Nostratic Macrofamily A Study In Distant Linguistic Relationship:

The Nostratic Macrofamily Allan R. Bomhard, John C. Kerns, 1994 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by approaching language from an interdisciplinary perspective. TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

Diachronic Interpretation of the Nostratic Macrofamily Yan Kapranov, Bożena Iwanowska, Bolesław Cieślak, 2024-06-17 This monograph presents a groundbreaking exploration into the Nostratic macrofamily, a concept that proposes a common ancestral language for several of the world's foremost language families. The study delves deep into the roots of Altaic, Afro-Asiatic, Dravidian, Eskimo-Aleut, Indo-European, Kartvelian, and Uralic languages, offering a unique perspective on their interconnections and evolutionary paths. The authors examine five pivotal Nostratic etymons from the Swadesh index to illustrate the shared cognitive frameworks of these diverse linguistic groups. This research challenges conventional perspectives on language evolution and introduces new methodologies in cognitive macro-comparative studies. Key to the work is the hypothesis of divergent-convergent and convergent-divergent evolutionary patterns stemming from a common Nostratic origin. Beyond linguistics, this study offers insights into human cognitive development, language formation, and change mechanisms.

Nostratic Joseph C. Salmons, Brian D. Joseph, 1998-09-15 The Nostratic hypothesis, positing a common linguistic ancestor for a wide range of language families including Indo-European, Uralic, and Afro-Asiatic, has produced one of the most enduring and often intense controversies in linguistics. Overwhelmingly, though, both supporters of the hypothesis and those who reject it have not dealt directly with one another's arguments. This volume brings together selected representatives of both sides, as well as a number of agnostic historical linguists, with the aim of examining the evidence for this particular hypothesis in the context of distant genetic relationships generally. The volume contains discussion of variants of the Nostratic hypothesis. A. Bomhard, J. Greenberg, A. Manaster Ramer, K. Baertsch, K. Adams, D. Ringe, and the evidence from particular branches posited in Nostratic. L. Campbell, C. Hodge, A. Vovin, with responses and additional discussion by E. Hamp, B. Vine, W. Baxter, and B. Comrie.

The Handbook of Language Contact Raymond Hickey, 2013-04-24 The Handbook of Language Contact offers systematic coverage of the major issues in this field, ranging

from the value of contact explanations in linguistics to the impact of immigration to dialectology combining new research from a team of globally renowned scholars with case studies of numerous languages An authoritative reference work exploring the major issues in the field of language contact the study of how language changes when speakers of distinct speech varieties interact Brings together 40 specially commissioned essays by an international team of scholars Examines language contact in societies which have significant immigration populations and includes a fascinating cross section of case studies drawing on languages across the world Accessibly structured into sections exploring the place of contact studies within linguistics as a whole the value of contact studies for research into language change and language contact in the context of work on language and society Explores a broad range of topics making it an excellent resource for both faculty and students across a variety of fields within linguistics

Archaeology and Language I Roger Blench, Matthew Spriggs, 2003-09-02 Archaeology and Language I represents groundbreaking work in synthesizing two disciplines that are now seen as interlinked linguistics and archaeology This volume is the first of a three part survey of innovative results emerging from their combination Archaeology and historical linguistics have largely pursued separate tracks until recently although their goals can be very similar While there is a new awareness that these disciplines can be used to complement one another both rigorous methodological awareness and detailed case studies are still lacking in literature Archaeology and Language I aims to fill this lacuna Exploring a wide range of techniques developed by specialists in each discipline this first volume deals with broad theoretical and methodological issues and provides an indispensable background to the detail of the studies presented in volumes II and III This collection deals with the controversial question of the origin of language the validity of deep level reconstruction the sociolinguistic modelling of prehistory and the use and value of oral tradition

The Legacy of Iranian Imperialism and the Individual John Pairman Brown, 2012-10-25 The series Beihefte zur Zeitschrift f r die alttestamentliche Wissenschaft BZAW covers all areas of research into the Old Testament focusing on the Hebrew Bible its early and later forms in Ancient Judaism as well as its branching into many neighboring cultures of the Ancient Near East and the Greco Roman world

