Cultural Studies and the 'Juridical Turn' Jaafar Aksikas, Sean Andrews, 2018-02-02 The relationship between culture and the law has become an emergent concern within contemporary Cultural Studies as a field but the recent focus has been largely limited to the role played by cultural representations and identity politics in the legitimization of legal discourse and policies While continuing this emphasis this collection also looks at the law itself as a cultural production tracing some of the specific contours of its function in the last three decades It argues that with the onset of neoliberal or late capitalism the law has taken on a new specificity and power leading to what we are calling the juridical turn where the presumed legitimacy of the law makes other forms of hegemonic struggle secondary The collection not only charts the law and cultural policy as they exert their powerful if often overlooked influence on every aspect of society and culture but it also seeks to define this important field of study and demonstrate the substantial role law plays in the production of our social and cultural worlds In this trailblazing collection of contributions by leading and emerging figures in the field of cultural legal studies chapters examine various ways in which this process is manifested such as U S legislation and Supreme Court Decisions on gay marriage immigration consumer finance welfare copyright and so called victim s rights along with international comparisons from Europe and Latin America It promises to be a pathbreaking analysis of our juridically determined conjuncture This book was originally published as a special issue of Cultural Studies

Intensified Land and Water Use Margarita María Alconada-Magliano, 2021-03-25 This book combines multidisciplinary studies on the environmental consequences of intensified use of land and water and the fusion of land to provide food for a growing population Studies on water vegetation and soil are addressed from an environmental management perspective with a special focus on the relation between natural elements and humans This book considers the essential dynamics of humans and the natural environment which is especially important in areas with shallow water table that influence directly on agricultural activities crops livestock and forests land management flooding droughts waterlogging salt affected soils saline and sodic and variation in obtained water quality in wells where these processes as related to the local and regional geomorphology control The studies present hydrological processes towards the definition of an adequate use of soil and water with consequences of its management on the environment Also water study procedures are presented as well as their relation to other elements of

the landscape Methodologies such as the T thian flow system concept are recognized by different authors to provide the reader with solid interdisciplinary analyses of related environmental components such as soils vegetation surface water geomorphology geological framework and groundwater physical chemical composition

The ^ACatholic Church and Argentina's Dirty War Gustavo Morello SJ,2015-07-01 Drawing on interviews with victims of forced disappearance documents from the state and the Church as well as field work and participant observation The Catholic Church and Argentina s Dirty War explores how the Argentine government deployed the legitimating discourse of Catholicism to justify terrorism in the case of La Salette missionaries It examines how the official Catholic hierarchy rationalized their silence and how the victims understood their Catholic faith in such a context

Sediment Transfer from Shelf to Deep Water Roger M. Slatt,Carlos Zavala,2012-02-08 The topic of hyperpycnal flows and their deposits hyperpycnites has recently emerged as the latest in a long list of hotly debated topics on deep water sedimentary processes environments and deposits This collection of chapters offers important new insights into the sediment delivery system to deep marine waters

Historical Justice Klaus Neumann,2017-10-02 The yearning for historical justice that is for the redress of past wrongs has become one of the defining features of our age Governments international bodies and civil society organisations address historical injustices through truth commissions tribunals official apologies and other transitional justice measures Historians produce knowledge of past human rights violations and museums memorials and commemorative ceremonies try to keep that knowledge alive and remember the victims of injustices In this book researchers with a background in history archaeology cultural studies literary studies and sociology explore the various attempts to recover and remember the past as a means of addressing historic wrongs Case studies include sites of persecution in Germany Argentina and Chile the commemoration of individual victims of Nazi Germany memories of life under South Africa s apartheid regime and the politics of memory in Israel and in Northern Ireland The authors critique memory highlight silences and absences explore how to engage with the ghosts of the past and ask what drives individuals including professional historians to strive for historical justice This book was originally published as a special issue of Rethinking History

Volcanic Landscapes and Associated Wetlands of Lowland Patagonia Elizabeth Mazzone,Jorge Rabassa,2018-01-10 This book presents the most relevant basaltic plateau exposures in the provinces of Neuqu n northern Patagonia and Santa Cruz southern Patagonia and analyzes their geomorphological and morphometric characteristics The existence of wetland ecosystems near the volcanic plateaus is quantified thus providing indexes that describe the quantitative relationships between these landscape features These indexes also make it possible to estimate the development of these wetlands in non surveyed areas opening the door for studying remote isolated areas by means of remote sensing images In turn the book proposes a numerical classification system for this type of landscape that summarizes the main geomorphological and hydrological characteristics

Geological Resources of Tierra del Fuego Rogelio Daniel Acevedo,2021-02-13 The CADIC s Geological Resources Program will soon turn 40 years of fruitful

development During this period many projects were carried out and others remain to be implemented In the course of time three generations of researchers have been formed Mentioning names would be unfair to those that could be involuntarily omitted There is still a long way to go The eagerness for knowledge should not stop This book is a tribute to all those people who have worked in the different projects of pure and applied science and educational and human resources training granted to this founding program and associated laboratories of the regional center of CONICET in Ushuaia Tierra del Fuego Argentina The twenty papers which constitute this book have a genuine Latin appeal having been written by 50 authors based in Argentina and Spain All this contributions are concerned with Fuegian geological resources Everyone concerned with this work hopes that it will prove a fitting and lasting memorial to Nacho Subias whose personal contribution to our knowledge of this geology was outstanding

