The Nutmeg's Curse Amitav Ghosh,2021-10-14 The author of *The Great Derangement* finds the origins of our climate crisis in Western colonialism s violent exploitation of human life and the environment A powerful work of history essay testimony and polemic Amitav Ghosh s new book traces our contemporary planetary crisis back to the discovery of the New World and the sea route to the Indian Ocean The Nutmeg s Curse argues that the dynamics of climate change today are rooted in a centuries old geopolitical order constructed by Western colonialism At the center of Ghosh s narrative is the now ubiquitous spice nutmeg The history of the nutmeg is one of conquest and exploitation of both human life and the natural environment In Ghosh s hands the story of the nutmeg becomes a parable for our environmental crisis revealing the ways human history has always been entangled with earthly materials such as spices tea sugarcane opium and fossil fuels Our crisis he shows is ultimately the result of a mechanistic view of the earth where nature exists only as a resource for humans to use for our own ends rather than a force of its own full of agency and meaning Writing against the backdrop of the global pandemic and the Black Lives Matter protests Ghosh frames these historical stories in a way that connects our shared colonial histories with the deep inequality we see around us today By interweaving discussions on everything from the global history of the oil trade to the migrant crisis and the animist spirituality of Indigenous communities around the world The Nutmeg s Curse offers a sharp critique of Western society and speaks to the profoundly remarkable ways in which human history is shaped by non human forces

Encyclopedia of Cultivated Plants Christopher Curnutt,2013-04-25 Readers of this expansive three volume encyclopedia will gain scientific sociological and demographic insight into the complex relationship between plants and humans across history Comprising three volumes and approximately half a million words this work is likely the most comprehensive reference of its kind providing detailed information not only about specific plants and food crops such as barley corn potato rice and wheat but also interdisciplinary content that draws on the natural sciences social sciences and humanities The entries underscore the fascination that humans have long held for plants identifies the myriad reasons why much of life on earth would be

impossible without plants and points out the intertwined relationship of plants and humans and how delicate this balance can be While the majority of the content is dedicated to the food plants that are essential to human existence material on ornamentals fiber crops pharmacological plants and carnivorous plants is also included
