 Fauri, 2014-10-03 The History of Migration in Europe belies several myths by arguing for example that immobility has not
 been the normal condition of people before the modern era Migration far from being an income maximizing choice taken by
 lone individuals is often a household strategy and local wages benefit from migration This book shows how successes arise
 when governments liberalize and accompany the international movements of people with appropriate legislation while
 failures take place when the legislation enacted is insufficient belated or ill shaped Part I of this book addresses mainly
 methodological issues Past and present migration is basically defined as a cross cultural movement cultural boundaries need
 prolonged residence and active integrationist policies to allow cross fertilization of cultures among migrants and non
 migrants Part II collects chapters that examine the role of public bodies with reference to migratory movements depicting a
 series of successes and failures in the migration policies through examples drawn from the European Union or single
 countries Part III deals with challenges immigrants face once they have settled in their new countries Do immigrants seek
 integration in their host culture Through which channels is such integration achieved and what roles are played by
 citizenship and political participation What is the identity of migrants and their children born in the host countries This text s
 originality stems from the fact that it explains the complex nature of migratory movements by incorporating a variety of
 perspectives and using a multi disciplinary approach including economic political and sociological contributions *The
 European Miracle* Eric Lionel Jones, 2003-08-04 Why modern states and economies developed in Europe first and later in
 India and China The Mediterranean Response to Globalization Before 1950 Sevket Pamuk, Jeffrey G.

Williamson,2000-03-23 The studies in this exceptional volume explore the challenges and opportunities presented by globalization events prior to 1950 and identify how countries around the Mediterranean responded to them In addition to comparative assessments of regional performance the volume offers detailed case studies of Spain Italy the Balkans Turkey Israel and Egypt *The Oxford Handbook of the State in the Ancient Near East and Mediterranean* Peter Fibiger Bang,Walter Scheidel,2013-01-31 Tracing the evolution of the state from its beginnings to the early Middle Ages this comprehensive handbook focuses on key institutions and dynamics while providing accessible accounts of states and empires in the ancient Near East and Mediterranean **Land Rights, Ethno-nationality and Sovereignty in History** Stanley Engerman,Jacob Metzger,2004-08-02 The complex relationships between ethno nationality rights to land and territorial sovereignty have long fed disputes over territorial control and landed rights between different nations ethnicities and religions These disputes raise a number of interesting issues related to the nature of land regimes and to their economic and political implications The studies drawn together in this key volume explore these and related issues for a broad variety of countries and times They illuminate the diverse causes of ethno national land disputes and the different forms of adjustment and accommodation to the power differences between the contesting groups This is done within a framework outlined by the editors in their analytical overview which offers contours for comparative examinations of such disputes past and present Providing conceptual and factual analyses of comparative nature and wealth of empirical material both historical and contemporary this book will appeal to economic historians economists political scientists sociologists anthropologists and all scholars interested in issues concerning ethno nationality and land rights in historical perspective Cultures Merging Eric L. Jones,2016-06-28 Economists agree about many things contrary to popular opinion but the majority agree about culture only in the sense that they no longer give it much thought So begins the first chapter of Cultures Merging in which Eric Jones one of the world s leading economic historians takes an eloquent pointed and personal look at the question of whether culture determines economics or is instead determined by it Bringing immense learning and originality to the issue of cultural change over the long term course of global economic history Jones questions cultural explanations of much social behavior in Europe East Asia the United States Australia and the Middle East He also examines contemporary globalization arguing that while centuries of economic competition have resulted in the merging of cultures into fewer and larger units these changes have led to exciting new syntheses Culture matters to economic outcomes Jones argues but cultures in turn never stop responding to market forces even if some elements of culture stubbornly persist beyond the time when they can be explained by current economic pressures In the longer run however cultures show a fluidity that will astonish some cultural determinists Jones concludes that culture s ghostly transit through history is much less powerful than noneconomists often claim yet it has a greater influence than economists usually admit The product of a lifetime of reading and thinking on culture and economics a work of history and an analysis of the contemporary world Cultures Merging will be essential

reading for anyone concerned about the interaction of cultures and markets around the world

State Power in Ancient China and Rome Walter Scheidel, 2015 Two thousand years ago the Qin Han and Roman empires were the largest political entities of the ancient world developing simultaneously yet independently at opposite ends of Eurasia Although their territories constituted only a small percentage of the global land mass these two Eurasian polities controlled up to half of the world population and endured longer than most pre modern imperial states Similarly their eventual collapse occurred during the same time The parallel nature of the Qin Han and Roman empires has rarely been studied comparatively Yet here is a collection of pioneering case studies compiled by Walter Scheidel that sheds new light on the prominent aspects of imperial state formation This essential new volume builds on the foundation of Scheidel's *Rome and China* 2009 and opens up a comparative dialogue among distinguished scholars They provide unique insights into the complexities of imperial rule including the relationship between rulers and elite groups the funding of state agents the determinants of urban development and the rise of bureaucracies By bringing together experts in each civilization *State Power in Ancient China and Rome* provides a unique forum to explore social evolution helping us further understand government and power relations in the ancient world

Ideas and Economic Crises in Britain from Attlee to Blair (1945-2005) Matthias Matthijs, 2012-08-21 During the period from 1945 to 2005 Britain underwent two deep seated institutional transformations when political elites successfully challenged the prevailing wisdom on how to govern the economy Attlee and Thatcher were able to effectively implement most of their political platforms During this period there were also two opportunities to challenge existing institutional arrangements Heath's U turn in 1972 signalled his failure to implement the radical agenda promised upon election in 1970 whilst Tony Blair's New Labour similarly failed to instigate a major break with the Thatcherite settlement Rather than simply retell the story of British economic policymaking

since World War II this book offers a theoretically informed version of events which draws upon the literatures on institutional path dependence economic constructivism and political economy to explain this puzzle It will be of great interest to both researchers and postgraduates with an interest in British economic history and the fields of political economy and economic crisis more widely