International Lateinamerika-Kolloquium 2009 Gerhard Wörner, Stefan Möller-McNett, 2009 The International Lateinamerika Kolloquium held in April 2009 at the Geosciences Centre of the Georg August University Göttingen brings together researchers from all fields of earth sciences The abstracts contained in this volume cover a wide range of topics on the geological evolution of the South American continent and its margins such as processes of mountain building uplift and erosion as well as interaction between tectonic and climatic parameters Topics of the Lateinamerika Kolloquium also cover landscape evolution ecology natural resources geo hazards and economic geology

New Horizons in Spanish Colonial Law Thomas Duve, Heikki Pihlajamäki, 2015-12-01 <http://dx.doi.org/10.12946/gplh3> <http://www.epubli.de/shop/buch/48746> Spanish colonial law *derecho indiano* has since the early 20th century been a vigorous subdiscipline of legal history One of great figures in the field the Argentinian legal historian Víctor Tau Anzoátegui published in 1997 his *Nuevos horizontes en el estudio histórico del derecho indiano* The book in which Tau addressed seminal methodological questions setting tone for the discipline's future orientation proved to be the starting point for an important renewal of the discipline Tau drew on the writings of legal historians such as Paolo Grossi Antonio Manuel Hespanha and Bartolomé Clavero Tau emphasized the development of legal history in connection to what he called the posture superseding rational and statutory state law The following features of normativity were now in need of increasing scholarly attention the autonomy of different levels of social organization the different modes of normative creativity the many different notions of law and justice the position of the jurist as an artifact of law and the casuistic character of the legal decisions Moreover Tau highlighted certain areas of Spanish colonial law that he thought deserved more attention than they had hitherto received One of these was the history of the learned jurist the *letrado* was to be seen in his social political economic and bureaucratic context The Argentinian legal historian called for more scholarly works on book history and he thought that provincial and local histories of Spanish colonial law had been studied too little Within the field of historical science as a whole these ideas may not have been revolutionary but they contributed in an important way to bringing the study of Spanish colonial law up to date It is beyond doubt that Tau's programmatic visions have been largely fulfilled in the past two decades Equally manifest

is however that new challenges to legal history and Spanish colonial law have emerged The challenges of globalization are felt both in the historical and legal sciences and not the least in the field of legal history They have also brought major topics back on to the scene such as the importance of religious normativity within the normative setting of societies These challenges have made scholars aware of the necessity to reconstruct the circulation of ideas juridical practices and researchers are becoming more attentive to the intense cultural translation involved in the movement of legal ideas and institutions from one context to another Not least the growing consciousness and strong claims to reconsider colonial history from the premises of postcolonial scholarship expose the discipline to an unseen necessity of reconsidering its very foundational concepts What concept of law do we need for our historical studies when considering multi normative settings How do we define the spatial dimension of our work How do we analyze the entanglements in legal history Until recently Spanish colonial law attracted little interest from non Hispanic scholars and its results were not seen within a larger global context In this respect Spanish colonial law was hardly different from research done on legal history of the European continent or common law Spanish colonial law has however recently become a topic of interest beyond the Hispanic world The field is now increasingly seen in the context of global legal history while the old and the new research results are often put into a comparative context of both European law of the early Modern Period and other colonial legal orders In this volume scholars from different parts of the Western world approach Spanish colonial law from the new perspectives of contemporary legal historical research

Geology of Cuba Manuel Enrique Pardo Echarte, 2021-05-04 The evolution of geological cartography in Cuba in its more than 135 years of history has been possible through the consultation of numerous archival reports publications maps and personal interviews with different authors and geologists of vast experience A brief critical analysis is made of the increase in the degree of geological knowledge of the country since the elaboration of the Geological Sketch of the Cuban Island at a scale of 1 2 000 000 Fern ndez de Castro 1883 first of Cuba and of Ibero America until the most recent Digital Geological Map of Cuba at scale 1 100 000 P rez Arag n 2016 Cuba and its surroundings are a geological mosaic in the southeast corner of the North American plate with rocks from

