired timber structures Rapidly assembled and transferable timber structures Guidelines codes and regulations Structural failures Art and craftsmanship

**Vernacular Buildings** Allen Noble, 2013-11-27 Constancy permits the evolution of types and characteristics to be identified even in widely spread locations It helps trace the origins of structures despite later modifications And change allows one to trace the effects of difference in environment fashion cultural ideas and economic influences Change and constancy operate together although one may or other may dominate at a particular time and place In Vernacular Buildings Allen Noble extends the global survey contained in his earlier highly successful Traditional Buildings to cover vernacular buildings and dwellings around the world In a truly comprehensive account he ranges from the fazenda of the pioneer Brazilian settlers the Masai dwellings of Tanzania and the gothic houses of Shanghai to Virginia Hall and Parlor houses the thatched dwellings of the Eifel region of Germany and the three decker houses of New York Acknowledging the value of archival research the author is also firmly convinced of the importance of field observation and the book is extensively illustrated with photographs from his own personal collection With a comprehensive bibliography and incorporating new material from cultural geographers historians folklorists and anthropologists Vernacular Buildings is a unique survey that will be welcomed by specialists and enthusiasts alike

*The A to Z of Norway* Jan Sjøvik, 2010-05-11 One of the smallest countries in Europe Norway has created for itself a position in the world community which is completely out of proportion to the size of its population Originally the home of sub Arctic hunters and gatherers then of ferocious Vikings it lost perhaps half of its population to the Black Death in 1349 ended up in a union with Denmark that lasted until 1814 and then became united with Sweden gaining complete independence only as recently as 1905 Over the centuries the

Norwegians eked out a meager living from stony fields and treacherous seas while suffering through hunger darkness and cold however its recent productive use of such natural resources as hydroelectric power natural gas and oil has made the Norwegians some of the richest people in the world The A to Z of Norway supplies a wealth of information that illuminates Norway s remarkable history society and culture This is done through a chronology a bibliography an introductory essay appendixes and over 250 cross referenced dictionary entries covering events and individuals of historical political social and cultural significance Both past and present political parties are discussed major economic sectors are described and basic economic facts are provided Several entries describe the history and attractions of major Norwegian cities and Norway s role in the international community is detailed as well providing a full portrait of this vibrant country

**World Architecture and Society** Peter Louis Bonfitto,2021-12-06 This two volume encyclopedia covers buildings and sites of global significance from prehistoric times to the present day providing students with an essential understanding of architectural development and its impact on human societies This two volume encyclopedia provides an in depth look at buildings and sites of global significance throughout history The volumes are separated into four regional sections 1 the Americas 2 Europe 3 Africa and the Middle East and 4 Asia and the Pacific Four regional essays investigate the broader stylistic and historical contexts that describe the development of architecture through time and across the globe Entries explore the unique importance of buildings and sites including the megalithic wonder of Stonehenge and the imposing complex of Angkor Wat Entries on Spanish colonial missions in the Americas and the medieval Islamic universities of the Sahara connect to broader building traditions Other entries highlight remarkable stories of architectural achievement and memory like those of Tuskegee University a site hand built by former slaves or the Hiroshima Peace Memorial Park which was built at the site of the atomic detonation Each entry focuses on the architectural but includes strong consideration of the social impact importance and significance each structure has had in the past and in the present

**Heritage** J.D. Fladmark,2014-02-04 This volume deals with policy methods and techniques for the stewardship of our land and our cultural assets The focus is on interpretation and presentation of heritage themes and the papers should be of interest to those concerned with school and university curricula those working in museums and galleries and those in charge of parks and tourist enterprises Individual contributions celebrate achievements and debate issues relating to the natural and built environment the future of green tourism planning and interpretation in museums parks and private estates The authors include Professor David Lowenthal on cultural landscapes Charles McKean on architecture David Macmillan on the arts John Purser on music Elisabeth Luard on cooking the Earl of Glasgow on the opening of a family estate to the public and Gordon Baxter on the heritage of one of Scotland s great enterprise stories in the food industry The main theme of the book is that we do not always take enough pride in our heritage which is often undervalued and neglected Positive action is required to raise awareness to foster respect for our inheritance and to generate a new kind of enterprise that will not endanger the heritage resources on which we depend for

