Supernatural and Natural Selection Lyle B. Steadman,Craig T. Palmer,2015-11-17 Spanning many different epochs and varieties of religious experience this book develops a new approach to religion and its role in human history The authors look across a range of religious phenomena from ancestor worship to totemism shamanism and worldwide modern religions to offer a new explanation of the evolutionary success of religious behaviors Their book is more empirical and verifiable than most previous books on evolution and religion because they develop an approach that removes guesswork about beliefs in the supernatural focusing instead on the behaviors of individuals The result is a pioneering look at how and why natural selection has favored religious behaviors throughout history *Lineage Organisation in South-Eastern China* Maurice Freedman,2021-01-07 This essay is the work of a social anthropologist but it is not based upon field work It is concerned with Chinese matters but it is not written by a sinologue In this essay are the author s reflections on certain aspects of southeastern Chinese society during the last hundred and fifty years with attention on the Fukien and Kwangtung region of China has it has specialized not only in large scale unilineal organization but also in sending people overseas **The Veterinarian** ,1899 **Heredity** John Arthur Thomson,1920 **Proceedings of the Cambridge Philological Society** Cambridge Philological Society,1913 **On The Human Species** Anthony Pellegrino,2017-02-18 On the Human Species is a philosophical and psychological discourse that charts the origin and evolution of our species The book is an inspired combination of science and philosophy a brilliant canvas of intellectual thought and discerning anthropology **The Eyes of the World** James H. Smith,2021-12-17 The Eyes of the World focuses on the lives and experiences of Eastern Congolese people involved in extracting and transporting the minerals needed for digital devices The digital devices that many would

argue define this era exist not only because of Silicon Valley innovations but also because of a burgeoning trade in dense artisanally mined substances like tantalum tin and tungsten In the tentatively postwar Eastern DR Congo where many lives have been reoriented around artisanal mining these minerals are socially dense fueling movement and innovative collaborations that encompass diverse actors geographies temporalities and dimensions Focusing on the miners and traders of some of these digital minerals *The Eyes of the World* examines how Eastern Congolese understand the work in which they are engaged the forces pitted against them and the complicated process through which substances in the earth and forest are converted into commodified resources Smith shows how violent dispossession has fueled a bottom up social theory that valorizes movement and collaboration one that directly confronts both private mining companies and the tracking initiatives implemented by international companies aspiring to ensure that the minerals in digital devices are purified of blood **The Mothers** Robert Briffault,1927 *The Allies* Sir Henry Edward Colvile,1907 **Genealogy of the Adams Family** ,1861
