Fat and Unhappy Tristan Justice,Gina Bontempo,2024-12-03 More than seventy years after Americans dutifully embraced the low fat diet in an era of industrialized food a nation left fat sick and depressed three generations later are now desperately looking for answers to combat the twin epidemics of obesity and chronic disease The contemporary phenomenon to promote body positivity under the banner of health at every size however is another corporate sponsored movement to accept obesity and chronic illness as the new norm while fundamentally transforming our healthcare system into a sick care system Big Food and Big Pharma

have accomplished what Big Tobacco tried but failed hook generations of consumers on biochemically addictive products and discredit the consequences Everybody knows smoking kills Few understand that cereal will too The modern message of body positivity is an emotionally tempting doctrine to a public rightly frustrated by the guidance of the so called experts but in reality it remains a trojan horse for the food and medical industries to prey on the physical insecurities and emotional turbulence of lifelong customers

Protein Source For A Sustainable And Healthy Nutrition Carla Cavallo,Kathleen L. Hefferon,2024-08-01 Global socioeconomic systems and climate change exacerbate disparities that leave a huge proportion of the human population malnourished This condition will be further worsened by intensive food production like livestock that produces affordable protein but contribute to increasing greenhouse gases making conventional food sources such as animal livestock unsustainable at global scales in a vicious cycle Thus food systems have come under pressure to meet global food demands whilst having to meet economic and ecological targets **The SAGE Encyclopedia of Food Issues** Ken Albala,2015-03-27

The SAGE Encyclopedia of Food Issues explores the topic of food across multiple disciplines within the social sciences and related areas including business consumerism marketing and environmentalism In contrast to the existing reference works on the topic of food that tend to fall into the categories of cultural perspectives this carefully balanced academic encyclopedia focuses on social and policy aspects of food production safety regulation labeling marketing distribution and consumption A sampling of general topic areas covered includes Agriculture Labor Food Processing Marketing and Advertising Trade and Distribution Retail and Shopping Consumption Food Ideologies Food in Popular Media Food Safety Environment Health Government Policy and Hunger and Poverty This encyclopedia introduces students to the fascinating and at times contentious and ever so vital field involving food issues Key Features Contains approximately 500 signed entries concluding with cross references and suggestions for further readings Organized A to Z with a thematic Reader s Guide in the front matter grouping related entries by general topic area Provides a Resource Guide and a detailed and comprehensive Index along with robust search and browse functionality in the electronic edition This three volume reference work will serve as a general non technical resource for students and researchers who seek to better understand the topic of food and the issues surrounding it *Discriminating Taste* S. Margot Finn,2017-04-24

For the past four decades increasing numbers of Americans have started paying greater attention to the food they eat buying organic vegetables drinking fine wines and seeking out exotic cuisines Yet they are often equally passionate about the items they refuse to eat processed foods generic brands high carb meals While they may care deeply about issues like nutrition and sustainable agriculture these discriminating diners also seek to differentiate themselves from the unrefined eater the common person who lives on junk food *Discriminating Taste* argues that the rise of gourmet ethnic diet and organic foods must be understood in tandem with

the ever widening income inequality gap Offering an illuminating historical perspective on our current food trends S Margot Finn draws numerous parallels with the Gilded Age of the late nineteenth century an era infamous for its class divisions when gourmet dinners international cuisines slimming diets and pure foods first became fads Examining a diverse set of cultural touchstones ranging from Ratatouille to The Biggest Loser Finn identifies the key ways that good food has become conflated with high status She also considers how these taste hierarchies serve as a distraction leading middle class professionals to focus on small acts of glamorous and virtuous consumption while ignoring their class s larger economic stagnation A provocative look at the ideology of contemporary food culture Discriminating Taste teaches us to question the maxim that you are what you eat

Big Food Simon N. Williams, Marion Nestle, 2017-10-02 Obesity is a global public health problem of crucial importance Obesity rates remain high in high income countries and are rapidly increasing in low and middle income countries Concurrently the global consumption of unhealthy products such as soft drinks and processed foods continues to rise The ongoing expansion of multinational food and beverage companies or Big Food is a key factor behind these trends This collection provides critical insight into the global expansion of Big Food including its incursion into low and middle income countries It examines the changing dynamics of the global food supply and discusses how low income countries can alter the Big Food diet from the bottom up It examines a number of issues related to Big Food marketing strategies including the way in which they advertise to youths and the rural poor These issues are discussed in terms of their public health implications and their relation to public health activities for example soda taxes and the promotion of nutritionally healthier products This book was originally published as a special issue of Critical Public Health

Nutrition Barbara A. Brehm, 2015-06-10 This thorough one stop resource draws on solid science and the latest research to play a dual educational role providing background for students while answering general readers questions about a wide range of nutrition related topics Nutrition is a popular but often misunderstood topic one about which there is a great deal of interest as evidenced by the plethora of available advice Because nutrition is a key factor in health it is important that the public have a source of information they can trust This is that source a comprehensive overview that will help readers make sense of conflicting information they find in the media regarding what is healthy and what is not Organized alphabetically the two volume work covers the most important topics in human nutrition including nutrients nutrition related health concerns aging and nutrition eating disorders and the value of dietary supplements The digestive system and its organs are discussed with particular attention to health issues such as irritable bowel syndrome and the role of helpful bacteria The physiology of hunger and the psychology of appetite and eating behaviors are explained The work also delves into data on foods that have been featured in recent research such as garlic ginger and turmeric and it offers consumers a clearer understanding of nutrition related practices such as organic farming genetically modified foods and the use of food additives
