Parliament. House of Commons. Education and Skills Committee,2005 In light of the transfer of responsibility for prison education to the Department for Education and Skills

DfES the Committee's report examines the provision of education and training in prisons including the overall strategy for prison education delivery structures at national regional and local levels programme contents in comparison to external standards and barriers to delivery across the wider prison regime Findings include that current provision is unacceptable in terms of quantity and quality of provision and a fundamental shift in approach is required Although there has been an increase in resources available in 2004 on average only a third of prisoners had access to prison education at any one time The Committee highlights the need for an overarching strategy and higher priority to be given to prison education based on recognition of its role in helping to reduce recidivism through rehabilitation and suited to meet the needs of individual prisoners to ensure they have a real alternative to crime on release

Innumeracy in the Wild Ellen Peters,2020-04-29

Our grasp of numbers and uncertainty is one of humankind's most distinctive and important traits It is pivotal to our exceptional ability to control the world around us as we make short term choices and forecast far into the future But very smart people can struggle with numbers in ways that pose negative consequences for their decision making Numeric ability equips individuals with vital tools that allow them to take charge of various aspects of their life The more numerate enjoy superior health wealth and employment outcomes while the innumerate remain more vulnerable This book presents the logic rules and habits that highly numerate people use in decision making Innumeracy in the Wild also introduces two additional ways of knowing numbers that complement and compensate for lower numeric ability and explores how numeric abilities develop and where mistakes are made It offers a state of the art review of the now sizeable body of psychological and applied findings that demonstrate the critical importance of numeracy in our world With more than two decades of experience in the decision sciences Ellen Peters demonstrates how intervention can foster adult numeric capacity propel people to use numeric facts in decision making and empower those with lower numeracy to reason better
