Soft Computing Applications Valentina Emilia Balas, Lakhmi C. Jain, Branko Kovačević, 2015-11-02 These volumes constitute the Proceedings of the 6th International Workshop on Soft Computing Applications or SOFA 2014 held on 24-26 July 2014 in Timisoara Romania This edition was organized by the University of Belgrade Serbia in conjunction with Romanian Society of Control Engineering and Technical Informatics SRAIT Arad Section

The General Association of Engineers in Romania Arad Section Institute of Computer Science Iasi Branch of the Romanian Academy and IEEE Romanian Section The Soft Computing concept was introduced by Lotfi Zadeh in 1991 and serves to highlight the emergence of computing methodologies in which the accent is on exploiting the tolerance for imprecision and uncertainty to achieve tractability robustness and low solution cost Soft computing facilitates the use of fuzzy logic neurocomputing evolutionary computing and probabilistic computing in combination leading to the concept of hybrid intelligent systems The combination of such intelligent systems tools and a large number of applications introduce a need for a synergy of scientific and technological disciplines in order to show the great potential of Soft Computing in all domains The conference papers included in these proceedings published post conference were grouped into the following area of research Image Text and Signal Processing li Intelligent Transportation Modeling and Applications Biomedical Applications Neural Network and Applications Knowledge Based Technologies for Web Applications Cloud Computing Security Algorithms and Computer Networks Knowledge Based Technologies Soft Computing Techniques for Time Series Analysis Soft Computing and Fuzzy Logic in Biometrics Fuzzy Applications Theory and Fuzzy Control Bussiness Process Management Methods and Applications in Electrical Engineering The volumes provide useful information to professors researchers and graduated students in area of soft computing techniques and applications as they report new research work on challenging issues

Artificial Intelligence-Empowered Bio-medical Applications Dimitrios P. Panagoulas, George A. Tsihrintzis, Maria Virvou, 2025-07-19 The book delves into advancements in personalized medicine highlighting the transition from generalized treatments to tailored strategies through AI and machine learning It first emphasizes the role of biomarkers in training predictive models and neural networks enhancing disease diagnosis and patient management It then explores AI driven healthcare systems particularly the use of microservices to improve scalability and management Additionally it examines regulatory challenges the need for AI explainability and the PINXEL framework which defines explainability requirements using the technology acceptance model TAM and the diffusion of innovation theory DOI Furthermore the book evaluates the capabilities of large language models including ChatGPT and GPT 4V in medical applications with a focus on diagnosis and structured assessments in general pathology Lastly it introduces an AI powered system for primary care diagnosis that integrates language models machine learning and rule based systems The interactive AI assistants Med Primary AI assistant and Dermacen Analytica leverage natural language processing image analysis and multi modal AI to enhance patient interactions and provide healthcare professionals with high accuracy personalized diagnostic support By taking a holistic approach the book underscores the integration of AI into healthcare aiming to support medical professionals in patient diagnosis and management with precision and adaptability

Biochemistry, Nutrition, and Therapeutics of Black Cumin Seed Abdalbasit Adam Mariod, 2022-11-05 Biochemistry Nutrition and Therapeutics of Black Cumin Seed covers the history of medicinal uses of *N sativa* and its position in various cultures agronomy cultivation and agricultural practices The

Technologies CSCT 2023 organized by SAU Center for Research and Innovative Learning SCRIL South Asian University India from 23 December 2023 The book extensively covers recent research in algorithms for smart computing AI and machine learning in smart computing edge computing algorithms adversarial networks and autoencoders data visualization data mining data analytics machine learning game theory high performance computing mobile and ubiquitous platforms for smart environments cloud edge fog computing technologies for smart systems Internet of Things IoT and industrial IoT technologies for smart systems smart device and hardware security privacy and economics in smart environments big data healthcare informatics smart precision agriculture smart transportation social network analysis and human computer interaction The work is presented in two volumes **Nanofertilizer Delivery, Effects and Application Methods** Kamel A Abd-Elsalam, 2024-01-13 Nanofertilizer Delivery Effects and Application Methods explores the science of nutrient nanoformulation a potential tool toward sustainable and climate sensitive crops Wide spread use of chemical fertilizers has been shown to cause significant damage to soil structure mineral cycles soil microbial flora plants and creating human health risk both immediately and for future generations Through methods that include targeted distribution and gradual or controlled release nanostructured fertilizers can improve nutrient usage efficiency According to recent studies through environmental cues and biological demands nano fertilizers can respond to specific challenges and boost agricultural yield by increasing the rate of seed germination seedling growth photosynthetic activity nitrogen metabolism and carbohydrate and protein synthesis Nanofertilizer Delivery Effects and Application Methods discusses the potential agricultural benefits of nanofertilizers from coverage of their formulation and delivery to application plant uptake translocation and destiny and their overall effect on plant physiology and metabolism This book is ideal for researchers in industry and academia Highlights types uses and advantages of a wide range and variety of nanofertilizers on agri food sectors Looks at current practices their challenges and future development opportunities Includes methods and applications for real world insights

Polyethersulfone: Membranes for Multiple Clinical Applications F. Locatelli, C. Ronco, Claudio Ronco, C. Tetta, 2003-07 Since high permeability membranes were first introduced their performance has constantly improved The publication at hand focuses on a new polymer polyethersulfone which was designed to provide better hydraulic permeability as well as high diffusive performance thus allowing for fine tuning for different clinical applications In the first part of the book physico chemical characteristics and ultrastructural features of the polyethersulfone membrane with regard to different clinical uses ranging from low to high permeability membranes are dealt with The second part is devoted to clinical applications of the polyethersulfone membrane in ESRD Its high biocompatibility combined with the matching set up of the hemodialyzer was associated with stable functional efficiency and permeability with regard to albumin amino acids beta 2 microglobulin and sepsis associated cytokines in different hemodialytic modalities such as hemodiafiltration high flux hemodialysis paired hemodiafiltration PHF online and low flux hemodialysis This publication is intended for students clinicians and researchers

alike Descriptions of innovative technological and methodological approaches regarding the evaluation of membrane and dialyzer performances and biocompatibility make it a useful basis for those interested in future comparisons among different hemodialyzers

Health Informatics Meets eHealth Günter Schreier, 2018-05-15 Biomedical engineering and health informatics are closely related to each other and it is often difficult to tell where one ends and the other begins but ICT systems in healthcare and biomedical systems and devices are already becoming increasingly interconnected and share the common entity of data This is something which is set to become even more prevalent in future and will complete the chain and flow of information from the sensor via processing to the actuator which may be anyone or anything from a human healthcare professional to a robot Methods for automating the processing of information such as signal processing machine learning predictive analytics and decision support are increasingly important for providing actionable information and supporting personalized and preventive healthcare protocols in both biomedical and digital healthcare systems and applications This book of proceedings presents 50 papers from the 12th eHealth conference eHealth2018 held in Vienna Austria in May 2018 The theme of this year's conference is Biomedical Meets eHealth From Sensors to Decisions and the papers included here cover a wide range of topics from the field of eHealth The book will be of interest to all those working to design and implement healthcare today
