Evaluation and Translation Carol Maier, 2014-04-23 The definition of value or quality with respect to work in translation has historically been a particularly vexed issue Today however the growing demand for translations in such fields as technology and business and the increased scrutiny of translators work by scholars in many disciplines is giving rise to a need for more nuanced more specialized and more explicit methods of determining value Some refer to this determination as evaluation others use the term assessment Either way the question is one of measurement and judgement which are always unavoidably subjective and frequently rest on criteria that are not overtly expressed This means that devising more complex evaluative practices involves not only quantitative techniques but also an exploration of the attitudes preferences or individual values on which criteria are established Intended as an interrogation and a critique that can serve to prompt a more thorough and open consideration of evaluative criteria this special issue of The Translator offers examinations of diverse evaluative practices and contains both empirical and hermeneutic work Topics addressed include the evaluation of student translations using more up to date and positive methods such as those employed in corpus studies the translation of non standard language translation into the second language terminology the application of theoretical criteria to practice a social textual perspective and the reviewing of literary translations in the press In addition reviews by a number of literary translators discuss specific translations both into and out of English

History and Electronic Artefacts Edward Higgs, 1998 We are now entering a world of electronic communications where an increasing amount of contemporary information is created and retained only in electronic form How will such unstable flows of information be preserved for future historians Will the future have a past Will the history of our contemporary world be lost to our descendants History and Electronic Artefacts is the first publication to examine the implications of this revolution for historical research Historians are used to handling paper and parchment record in archives These are actual pieces of correspondence which passed between historical actors They are also relatively stable artefacts which can be preserved easily Two factors introduced by the electronic revolution threaten the existence of paper archives the dissociation between information content and the media by which it is transmitted ruptures the solidity of the archival object The ability to store electronic information anywhere and access it remotely via networks could make the central paper archive redundant Experts from the fields of information management and technology data archiving library science as well as historians consider the issues raised in depth The authors also place a unique emphasis on European developments

An Ethical Global Information Society Jacques J. Berleur, Diane Whitehouse, 2013-11-11 Many challenges lie ahead in the development of a global information society Culture and democracy are two areas which may be under particular threat The book reflects on today's complex and uncertain cultural and democratic developments arising as a result of an increasingly global technologically connected world In particular it focuses on the Internet examining new metaphors for communication defining the issues at stake and proposing options actions and solutions Among the issues discussed were multi cultural

developments cultural sensitivities and the involvement of cultural minorities generation gaps gender issues technology access for the elderly and the disabled technology transfer *Quality Software Project Management* Robert T. Futrell,Donald F. Shafer,Linda Shafer,2002 Annotation Drawing on best practices identified at the Software Quality Institute and embodied in bodies of knowledge from the Project Management Institute the American Society of Quality IEEE and the Software Engineering Institute *Quality Software Project Management* teaches 34 critical skills that allow any manager to minimize costs risks and time to market Written by leading practitioners Robert T Futrell Donald F Shafer and Linda I Shafer it addresses the entire project lifecycle covering process project and people It contains extensive practical resources including downloadable checklists templates and forms **Homophones and Homographs** ,2014-11-01 This expanded fourth edition defines and cross references 9 040 homophones and 2 133 homographs up from 7 870 and 1 554 in the 3rd ed As the most comprehensive compilation of American homophones words that sound alike and homographs look alike this latest edition serves well where even the most modern spell checkers and word processors fail although rain reign and rein may be spelled correctly the context in which these words may appropriately be used is not obvious to a computer

Unimagined Futures - ICT Opportunities and Challenges Leon Strous,Roger Johnson,David Alan Grier,Doron Swade,2020-12-05 This Festschrift *Unimagined Futures ICT Opportunities and Challenges* is the first Festschrift in the IFIP AICT series It examines key challenges facing the ICT community today While addressing the contemporary challenges the book provides the opportunity to look back to help understand the contemporary scene and identify appropriate future responses to them Experts in different areas of the ICT scene have contributed to this IFIP 60th anniversary book which will be a key input to the ICT community worldwide on setting policy priorities and agendas for the coming decade In addition a number of contributions look specifically at the role of professionals and of national regional and global organizations in disseminating the benefits of ICT to humanity worldwide **Dialogue on the Internet** Richard Holt,2004-07-30 Richard Holt draws on his extensive experience in discourse analysis and Web design to present a picture of the Internet as a potentially powerful tool of civic discourse in the third millennium Beginning with background on two of the Internet s most prevalent communication forms email discussion messages and Web pages sites the book introduces the concepts of monologism and dialogism Holt advocates a method of discursive analysis called dual reading in which Internet utterance is analyzed first monologically and then dialogically This method is demonstrated by analyzing email discussions that deal with such varied topics as media espionage sexual identity presidential politics hate speech and hate crimes This volume contains a multidisciplinary approach involving a wide range of specializations from computer science to philosophy It will appeal to students teachers practitioners and lay readers who are interested in Internet communication politics and popular culture In contrast to many of the doom and gloom accounts of the deficiencies of the Internet it offers a hopeful vision of the Internet as a means of civic discourse **Encyclopedia of Library and Information Science** Allen Kent,1986-09-23 The
