Nursing Care Marita Nordhaug,2017-07-06 Partiality and Justice in Nursing Care examines the conflicting normative claims

of partiality and impartiality in nursing care looking in depth at how to reconcile reasonable concerns for one particular patient with equally important concerns for the maximisation of health related welfare for all with relevant nursing care needs in a resource limited setting Drawing on moral philosophy this book explores how discussions of partiality and impartiality in moral philosophy can have relevance to the professional context of clinical nursing care as well as in nursing ethics in general It develops a framework for normative nursing ethics that incorporates a notion of permissible partiality and specifies which concerns an ethics of nursing care should entail when balancing partialist and impartialist concerns At the same time Nordhaug argues that this partiality must also be constrained by both principled and context sensitive assessments of patients needs as well as of the role relative deontological restriction of minimising harm something that could be mitigated by institutional and organisational arrangements This thought provoking volume is an important contribution to nursing ethics and philosophy *Leadership and Nursing Care Management* Jean Nagelkerk, 2005-11-01

Excellence in Compassionate Nursing Care Claire Chambers, Elaine Ryder, 2017-10-31 We are passionately interested in the importance of nursing values and believe that excellence in compassionate nursing care lies at the heart of nursing practice and that leadership is key to making this happen Every nurse whatever their position and role has a vital leadership role to play in ensuring excellent care remains at the heart of nursing practice From the preface Highly committed nurses often feel disillusioned disempowered and angry when they are faced with negative media reports about poor standards of care They are genuinely concerned and want to address issues when patients and clients feel they are not being cared for with compassion However complex and under resourced healthcare environments pose many challenges Developing ideas and initiatives from the highly successful Compassion and Caring in Nursing in this new book Claire Chambers and Elaine Ryder focus on these potential difficulties and offers practitioners a chance to build on their current knowledge and experience and consider ways to take the lead and act as catalysts for change Each chapter focuses on a particular issue and case scenarios are used and revisited in each chapter so that theory and practice are integrated throughout Specific prompts encourage readers to bring about vital change in practice All nurses health visitors and health and social care practitioners should find this book motivating and realistic It also offers thought provoking inspiration for undergraduate and postgraduate healthcare students