enjoyment and jobs      **Historical Dictionary of Norway** Terje Leiren, Jan Sjøvik, 2019-10-08 Norway has a thousand year history from the Vikings 750 1100 to modern times Historically a poor country on Europe's periphery its natural resources and hardy people have established a successful modern welfare state Norway has exploited its natural resources of fish water oil and gas to become one of Europe's most successful small states This second edition of I contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about Norway      **Nightlands** Christian Norberg-Schulz, 1997-07-29 Translated by Thomas McQuillan Architecture is a manifestation of the environment in which it is placed observes distinguished architect and theoretician Christian Norberg Schulz A simple enough observation but one that becomes subtle and nuanced in this landmark book which attempts to define for the first time what Nordic building really is Norberg Schulz begins by contrasting the natural world of the North with that of the Mediterranean the Nordic unendingness against the sun saturated and homogeneous South Using themes such as natural domestic universal and foreign he finds the architecture of both regions sensibly related to their environments but whereas the South lends itself to abstraction the North is marked by variation openness and dynamism by low light forests and space Exploring the ways built experience takes place Norberg Schulz charts the distinctive character of land and climate that distinguishes Denmark's Sweden's Finland's and Norway's architectural traditions from each other and from those to the South While each of these countries might be said to share regional traits Norberg Schulz identifies differences the cultivated and closely detailed landscape and architecture of Denmark the dramatic structured forms of Norway that allow him to account for the way individual Nordic architectures evolved      **Norwegian Wood** Elisabeth Tostrup, 2006-08-31 Tostrup architecture Oslo School of Architecture and Design has written the first book on the life and architecture of Wenche Selmer 1920 1998 one of the few women who gained prominence among European architects in the mid twentieth century Tostrup features 14 of Selmer's wooden cabins and houses for which she provides detailed descriptions      **Carlisle and Cumbria** Mike McCarthy, 2024-11-01 This book compiles the papers presented at the British Archaeological association conference held in 2001 which concentrated on the Roman and medieval art architecture and archaeology of the city and county It provides scholars with a firm baseline for future research in this area      *Wood Properties and Processing* Miha Humar, 2020-05-23 Wood based materials are CO2 neutral renewable and considered to be environmentally friendly The huge variety of wood species and wood based composites allows a wide scope of creative and esthetic alternatives to materials with higher environmental impacts during production use and disposal Quality of wood is influenced by the genetic and environmental factors One of the emerging uses of wood are building and construction applications Modern building and construction practices would not be possible without use of wood or wood based composites The use of composites enables using wood of lower quality for the production of

materials with engineered properties for specific target applications Even more the utilization of such reinforcing particles as carbon nanotubes and nanocellulose enables development of a new generation of composites with even better properties The positive aspect of decomposability of waste wood can turn into the opposite when wood or wood based materials are exposed to weathering moisture oscillations different discolorations and degrading organisms Protective measures are therefore unavoidable for many outdoor applications Resistance of wood against different aging factors is always a combined effect of toxic or inhibiting ingredients on the one hand and of structural anatomical or chemical ways of excluding moisture on the other

**Open-Air Museums in Europe** Vladimír Klíma, 2022-09-28 This book deals with 636 open air museums in 31 European countries and presents various details concerning the evolution of European vernacular architecture and the modern approach to open air museums reconstructing old ways of living in the countryside The publication has many illustrations and also contains 2339 black and white photos In addition to scholars and the general reader the book will also be of interest to open air museums as it provides insights into attracting visitors to such institutions

**Wood** Joachim Radkau, 2013-12-23 tzi the iceman could not do without wood when he was climbing his Alpine glacier nor could medieval cathedral builders or today s construction companies From time immemorial the skill of the human hand has developed by working wood so much so that we might say that the handling of wood is a basic element in the history of the human body The fear of a future wood famine became a panic in the 18th century and sparked the beginnings of modern environmentalism This book traces the cultural history of wood and offers a highly original account of the connection between the raw material and the human beings who benefit from it Even more it shows that wood can provide a key for a better understanding of history of the peculiarities as well as the varieties of cultures of a co evolution of nature and culture and even of the rise and fall of great powers Beginning with Stone Age hunters it follows the twists and turns of the story through the Middle Ages and the Industrial Revolution to the global society of the twenty first century in which wood is undergoing a varied and unexpected renaissance Radkau is sceptical of claims that wood is about to disappear arguing that such claims are self serving arguments promoted by interest groups to secure cheaper access to and control over wood resources The whole forest and timber industry often strikes the outsider as a world unto itself a hermetically sealed black box but when we lift the lid on this box as Radkau does here we will be surprised by what we find within Wide ranging and accessible this rich historical analysis of one of our most cherished natural resources will find a wide readership
