A Liberal Catholic Bioethics James F. Drane, 2010. *A Liberal Catholic Bioethics* opens a new dialogue between Christian reasoning and belief and secular positions in bioethics. The well-documented book covers in detail internal and external debates and positions of Roman Catholic theology and hierarchy, issues of contraception and abortion, palliative care, and euthanasia, caring humanely for the demented, the use and abuse of modern technology in medicine. The doctrine of Papal infallibility is identified as a main reason in hindering and suppressing a dialogue within the church with the faithful and with other religious and humanist positions. Were the Borgia Popes infallible? Was Pope Urban infallible when he condemned Galileo? The author asks. He thus carries the debate far beyond specific bioethics issues towards a more humane medicine and culture.
