

Ratios: Fractions, Percent & Decimals

3:5

3 out of 5
3 to 5

$\frac{3}{5}$

60%

0.6

Ratio to Percent:

- Turn the ratio into a fraction
- Find the equivalent fraction, over 100
- Change the fraction into a percent

$$3:5 = \frac{3}{5} \rightarrow \frac{3}{5} = \frac{\quad}{100} \rightarrow \frac{3 \times 20}{5 \times 20} = \frac{60}{100}$$

$$\frac{60}{100} = 0.60 = \mathbf{60\%}$$

$$23:100 = \frac{23}{100} = .23 = \mathbf{23\%}$$

Mine the Gap for Mathematical Understanding, Grades 6-8 John SanGiovanni, Jennifer Rose Novak, 2017-09-12 Being an effective math educator is one part based on the quality of the tasks we give one part how we diagnose what we see and one part what we do with what we find Yet with so many students and big concepts to cover it can be hard to slow down enough to look for those moments when students responses tell us what we need to know about next best steps In this remarkable book John SanGiovanni and Jennifer Rose Novak help us value our students misconceptions and incomplete understandings as much as their correct ones because it s the gap in their understanding today that holds the secrets to planning tomorrow s best teaching The authors lay out 180 high quality tasks aligned to the standards and big ideas of Grades 6 8 mathematics including number systems integers ratio and proportion equations and expressions geometry and statistics and probability The tasks are all downloadable so you can use or modify them for instruction and assessment Each big idea offers a starting task followed by what makes it a high quality task what you might anticipate before students work with the task four student examples of the completed task showcasing a distinct gap commentary on what precisely counts for mathematical understanding and the next instructional steps commentary on the misconception or incomplete understanding so you learn why the student veered off course three additional tasks aligned to the mathematics topic and ideas about what students might do with these additional tasks It s time to break our habit of rushing into re teaching for correctness and instead get curious about the space between right and wrong answers Mine the Gap for Mathematical Understanding is a book you will return to again and again to get better at selecting tasks that will uncover students reasoning better at discerning the quality and clarity of students understanding and better at planning teaching based on the gaps you see

Fostering Children's Mathematical Power Arthur J. Baroody, Ronald T. Coslick, 1998-09-01 Teachers have the responsibility of helping all of their students construct the

disposition and knowledge needed to live successfully in a complex and rapidly changing world To meet the challenges of the 21st century students will especially need mathematical power a positive disposition toward mathematics curiosity and self confidence facility with the processes of mathematical inquiry problem solving reasoning and communicating and well connected mathematical knowledge an understanding of mathematical concepts procedures and formulas This guide seeks to help teachers achieve the capability to foster children s mathematical power the ability to excite them about mathematics help them see that it makes sense and enable them to harness its might for solving everyday and extraordinary problems The investigative approach attempts to foster mathematical power by making mathematics instruction process based understandable or relevant to the everyday life of students Past efforts to reform mathematics instruction have focused on only one or two of these aims whereas the investigative approach accomplishes all three By teaching content in a purposeful context an inquiry based fashion and a meaningful manner this approach promotes children s mathematical learning in an interesting thought provoking and comprehensible way This teaching guide is designed to help teachers appreciate the need for the investigative approach and to provide practical advice on how to make this approach happen in the classroom It not only dispenses information but also serves as a catalyst for exploring conjecturing about discussing and contemplating the teaching and learning of mathematics

Conquering the AMC 8 Jai Sharma, Rithwik Nukala, The American Mathematics Competition AMC series is a group of contests that judge students mathematical abilities in the form of a timed test The AMC 8 is the introductory level competition in this series and is taken by tens of thousands of students every year in grades 8 and below Students are given 40 minutes to complete the 25 question test Every right answer receives 1 point and there is no penalty for wrong or missing answers so the maximum possible score is 25 25 While all AMC 8 problems can be solved without any knowledge of trigonometry calculus or more advanced high school mathematics they can be tantalizingly difficult to attempt without much prior experience and can take many years to master because problems often have complex wording and test the knowledge of mathematical concepts that are not covered in the school curriculum This book is meant to teach the skills necessary to solve mostly any problem on the AMC 8 However our goal is to not only teach you how to perfect the AMC 8 but we also want you to learn and understand the topics presented as if you were in a classroom setting Above all the first and foremost goal is for you to have a good time learning math The units that will be covered in this book are the following Test Taking Strategies for the AMC 8 Number Sense in the AMC 8 Number Theory in the AMC 8 Algebra in the AMC 8 Counting and Probability in the AMC 8 Geometry in the AMC 8 Advanced Competition Tricks for the AMC 8
