Nursing Ethics Theories And Pragmatics:

Nursing Ethics Theories and Pragmatics , Concepts and Cases in Nursing Ethics, second edition Michael Yeo, Anne Moorhouse, 1996-09-13 Concepts and Cases in Nursing Ethics maps the ethical landscape of contemporary nursing. The book is the product of a collaboration between philosopher ethicist Michael Yeo, nurse ethicist Anne Moorhouse, and six representatives of various areas of professional nursing. It thus combines philosophical and ethical analysis with nursing knowledge and experience in a manner that is both understandable and relevant. The book is organized around six main concepts in nursing ethics: beneficence, autonomy, confidentiality, truth telling, justice, and integrity. A chapter is devoted to the elucidation of each of these concepts. In each chapter, historical background and conceptual analysis are supplemented by case studies that exemplify issues and show how the concept applies in nursing practice. In this new edition, the materials in each chapter have been updated to reflect recent developments in nursing and more generally in health care. In addition, a totally new chapter on ethical theory has been added. Complete with bibliographies and study questions for further analysis of cases, this book is ideally suited for textbook use. It will help both practitioners and students to deal better with the clinical problems and issues that are encountered in the field. However, its simple prose and clear exposition of complex issues will make Concepts and Cases in Nursing Ethics attractive to anyone concerned about health care. **Nursing Law and Ethics**

Amnon Carmi, Stanley Schneider, 2012-12-06 The papers in this section on the legal aspects of nursing can be divided into two parts: a) the rights and responsibilities of nurses, patients, and the medical system; and b) treatment with its legal ramifications. How does one decide whether patients' rights or the health professional's rights are to be considered more seriously? Is there an absolute right or wrong? Since legal rights are sanctioned by constantly changing social and political climates, this may in effect diminish the possibility of anything absolute. The question of the equivalency of legal and moral rights is also addressed. Due to the prevalent vagueness with regard to bioethical issues as they affect human and legal rights, often we become absorbed in philosophical polemics without being able to arrive at any answer. In order to move beyond the ethical theoretical formulations, there is daily confrontation in the nursing profession: the practical application of theory. **Concepts and Cases in Nursing Ethics - Third Edition** Michael Yeo, Anne Moorhouse, Pamela Kahn, Patricia Rodney, 2010-09-08 Concepts and Cases in Nursing Ethics is a case-based exploration of the core principles of health care ethics applied to nursing. The book is a collaboration between philosopher ethicist Michael Yeo and nurse ethicist and educators Anne Moorhouse, Pamela Khan, and Patricia Rodney. It thus combines philosophical and ethical analysis with extensive knowledge and experience in nursing and health care. The book is organized around six main concepts in health care ethics: beneficence, autonomy, truthfulness, confidentiality, justice, and integrity. A chapter is devoted to the elucidation of each of these concepts. In each chapter, historical background and conceptual analysis are supplemented by case studies that exemplify issues and show how the concept applies in health care and nursing practice. In this new edition, the conceptual

analysis throughout has been updated and reworked in view of changes in the health care system In addition there is a new chapter specifically devoted to recent developments affecting nursing and other health professions Previous case studies have been modified and new ones added to address current and emerging issues Although the text focuses mainly on the social and political situation of nursing the analysis has relevance also for medicine and the allied health professions and indeed for anyone working in the health system
