## **Nursing Care For The Dying Patient:**

*Nursing Care at the End of Life* Joyce V Zerwekh, 2005-12-28 *Nursing Care at the End of Life* Palliative Care for Patients and Families explores the deep issues of caring for the dying and suffering. The book is based on the Hospice Family Caregiving Model previously published by the author and focuses on the practice implications of care for the dying. The book is written in a clear and user friendly style and is ideal for undergraduate nursing students learning about dying, suffering and caring for individuals and their families.

**Compassionate Person-Centered Care for the Dying** Bonnie Freeman, 2015-02-23 This groundbreaking reference for palliative care nurses is the first to provide realistic and achievable evidence based methods for incorporating compassionate and humanistic care of the dying into current standards of practice. It builds on the author's research based CARES Tool, a reference that synthesizes five key elements demonstrated to enable a peaceful death as free from suffering as possible: Comfort, Airway Management, Management of Restlessness and Delirium, Emotional and Spiritual Support, and Self Care for Nurses. The book describes step by step how nurses can easily implement the basic tenets of the CARES Tool into their end of life practice. It provides a clearly defined plan that can be individualized for each patient and tailored to specific family needs and facilitates caring for the dying in the most respectful and humane way possible.
