, *Numbers Through the Ages* Mohamed El Bahry, 2017-03-06 History of the book The reason which convinced me to write this book has a very funny background For a long time I did not know that these numbers 0123456789 which determine nearly all of our daily routines were Arabic numbers In Egypt my homeland these numbers were always portrayed as European numbers My first journey to Europe in the year 1977 led me to Paris France I went there into a mosque to pray and I read pages from the Koran and astonishingly noticed that the text and pages were numbered with these European numbers I was extremely surprised and curious to find out why the Koran was provided in another country with such foreign numbers Many years later approximately 1991 I visited the University of Trier in Germany to learn the German language Then One day I picked up a mailing ticket from the post office where upon I read a sentence the provided data and information are allowed only with Arabic numbers I was then a little bit confused and which numbers were meant with that Then it became clear to me that these numbers which we use every day and everywhere are the original Arabic numbers Therefore I decided to take it upon myself to research and find the answers to my unanswered questions How were they actually developed Who developed modified and designed them Why do we still use them today In 1997 I began to study and became a great friend of the computer science Thus it came into my mind to start writing about and illustrating the numbers as we know them today and their logics Now it is possible for me to explain in detail and show in beautiful diagrams the history the logic and the Origin of the numbers Without my efforts and research in trying to find out about the origin appearance and the logic of the numbers written in this book I would never come across the idea to modify the number Ten 10 and to present a new number system In addition and maybe One day I could say I may have extended and reformed a very old numerical system I hope that this book with its contents techniques and descriptions will open your minds to the fascinating world of numbers and thank everybody for taking the time to read my book I hope you have an Interesting journey
