The domestic dog, facultative carnivore, and the domestic cat, obligate carnivore, have evolved differentially in their digestive tract, nutrition, metabolism, chemical sensing, and feeding behavior. These animals have been human companions for at least 12,000 and 9,000 years, respectively, and continue to contribute to the mental health and well-being of children, adolescents, and adults. Clarification Calcium Carbonate We ve had some questions from readers regarding the use of the term calcium carbonate which is listed as an ingredient in a number of the diets found in this book and therefore wanted to clarify what is meant by this ingredient Baking soda comes in two forms sodium bicarbonate and calcium

carbonate The sodium bicarbonate version is widely available as baking soda and is commonly used in baking but none of the recipes in this book use it as an ingredient The calcium carbonate version of baking soda is sometimes sold as baking soda substitute and sometimes referred to as simply baking soda To avoid confusing sodium bicarbonate and calcium carbonate any time the calcium carbonate type of baking soda has been used in a diet in this book the ingredient includes the specific term calcium carbonate There are several manufacturers of calcium carbonate baking soda for example Amazon carries the Ener G Foods product baking soda substitute Calcium carbonate can also be sold for garden use which is non food grade so to avoid the use of the garden product in foods the term baking soda was used in this book instead to indicate that readers should be sure to select a food appropriate ingredient