many different origins from Proterozoic to Quaternary extended along the southern border of the plate From the Eocene this belt has been dissected by several great faults related to the development of some great oceanic depressions Cayman trough and Yucatan basin The fossil record of Cuba which covers approximately the last 200 million years of life on Earth is rich in very varied fossils witnessing a wide diversity of organisms both animals and plants that inhabited the Antillean and Caribbean region and that constitute the inheritance of the biological diversity that the current Cuban archipelago exhibits As a result of the preparation of the Cuban Metallogenic Map at scale 1 250 000 forty one models and eight sub models of metallic mineral deposits were identified These models of descriptive genetic type together with the analysis of their spatial distribution and their relationship with geology allowed the identification and mapping of ten mineral systems linked to the geodynamic environments present in the Cuban territory Cuba has large deposits of limestone loam dolomite kaolin gypsum and anhydrite rock salt marbles sands and clays of different types zeolites peat therapeutic peloids and many more There are manifestations of decorative and precious rocks such as jasper jadeite different varieties of quartz and even xylopals A compilation of geochemical data of oceanic basalt samples from previous works together with data of analyzed samples during this study in order to discuss geochemical criteria based on immobile element proxies for fractionation indices alkalinity mantle flow and subduction addition provide a comprehensive ophiolite classification according to their tectonic setting This book addresses different facets of the geological knowledge of Cuba history of its cartography marine geology fossil record stratigraphy tectonics classification of its ophiolites quaternary deposits metallogeny and minerageny Left in Transformation Vania Markarian, 2013-09-13 This book takes an innovative look at international relations Focusing on the worldwide campaign against abuses by the right wing authoritarian regime in Uruguay 1973 1984 it explores how norms and ideas interact with political interests both global and domestic It examines joint actions by differently motivated actors such as the leftist activists who had to flee Uruguay in these years the Organization of American States The United Nations Amnesty International and the United States It traces language and procedures for making their claims The chief goal however is to peruse the specific reasons that led these actors to endorse the central core of liberal rights that gave foundation to this system A close examination of the available documents shows that even as they joined efforts to protest abuses they were still pursuing their individual agendas which is often overlooked in the existing scholarship on human rights transnational activism The book pays special attention to the Uruguayan exiles analyzing why and how leftist activists and leaders adopted the human rights language which had so far been used to attack communism in the context of the Cold War *Geology of Southwest Gondwana* Siegfried Siegesmund, Miguel A. S. Basei, Pedro Oyhançabal, Sebastian Oriolo, 2018-02-02 This book focuses on the geological evolution of Southwest SW Gondwana and presents state of the art insights into its evolution It addresses the diachronic assembly of continental fragments derived from the break up of the Rodinia supercontinent later amalgamated to build SW Gondwana during the Neoproterozoic Cambrian transition which on a

global scale includes parts of present day South America Africa and Madagascar The book presents 24 state of the art reviews including the most crucial controversies Most experienced scientists about the geology of SW Gondwana from Europe Africa South America and Australia present contributions on key areas addressing the interactions between the main cratons and fold belts on both sides of the South Atlantic Ocean Chapters related to the geology of the major Archean Paleoproterozoic cratons and Neoproterozoic Brasiliano Pan African fold belts enable readers to gain an in depth understanding of the tectonometamorphic and magmatic evolution of SW Gondwana The book covers a wide range of issues including metallogenetic sedimentary paleobiological and paleoclimatic processes and allows a deep insight into this key period of the Earth s evolution

Monitoring, Simulation, Prevention and Remediation of Dense Debris Flows II D. De Wrachien, Mario Aristide Lenzi, C. A. Brebbia, 2008 This book contains papers presented at Second International Conference on Debris Flow including all aspects of Debris Flow Monitoring Modelling Hazard Assessment Mitigation Measures Case Studies and Extreme Events Erosion Slope Instability and Sediment Transport held in the New Forest UK in 2008 and organised by the Wessex Institute of Technology with the co sponsorship of EurAgEng European Society of Agricultural Engineers and CIGR International Commission of Agricultural Engineering Due to the increased frequency with which debris and hyper concentrated flows occur and the impact they have on both the environment and human life in recent years these extreme events and related processes have attracted increasing attention from research groups land planning and management professionals The objective of the Meeting was to provide a forum for engineers scientists and managers from laboratories industry government and academia to interchange knowledge and expertise in the field of dense and hyper concentrated flows A full understanding of these phenomena leads to a new integrated risk management approach which provides measures for preventing a hazard turning into a natural disaster

The Application of Ichnology to Palaeoenvironmental and Stratigraphic Analysis D. McIlroy, 2004 It has been increasingly realized by sedimentologist in the petroleum industry and academia that integration of ichnological information into sedimentological models and vice versa is one of the main means by which we can improve our understanding of ancient depositional environments This volume aims to provide an analytical review of yhe ichnology of all major depositional environments and the use ichnology in biostratigraphic and sequence stratigraphic analysis as well as highly refined palaeoenvironmental studies The remit of the book is achieved through a combination of review articles and novel research papers that outline methodologies and protocols for improving our understanding of ancient palaeoenvironments Trace fossils from microscopic borings to dinosaur footprints are considered

Rethinking Race in Modern Argentina Paulina Alberto, Eduardo Elena, 2016-03-21 This book reconsiders the relationship between race and nation in Argentina during the twentieth and twenty first centuries and places Argentina firmly in dialog with the literature on race and nation in Latin America from where it has long been excluded or marginalized for being a white European exception in a mixed race region The contributors based both in North America and Argentina

hail from the fields of history anthropology and literary and cultural studies Their essays collectively destabilize widespread certainties about Argentina showing that whiteness in that country has more in common with practices and ideologies of Mestizaje and racial democracy elsewhere in the region than has typically been acknowledged The essays also situate Argentina within the well established literature on race nation and whiteness in world regions beyond Latin America particularly other European settler societies The collection thus contributes to rethinking race for other global contexts as well
