**Encyclopedia of Prophecy** Geoffrey Ashe, 2001-06-04 A definitive factual A-Z reference guide offering a global perspective on the role of prophecy in world history, religion, folklore, and literature. From at least 1200 B.C. and probably long before prophets have attempted to see into the future. Most from ancient oracles to modern astrologers, from doomsday sects to telephone psychics have been wrong. The majority of the time, says British researcher Geoffrey Ashe, true foreknowledge is rare, but those rare occurrences are impressive. In this fascinating reference work, the first to encompass the entire 3,000-year span of recorded prophecy, Ashe examines the predictions of both good prophets and bad, including seers like Jacques Cazotte who forecast the Reign of Terror in the French Revolution and Morgan Robertson who described the Titanic disaster 14 years before it happened. He refutes many of the far-fetched claims of Nostradamus and highlights those that foreshadow events after his lifetime. He also examines failed prophecies that have been influential, including the many end-of-the-world forecasts along with the surprisingly accurate visions of some science fiction authors.

Black, 2020-07-06 Mythology for centuries has served as humanity's window into understanding its distant past In our modern world storytelling creates its own myths and legends in media ranging from the world of television and cinema to literature and comic books that help us make sense of the world we live in today What is the Mytharc How did it arise How does it inform modern long form storytelling How does the classical hero's journey intersect with modern myths and narratives And where might the storytelling of tomorrow take readers and viewers as we imagine our future From The X-Files to H.P. Lovecraft from Lost to the Marvel cinematic universe and many worlds beyond this study explores our modern storytelling mythology and where it may lead us **The Isaiah Effect** Gregg Braden, 2009-02-04 Seventeen hundred years ago key elements of our ancient heritage were lost relegated to the esoteric traditions of mystery schools and sacred orders Among the most empowering of the forgotten elements are

references to a science with the power to bring everlasting healing to our bodies and initiate an unprecedented era of peace and cooperation between governments and nations In his groundbreaking new book *The Isaiah Effect* Gregg Braden turns to the Isaiah Scroll perhaps the most important of the Dead Sea Scrolls discovered in 1946 to offer insight into a powerful form of ancient prayer In *The Isaiah Effect* Braden author of *Awakening to Zero Point* and *Walking Between the Worlds* combines research in quantum physics with the works of the prophet Isaiah and the ancient Essenes He demonstrates how prophecies of global catastrophe and suffering may only represent future possibilities rather than forecast impending doom and that we have the power to influence those possibilities In addition to describing multiple futures the Isaiah texts take us one step further clearly describing the science of how we choose our futures Tracing key words of Isaiah's text back to their original language we discover how he taught a mode of prayer that was lost to the West during Biblical editing in the fourth century Braden offers detailed accounts of how elements of this mode of prayer have been applied in a variety of situations ranging from healing life threatening conditions to entire villages using collective prayer to prevail during the 1998 fires in southern Peru In each instance the correlation between the offering of the prayer and a shift of the events in question was beyond coincidence the prayers had measurable effects As modern science continues to validate a relationship between our outer and inner worlds it becomes more likely that a forgotten bridge links the world of our prayers with that of our experience Each time we engage ourselves our loved ones and our communities with Isaiah's life affirming message of hope we secure nothing less than our future and the future of the only home we know
