The Greater Generation Leonard Steinhorn,2007-04-01 The Greatest Generation gets credit for winning World War II and braving the Depression But the Baby Boomers All they get credit for is knowing how to order a tall skim double latte What really is the true legacy of the Boomers Summoning the amazing sea changes they ve made in American culture this controversial book recasts the much maligned Boomers as a Greater Generation with a lasting legacy of tolerance and equality for all Farewell Donna Reed For women the Baby Boom era has been one of breathtaking change in a single generation American women have effected one of the greatest social metamorphoses in recorded history What women are able to do today would have been unimaginable four or five decades ago at best the stuff of utopian fantasy or science fiction Not Only Women The egalitarian norms of the Baby Boom have deeply changed men and will continue to do so for generations to come Diversity as a Moral Value For too long America denied blacks gays and other minorities their dignity and rights but in the Boomer era we have enlarged the melting pot to include those once scorned and excluded Boomers have led a culture war to upend the rigid social structure of the Fifties and challenge centuries of entrenched norms and attitudes about race ethnicity religion and sexuality The Greening of America

Masters of Illusion Steven Rosefielde,D. Quinn Mills,2006-12-26 The United States will confront a series of fundamental challenges through the middle of the twenty first century Using a theory of economic systems to gauge present and future global conflicts Steven Rosefielde and D Quinn Mills see the challenges as posed sequentially by terrorism Russia China and the European Union In the cases of terrorism Russia and China Western leaders appreciate aspects of these perils but they are crafting unduly soft policies to deal with the challenges The authors believe that globalists notwithstanding such views are myopic in an era where nuclear proliferation has invalidated the concept of mutually assured destruction What America requires is a new security concept that the authors call strategic independence to enable keeping the peace in dangerous times and foster new generations of leaders capable of acting sanely despite a current public culture addicted to wishful thinking

Beleaguered Superpower: Biden's America Adrift Steven Rosefielde,Daniel Quinn Mills,2021-07-29 As a new president takes over in Washington three intertwined threats imperil the world One is internal The others are external The internal threat is a potent and increasingly anti patriotic anti competitive anti meritocratic and sky is the limit federal deficit spending political current that is simultaneously diminishing and destabilizing American and global economic vitality The two major external threats are the rising military power of Russia China North Korea and Iran and a global economic malaise sowing the seeds of discontent America s role in containing the spread of new wave authoritarianism and fostering competitiveness and global prosperity is critical but domestic politics is preventing the Biden administration from

adequately responding to these challenges Biden's America is adrift America is key to the survival of the free world America is currently a beleaguered superpower This book is possibly the first to address the politics shaping the likely course of America's new president in world affairs It is politics not idealist and realist abstractions which determine international security The world is concerned about what course Biden will take and the likely consequences It will be the most carefully researched of such books The book deals explicitly and extensively with issues such as spreading authoritarianism the emerging new Cold War global growth retardation civic discord economic sanctions arms control soft power and the deteriorating correlation of forces The China weapons section of the book draws from the latest assessment made by the American Department of Defense The book also includes a section on China's new technology generating innovation model and a chapter on Covid 19

Youth Development in Identity Societies James E. Cote, 2018-10-31 This book explores the causes and consequences of the contradictions in young people's lives stemming from the affluence purpose paradox a lack of purpose in life among many of those living in the most affluent societies in human history This paradox is endemic to identity societies where people experience a choice contingent life course and is examined using an interdisciplinary approach largely with an integration of developmental psychology and sociology but also using historical anthropological economic and political perspectives The transition to adulthood is now commonly a prolonged process with young people facing a number of psychological challenges and sociological obstacles in their identity formation Challenges include difficulties in making prudent choices about goals Obstacles involve cross pressures in the wider society as well as in educational institutions Consequently many youth experience their education as alienating and stressful rather than as an opportunity for personal development Those without a sense of purpose have more difficulties with their identity formation that can produce symptoms of anxiety and depression The current student mental health crisis is examined in this context An additional challenge is an ambiguously defined adulthood Young people who are confused about appropriate adult roles often value hedonistic activities rooted in narcissism and materialism rather than in more fulfilling long term goals Conversely those who are agentic in their personal development can thrive in adulthood especially when they combine agency with generativity This book ends with a series of recommendations for researchers and policy makers to help youth cope with the affluence purpose paradox
