Reconstructing Criticism Philip Smallwood, 2003 This study aims to bring the modern theory of literary criticism and Pope s Essay on Criticism of 1711 into a more productive and interesting association than critical historical structures have generally allowed Smallwood marks out in current terms and in depth the specialized theoretical and aesthetic problem of defining criticism He recognizes that criticism no more than literature or art cannot be finally codified or defined but insists on the need for clarity in the exposition of criticism s purposes and a fuller consciousness of a common community of practice available to audiences outside the academic fold Affirming the unfailing currency and utility of the term criticism as new languages have taken over the critical domain or have sought to replace or abolish literature Smallwood distinguishes between the normative definitions that are everywhere apparent in modern theory of criticism and the advantages to conceptual comprehension achieved by Pope s poetic idea of criticism in the Essay **Audio Book** Mikko Keskinen, 2008-01-01 Audio Book deals with the ways in which the auditory voices sounds noises is represented in postphonograph narrative fiction More specifically it examines how the various technologies enabling the transmission or storing of sound and voice are figured in selected prose works Drawing from contemporary American British French and German literature the author discusses these use of these technologies in Nicholson Baker s Vox Michel Tournier s Tristan Vox Heinrich B ll s Murke s Collected Silences Don DeLillo s The Body Artist Nick Hornby s High Fidelity and Sylvia Brownrigg s The Metaphysical Touch The texts foreground sound technologies the telephone radio tape recorder answering machine record player or counterintuitively e mail in their narration and manifest important aspects of audio in literature In prior criticism these texts have not been systematically read from media technological perspectives The sound technologies represented in the texts problematize the clear distinction between speech and writing or between natural articulation and its technological reproduction Audio Book suggests that literary writing is metaphorically conceivable as a transmitting and storing technology as an audiobook of sorts capable of recording upon writing and reproducing upon reading auditory information The sound technologies proper have also bearing on the narrative structure metaphors and style of each fictional work studied in Audio Book In addition themes such as identity genre the nature of literary representation and the absence presence problem are brought to the fore on account of the technologies depicted Shakespeare's Humanism Robin Headlam Wells, 2005-12-08 Renaissance humanists believed that if you want to build a just society you must begin with the facts of human nature This book argues that the idea of a universal human nature was as important to Shakespeare as it was to every other Renaissance writer In doing so it questions the central principle of post modern Shakespeare criticism

Postmodernists insist that the notion of defining a human essence was alien to Shakespeare and his contemporaries as radical anti essentialists the Elizabethans were in effect postmodernists before their time In challenging this claim Shakespeare s Humanism shows that for Shakespeare as for every other humanist writer in this period the key to all wise action was the knowledge of our selves and our human condition **Imagining The Real** R. Grant,2003-08-01 Throughout its ten related essays Imagining the Real contrasts our abstract imaginings about the human world with the imaginative insights provided by art and experience It questions variously the relevance of game theory and sociobiology to politics the supposed intrinsic values of liberal freedom cultural change and democratic action and the claims of Marxism deconstruction and Theory generally to be non ideological More positively it reinterprets fiction as a specific invitation to imagine and celebrates Shakespeare L H Myers and Beckett as truly critical because truly imaginative exponents of ideas

Fong,2016-11-08 The first philosophers of the Frankfurt School famously turned to the psychoanalytic theories of Sigmund Freud to supplement their Marxist analyses of ideological subjectification Since the collapse of their proposed marriage of Marx and Freud psychology and social theory have grown apart to the impoverishment of both Returning to this union Benjamin Y Fong reconstructs the psychoanalytic foundation stone of critical theory in an effort to once again think together the possibility of

psychic and social transformation Drawing on the work of Hans Loewald and Jacques Lacan Fong complicates the famous antagonism between Eros and the death drive in reference to a third term the woefully undertheorized drive to mastery Rejuvenating Freudian metapsychology through the lens of this pivotal concept he then provides fresh perspective on Theodor Adorno Max Horkheimer and Herbert Marcuse s critiques of psychic life under the influence of modern cultural and technological change The result is a novel vision of critical theory that rearticulates the nature of subjection in late capitalism and renews an old project of resistance

Aping Mankind Raymond Tallis,2016-04-14 Neuroscience has made astounding progress in the understanding of the brain What should we make of its claims to go beyond the brain and explain consciousness behaviour and culture Where should we draw the line In this brilliant critique Raymond Tallis dismantles Neuromania arising out of the idea that we are reducible to our brains and Darwinitis according to which since the brain is an evolved organ we are entirely explicable within an evolutionary framework With precision and acuity he argues that the belief that human beings can be understood in biological terms is a serious obstacle to clear thinking about what we are and what we might become Neuromania and Darwinitis deny human uniqueness minimise the differences between us and our nearest animal kin and offer a grotesquely simplified account of humanity We are argues Tallis infinitely more interesting and complex than we appear in the mirror of biology Combative fearless and thought provoking Aping Mankind is an important book and one that scientists cultural commentators and policy makers cannot ignore This Routledge Classics

edition includes a new preface by the Author