Latin Suffixal Derivatives in English D. Gary Miller, 2006-07-20 This is the fullest account ever published of Latin suffixes in English It explores the rich variety of English words formed by the addition of one or more Latin suffixes such as ial able ability ible and id It traces the histories of over 3 000 words revealing the range of derivational patterns in Indo European Latin and English It describes the different kinds of suffixes shows how they entered English via different channels at different times and considers the complexity of competition between native and borrowed forms The author examines postclassical medieval and early modern Latin derivatives and demonstrates that Latin is still and likely to remain a productive source of English words He traces the suffixes back to their Proto Indo European origins and provides copious examples for every aspect of his discussion Professor

Miller's innovative book makes an important contribution to the history of both English and Latin morphology and etymology as well as to the history of suffixal derivation in Indo-European. It will interest scholars and students of comparative morphology, historical and comparative linguistics, etymology and lexicography. *The Oxford Introduction to Proto-Indo-European and the Proto-Indo-European World* J. P. Mallory, D. Q. Adams, 2006-08-24 This book introduces Proto-Indo-European and explores what the language reveals about the people who spoke it. The Proto-Indo-Europeans lived somewhere in Europe or Asia between 5,500 and 8,000 years ago and no text of their language survives. J. P. Mallory and Douglas Adams show how over the last two centuries scholars have reconstructed it from its descendant languages, the surviving examples of which comprise the world's largest language family. After a concise account of Proto-Indo-European grammar and a consideration of its discovery, they use the reconstructed language and related evidence from archaeology and natural history to examine the lives, thoughts, passions, culture, society, economy, history, and environment of the Proto-Indo-Europeans. Our distant ancestors had used the wheel, were settled, arable farmers, kept sheep and cattle, brewed beer, got married, made weapons, and had 27 verbs for the expression of strife. The subjects to which the authors devote chapters include fauna, flora, family and kinship, clothing and textiles, food and drink, space and time, emotions, mythology, religion, and the continuing quest to discover the Proto-Indo-European homeland. Proto-Indo-European, English, and English-Proto-Indo-European vocabularies and full indexes conclude the book. Written in a clear, readable style and illustrated with maps, figures, and tables, this book is on a subject of great and enduring fascination. It will appeal to students of languages, classics, and the ancient world, as well as to general readers interested in the history of language and of early human societies. Languages of the Himalayas George van Driem, 2022-09-12 The survey work *Languages of the Himalayas* provides a bird's-eye view of Himalayan languages and language communities. It also constitutes a primary source for much new, hitherto unpublished data on several languages. The demographic mosaic of the Himalayas today is viewed in a historical and comparative linguistic perspective. The reader will find an outline of the historical and prehistorical developments that have determined the modern ethnolinguistic composition of the Himalayan region, involving various independent linguistic stocks or language families. Maps illustrate the distribution of language communities and trace the routes of ancient migrations. There is an illuminating discussion of grammatical features found in Himalayan languages. The print edition is available as a set of two volumes. 9789004103900 **Intercultural Encounters** Wim M. J. van Binsbergen, 2003 This book brings together fifteen essays investigating aspects of interculturality. Like its author, it operates at the borderline between social anthropology and intercultural philosophy. It seeks to make a contribution to intercultural philosophy by formulating, with great precision and painful honesty, the lessons deriving from extensive intercultural experiences as an anthropologist. Its culminating section presents an intercultural philosophy revolving on the tenet: cultures do not exist. The kaleidoscopic nature of intercultural experiences is reflected in the diversity of these texts. Many belong to a field that could be described as meta-anthropology.

others are more clearly philosophical occasionally they spill over into belles lettres ancient history and comparative cultural and religious studies The ethnographic specifics supporting the arguments are diverse deriving from various African situations in which the author has conducted participatory field research Tunisia Zambia Botswana and South Africa

Europa Vasconica, Europa Semitica Theo Vennemann, 2003 This book presents the theory that the linguistic and cultural landscape of Europe north of the Alps and the Pyrenees was shaped in prehistoric times by the interaction of Indo European speakers with speakers of languages related to Basque and to Semitic These influences on the lexicon grammar and toponymy of the West Indo European languages with special focus on Germanic are demonstrated in German and English research papers provided here with summaries commentaries and a new introduction in English and with general and etymological indexes
