Dear Parents:

On Monday March 14, 2019 we are doing a lesson on puberty for 5th graders. The boys and girls will be split into separate groups. This lesson will cover emotional and physical growth and development of early adolescence. The focus of the class is the physical changes their bodies go through and the required increase in appropriate hygiene. The class will consist of a class discussion and or a video.

The goals of this lesson are to help students:

- Gain accurate and age appropriate knowledge about puberty
- Develop a positive self-image and attitude towards the changes that they are experiencing or will experience
- Develop skills that will enable them to communicate appropriately with others about puberty.

For your child to participate in this discussion, please complete the bottom of this for and return it to their homeroom teacher on or before Monday March 14, 2019. If you have any question please feel free to contact me at 256-2268.

Edwards, 2013-04-17 This series is intended for the rapidly increasing number of health care professionals who have rudimentary knowledge and experience in health care computing and are seeking opportunities to expand their horizons. It does not attempt to compete with the primers already on the market. Eminent international experts will edit, author, or contribute to each volume in order to provide comprehensive and current accounts of innovations and future trends in this quickly evolving field. Each book will be practical, easy to use, and well referenced. Our aim is for the series to encompass all of the health professions by focusing on specific professions such as nursing in individual volumes. However, integrated computing systems are only one tool for improving communication among members of the health care team. Therefore, it is our hope that the series will stimulate professionals to explore additional means of fostering interdisciplinary exchange. This series springs from a professional collaboration that has grown over the years into

a highly valued personal friendship Our joint values put people first If the Computers in Health Care series lets us share those values by helping health care professionals to communicate their ideas for the benefit of patients then our efforts will have succeeded
