Not As A Victim:

Neither Victim nor Survivor Marilyn Nissim-Sabat, 2009-07-16 In *Neither Victim nor Survivor Thinking toward a New Humanity* Marilyn Nissim Sabat offers a comprehensive critique of the interrelated concepts of victim and survivor as they have been ideologically distorted in Western thought Framed by the phenomenological perspective of Edmund Husserl Nissim Sabat carries out her argument through an intense engagement with current scholarly work on Toni Morrison's *Beloved*, Sophocles' *Antigone*, akrasia, psychoanalysis, critical race theory, feminist philosophy of science, and Marxism Nissim Sabat ultimately proposes that a new consciousness enabled by the phenomenological attitude of the way in which ideological distortion of the concepts of victim and survivor helps to perpetuate victimization will empower us to find ways to end victimization and its anti-human consequences The book's interdisciplinary approach will make it appealing to a broad range of students and scholars alike

A Victim Community Nicola O'Leary, 2021-12-13 Although historically ignored, crime victims are now very firmly on the map For politicians, newspapers, the media, and the public at large, criminal injury and loss are a source of constant concern and anxiety Criminologists and media analysts have studied much of this concern in recent years, but what has not been investigated is how communities experience high-profile crimes and the media intrusion that inevitably follows This book seeks to address this gap by exploring how the communities of Soham and Dunblane, that witnessed high-profile crimes, lived with the tragic events at the time and the attention of the world's media afterwards Based on a two-year qualitative study of these communities, this book looks beneath the surface of the relationships, dilemmas, and unexpected triumphs of communities struggling to come to terms with the most harrowing of events within the glare of the media spotlight Combining empirical observations with media analysis and social theory, this book offers something new to the criminological audience: the concept of the victim community

Victims Still Robert Elias, 1993-04-19 The 1980s saw official crime policy in the United States shifting its focus from crime and criminals to victimization and victims In this thought-provoking book, Robert Elias evaluates the effectiveness of this shift in policy and argues that victims have been politically manipulated for official objectives From a thorough examination of victim legislation, get-tough crime policies, media crime coverage, the victim movement, and the wars on crime and drugs, Elias concludes that little victim support has actually occurred and that victimization is in fact escalating He argues for a change in the structural sources of crime and proposes a new culture that could lead to substantially less crime

Rethinking the Victim Anne Brewster, Sue Kossew, 2019-02-18 This book is the first to examine gender and violence in Australian literature It argues that literary texts by Australian women writers offer unique ways of understanding the social problem of gendered violence, bringing this often private and suppressed issue into the public sphere It draws on the international field of violence studies to investigate how Australian women writers challenge the victim paradigm and figure women's agencies In doing so, it provides a theoretical context for the increasing number of contemporary literary works by Australian women writers that

directly address gendered violence an issue that has taken on urgent social and political currency By analysing Australian women s literary representations of gendered violence this book rethinks victimhood and agency particularly from a feminist perspective One of its major innovations is that it examines mainstream Australian women s writing alongside that of Indigenous and minoritised women In doing so it provides insights into the interconnectedness of Australia s diverse settler Indigenous and diasporic histories in chapters that examine intimate partner violence violence against Indigenous women and girls family violence and violence against children and the war and political violence

Conceptualizing Cruelty to Children in Nineteenth-Century England Monica Flegel,2016-05-23 Moving nimbly between literary and historical texts Monica Flegel provides a much needed interpretive framework for understanding the specific formulation of child cruelty popularized by the National Society for the Prevention of Cruelty to Children NSPCC in the late nineteenth century Flegel considers a wide range of well known and more obscure texts from the mid eighteenth century to the early twentieth including philosophical writings by Locke and Rousseau poetry by Coleridge Blake and Caroline Norton works by journalists and reformers like Henry Mayhew and Mary Carpenter and novels by Frances Trollope Charles Dickens Wilkie Collins and Arthur Morrison Taking up crucial topics such as the linking of children with animals the figure of the child performer the relationship between commerce and child endangerment and the problem of juvenile delinquency Flegel examines the emergence of child abuse as a subject of legal and social concern in England and its connection to earlier primarily literary representations of endangered children With the emergence of the NSPCC and the new crime of cruelty to children new professions and genres such as child protection and social casework supplanted literary works as the authoritative voices in the definition of social ills and their cure Flegel argues that this development had material effects on the lives of children as well as profound implications for the role of class in representations of suffering and abused children Combining nuanced close readings of individual texts with persuasive interpretations of their influences and limitations Flegel s book makes a significant contribution to the history of childhood social welfare the family and Victorian philanthropy

The Army Lawyer ,1992-03 **What Works for Crime Victims** Alline Pedra Jorge,2021-01-26 After the Second World War the role of the victim in criminal conflict became an object of interest for academics But it was only in the 1960s that the importance of providing protection and assistance to crime victims was highlighted in particular by the victims movement which inaugurated a new era of criminal justice in systems throughout the world Moving beyond just the role of controlling crime and punishing the offender the criminal justice system also began to contribute to the victims rehabilitation and to help the victim to move on from the event psychologically and emotionally Although some criminological research was conducted on this topic the effect that the criminal justice system and victim support services have on the well being of crime victims is still uncertain The current study sought to understand the healing process of victims of crime the potential consequences of their participation on the criminal justice system and the support of victim centers Moreover it aimed to find out whether the

existence of a Victim Support Act would change the treatment that the victim receives in the criminal justice system. Thus this research was conducted based in two countries Switzerland and Brazil where the outcome of the victims' movement on the criminal justice system was different as was the participation of the victim in the criminal justice system and the government's provision of support. In order to conduct this research the qualitative method was employed which is the most efficient to gather sensitive information. Interviews with crime victims were the main source of information. Hearing observation and document research were used as complementary sources. The results of this research show that victims who have contact with the criminal justice system and victim services are not more likely to recover than those who had no contact. This is to say the support offered has no major effects. The influence of the criminal justice system and the victim support services in the emotional well-being of crime victims is rather neutral. However, considering that the sample is not representative, findings are not expected to be generalized. Instead, findings may give insight to practitioners or to future criminal justice policy makers suggesting what may work to improve the emotional well-being of crime victims as well as suggesting further studies.

Victims of Crime Matthew Hall, 2018-01-18 This volume critically engages with the development of official policy and reform in relation to the support of victims of crime both within and beyond the criminal justice system of England and Wales. Since the election of the Conservative Liberal Democrat Coalition Government in May 2010 it is argued that victimization has increasingly taken on a greater cultural resonance both in England and Wales and in other industrialised countries. Images of terrorism, public debates around the handling of sexual victimisation by the courts and the issue of child sexual exploitation have catapulted victim issues into the public consciousness like never before, generating a new form of what Hall terms victim capital. As such, this book utilises a combination of cultural victimological analysis, governance theory and legal scholarship to address fundamental questions concerning the drivers and impact of victim policy in England and Wales in the 21st century. An engaging and original study, this book will be of particular interest to scholars of victimology and the criminal justice system as well as activists and policy makers.
